

Minimalist Math & art Gallery

Welcome to our CIRM-Friends Art Gallery!

Mathematics is far more than a language of numbers and formulas. It is a source of beauty, creativity, and imagination. Through fractals, geometric patterns, dynamical systems, and visual explorations, the works presented in this exhibition reveal the artistic power of mathematical ideas. They transform abstract concepts into captivating images, uncover hidden structures, and invite us to experience mathematics through the eye as well as the mind. This mini-exhibition spotlights the work of mathematicians; it is open to everyone and welcomes your ideas!

ILLUSTRATING INFINITY

ILLUSTRATING INFINITY

"When we think about infinity, I get the feeling that we see it all a bit like a bunch of
mathematicians looking around a single stone." *Chris Probert* (Harvard Magazine)
