

For each of the following problems, find the range of the random variable  $X$  and, for each  $y$  in the range of  $X$ , find the indicated probability.

1) Toss a coin 4 times. Let  $X$  be the number of heads minus the number of tails. Find  $P(X=y)$ .

2) Toss a pair of dice. Let  $X$  be the sum of the numbers facing up on the dice. Find  $P(X=y)$ .

3) Toss a die 5 times. Let  $X$  be the number of 6's that appear. Find  $P(X=y)$ .

4) Let  $S = \{(x, y) \in \mathbb{R}^2 \mid x^2 + y^2 \leq 1\}$ . If  $(a, b)$  is a randomly chosen point in  $S$ , let  $X$  be the distance from the origin to  $(a, b)$ . Find  $P(X \leq t)$  for each  $t$  in the range of  $X$ .

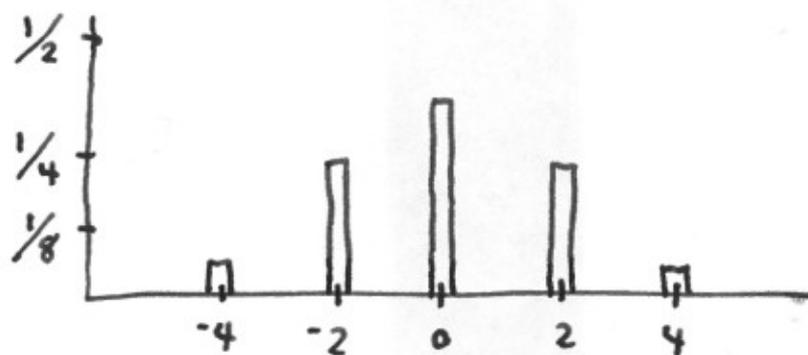

# Work Sheet solutions

1) Range  $\mathcal{X} = \{-4, -2, 0, 2, 4\}$

$$P(\mathcal{X} = -4) = \frac{1}{16} = P(\mathcal{X} = 4)$$

$$P(\mathcal{X} = -2) = \frac{1}{4} = P(\mathcal{X} = 2)$$

$$P(\mathcal{X} = 0) = \frac{3}{8}$$

2) Range  $\mathcal{X} = \{2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12\}$

$$P(\mathcal{X} = 2) = P(\mathcal{X} = 12) = \frac{1}{36}$$

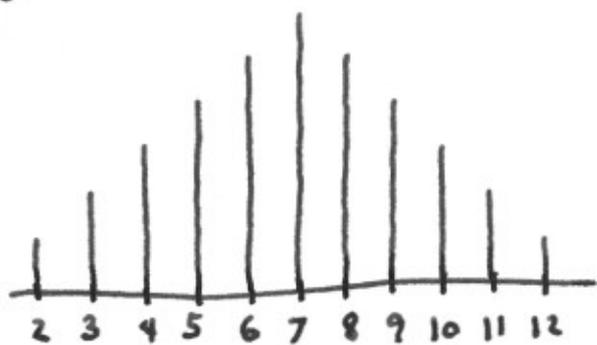

$$P(\mathcal{X} = 3) = P(\mathcal{X} = 11) = \frac{2}{36} = \frac{1}{18}$$

$$P(\mathcal{X} = 4) = P(\mathcal{X} = 10) = \frac{3}{36} = \frac{1}{12}$$

$$P(\mathcal{X} = 5) = P(\mathcal{X} = 9) = \frac{4}{36} = \frac{1}{9}$$

$$P(\mathcal{X} = 6) = P(\mathcal{X} = 8) = \frac{5}{36}$$

$$P(\mathcal{X} = 7) = \frac{6}{36} = \frac{1}{6}$$

$$3) \text{ Range}(\underline{X}) = \{0, 1, 2, 3, 4, 5\}$$

$$P(\underline{X} = 0) = \binom{5}{0} \left(\frac{5}{6}\right)^5 \approx 0.4019$$

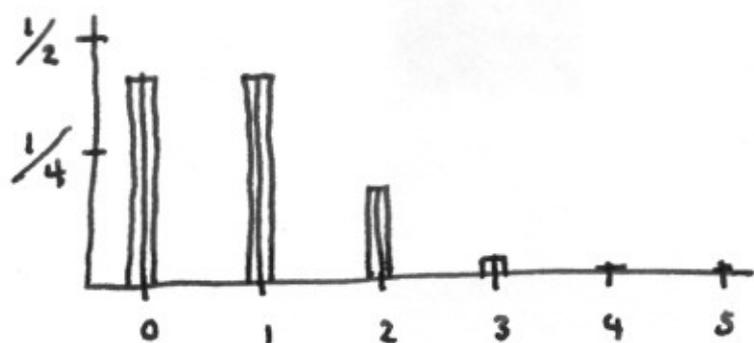

$$P(\underline{X} = 1) = \binom{5}{1} \left(\frac{1}{6}\right) \left(\frac{5}{6}\right)^4 \approx 0.4019$$

$$P(\underline{X} = 2) = \binom{5}{2} \left(\frac{1}{6}\right)^2 \left(\frac{5}{6}\right)^3 \approx 0.1608$$

$$P(\underline{X} = 3) = \binom{5}{3} \left(\frac{1}{6}\right)^3 \left(\frac{5}{6}\right)^2 \approx 0.0322$$

$$P(\underline{X} = 4) = \binom{5}{4} \left(\frac{1}{6}\right)^4 \left(\frac{5}{6}\right) \approx 0.0032$$

$$P(\underline{X} = 5) = \binom{5}{5} \left(\frac{1}{6}\right)^5 \approx 0.00013$$

$$4) \text{ Range}(\underline{X}) = \{x \mid 0 \leq x \leq 1\}$$

$$P(\underline{X} \leq t) = \frac{\pi t^2}{\pi} = t^2$$
