

History of Science 206r
Archimedes and the Archimedean Tradition
SPRING 2009

John E. Murdoch, Barry C. Mazur, and Mark Schiefsky
Meeting time: Th., 2-4

1. Basic Sources

Heiberg, J.L. Archimedis opera 2nd ed., 3 vols., Leipzig: Teubner, 1910-15
Basic edition of Greek text (with Latin translation). 1st ed., 3 vols.,
Leipzig: Teubner, 1880-81.

Archimedis, Opera, vol.IV: Über einander berührende Kreis, Aus dem
Arabischen übersetzt... Yvonne Dold-Samplonius, Heinrich Hermelink
und Matthias Schramm, Stuttgart: Teubner, 1975. contains 14
“Faksimiletafeln” of the Arabic text.

Heath, T.L. The Works of Archimedes, Cambridge U.P., 1897; reprinted with
the supplement, The Method of Archimedes (which appeared separately,
Cambridge U.P. 1912), New York: Dover Publications, n.d.

Dijksterhuis, E.J. Archimedes (Acta historica scientiarum naturalium et
medicinalium, vol. 12), New York: The Humanities Press, 1957. This was
reprinted (with a new bibliographic essay by Wilbur R. Knorr), Princeton
U.P., 1987

Ver Eecke, Paul. Archimède: Les oeuvres completes, suivies des
commentaires d'Eutocius d'Ascalon, 2nd ed., 2 vols., Liege: Vaillant-
Carmaine, 1960. 1st ed. In 1 vol. 1921, does not contain the Eutocius'
commentaries. Literal translation, with modern interpretation confined to
the footnotes.

Mugler, C. Les oeuvres d'Archimède, 4 vols. Paris: Budé, 1970-72. Greek
text and French translation; includes Eutocius' commentaries.

Czwalina, A. Archimedes Werke, 5 vols. Leipzig: Teubner: 1922-25. Selected
works in German translation.

Thomas, Ivor. Selections Illustrating the History of Mathematics, Greek and
English; vol. 2, pp. 18-257 contain selections from Archimedes.

Netz, Reviel. The Works of Archimedes. Translated into English, together
with Eutocius commentaries, with commentary, and critical edition of the
diagrams. Vol. 1: The Two Books On the Sphere and the Cylinder,

Cambridge Univ. Press, 2004. Cf. The Review by N. Sidoli in Aestimatio, vol. 1 (2004), pp. 148-162.

Hogendijk, Jan. "Greek and Arabic Constructions of the regular heptagon," Archive for History of Exact Sciences, vol. 30 (1984), pp. 197-330. Contains Archimedes hitherto lost work on the heptagon.

Clagett, Marshall. Archimedes in the Middle Ages, 5 vols. In 10:Madison: University of Wisconsin Press, 1964; Philadelphia: American Philosophical Society, 1976-1984.

Drachmann, A.G. "Fragments from Archimedes in Heron's Mechanics," Centaurus, vol. 8 (1963), pp. 91-146.

Separate editions and translation of The Method:

Heiberg, J.L. "Eine neue Archimedeshandschrift," Hermes, vol. 42 (1907), pp. 234-303.

Heiberg, J.L. & Zeuthen, H.G. "Eine neue schrift des Archimedes," Bibliotheca Mathematica, 3rd ser. Vol 7 (1906-07), pp. 321-63.

Heiberg, J.L. Geometrical Solutions derived from Mechanics. A Treatise of Archimedes, LaSalle, Ill.: Open Court Publishing, 1909 (reprinted 1942); this is an English version translated from the German by Lydia G. Robinson and was reprinted from The Monist, April 1909.

Rufini, Enrico. Il "Metodo" di Archimede e le origini dell'analisi infinitesimale nell'antichità, 1st ed. Rome: Stock, 1926; 2nd ed. Milan: Feltrinelli, 1961. Introduction, translation, and commentary.

[There is a complete bibliography of Heiberg's work, both primary and secondary, in: Filologen J.L. Heiberg, 1854-1928, 2nd ed., by E. Spang-Hanssen, Copenhagen: Det Kongelige Bibliothek Nationalbibliografisk Afdelings Publikationer, 1969. This includes letter to and from various scholars.]

2. Secondary Sources:

The most recent bibliography is that of Wilbur Knorr, as above, in the 1987 edition of Dijksterhuis.

Clagett, Marshall. "Archimedes" in the Dictionary of Scientific Biography, vol. 1 (1970), pp. 213-231. Cf of the earlier article on Archimedes by F. Hultsch in Pauly-Wissowa's Real-Encyclopädie der classischen Altertumswissenschaften, II, 1 (1895), pp. 507-39.

- Heiberg, J.L. Quaestiones Archimedae, Copenhagen, 1879.
- Heiberg, J.L. "Neue Studien zu Archimedes," Abhandlungen zur Geschichte der Mathematik, vol. 5 (1890), pp. 1-84.
- Heath, Sir Thomas. A History of Greek Mathematics, vol. 2 (Oxford, 1921), pp. 16-108, 122-126.
- Knorr, Wilbur R. Ancient Sources of the Medieval Tradition of Mechanics. Greek, Arabic and Latin Studies of the Balance (Supplemento agli Annali dell'Istituto e Museo di Storia della Scienza, Anno 1982, fasc. 2) Florence, 1982. Espec. Part II: The Ancient Background.
- Knorr, Wilbur R. The Ancient Tradition of Geometric Problems, Dover Publication: New York, 1982. Espec. Ch. 5 on Archimedes, pp. 151-207.
- Knorr, Wilbur R. Textual Studies in Ancient and Medieval Geometry, Birkhauser: Boston/Basel/Berlin, 1989. Espec. on Eutocius (pp. 77-225), and on Archimedes' Dimension of the Circle (pp.375-594).
- Lurje, S.J. Archimedes, Vienna, 1948 (translated from a Russian publication in 1945.)
- Schneider, I. Archimedes: Ingenieur, Naturwissenschaftler und Mathematiker, Darmstadt: Wissenschaftliche Buchgesellschaft, 1979.
- Stein, Shermann. Archimedes. What Did Besides Cry Eureka?, Mathematical Association of America, 1999.
- Netz, Reviel. The Transformation of Mathematics in the Early Mediterranean World: From Problems to Equations, Cambridge Univ. Press, 2004. Relates, inter alia, to a problem that Archimedes left unsolved in De sphaera et cylindro, II, 4. Cf. the critical review of this book by Fabio Acerbi, Aestimatio, vol. 2 (2005), pp. 169-226.
