Math Circle, Northeastern

Theorem of Thaethetus

there is no picture of
Thaethetus. This is Plato

There are 5 platonic
solids in 3D

duality: switch faces and vertices

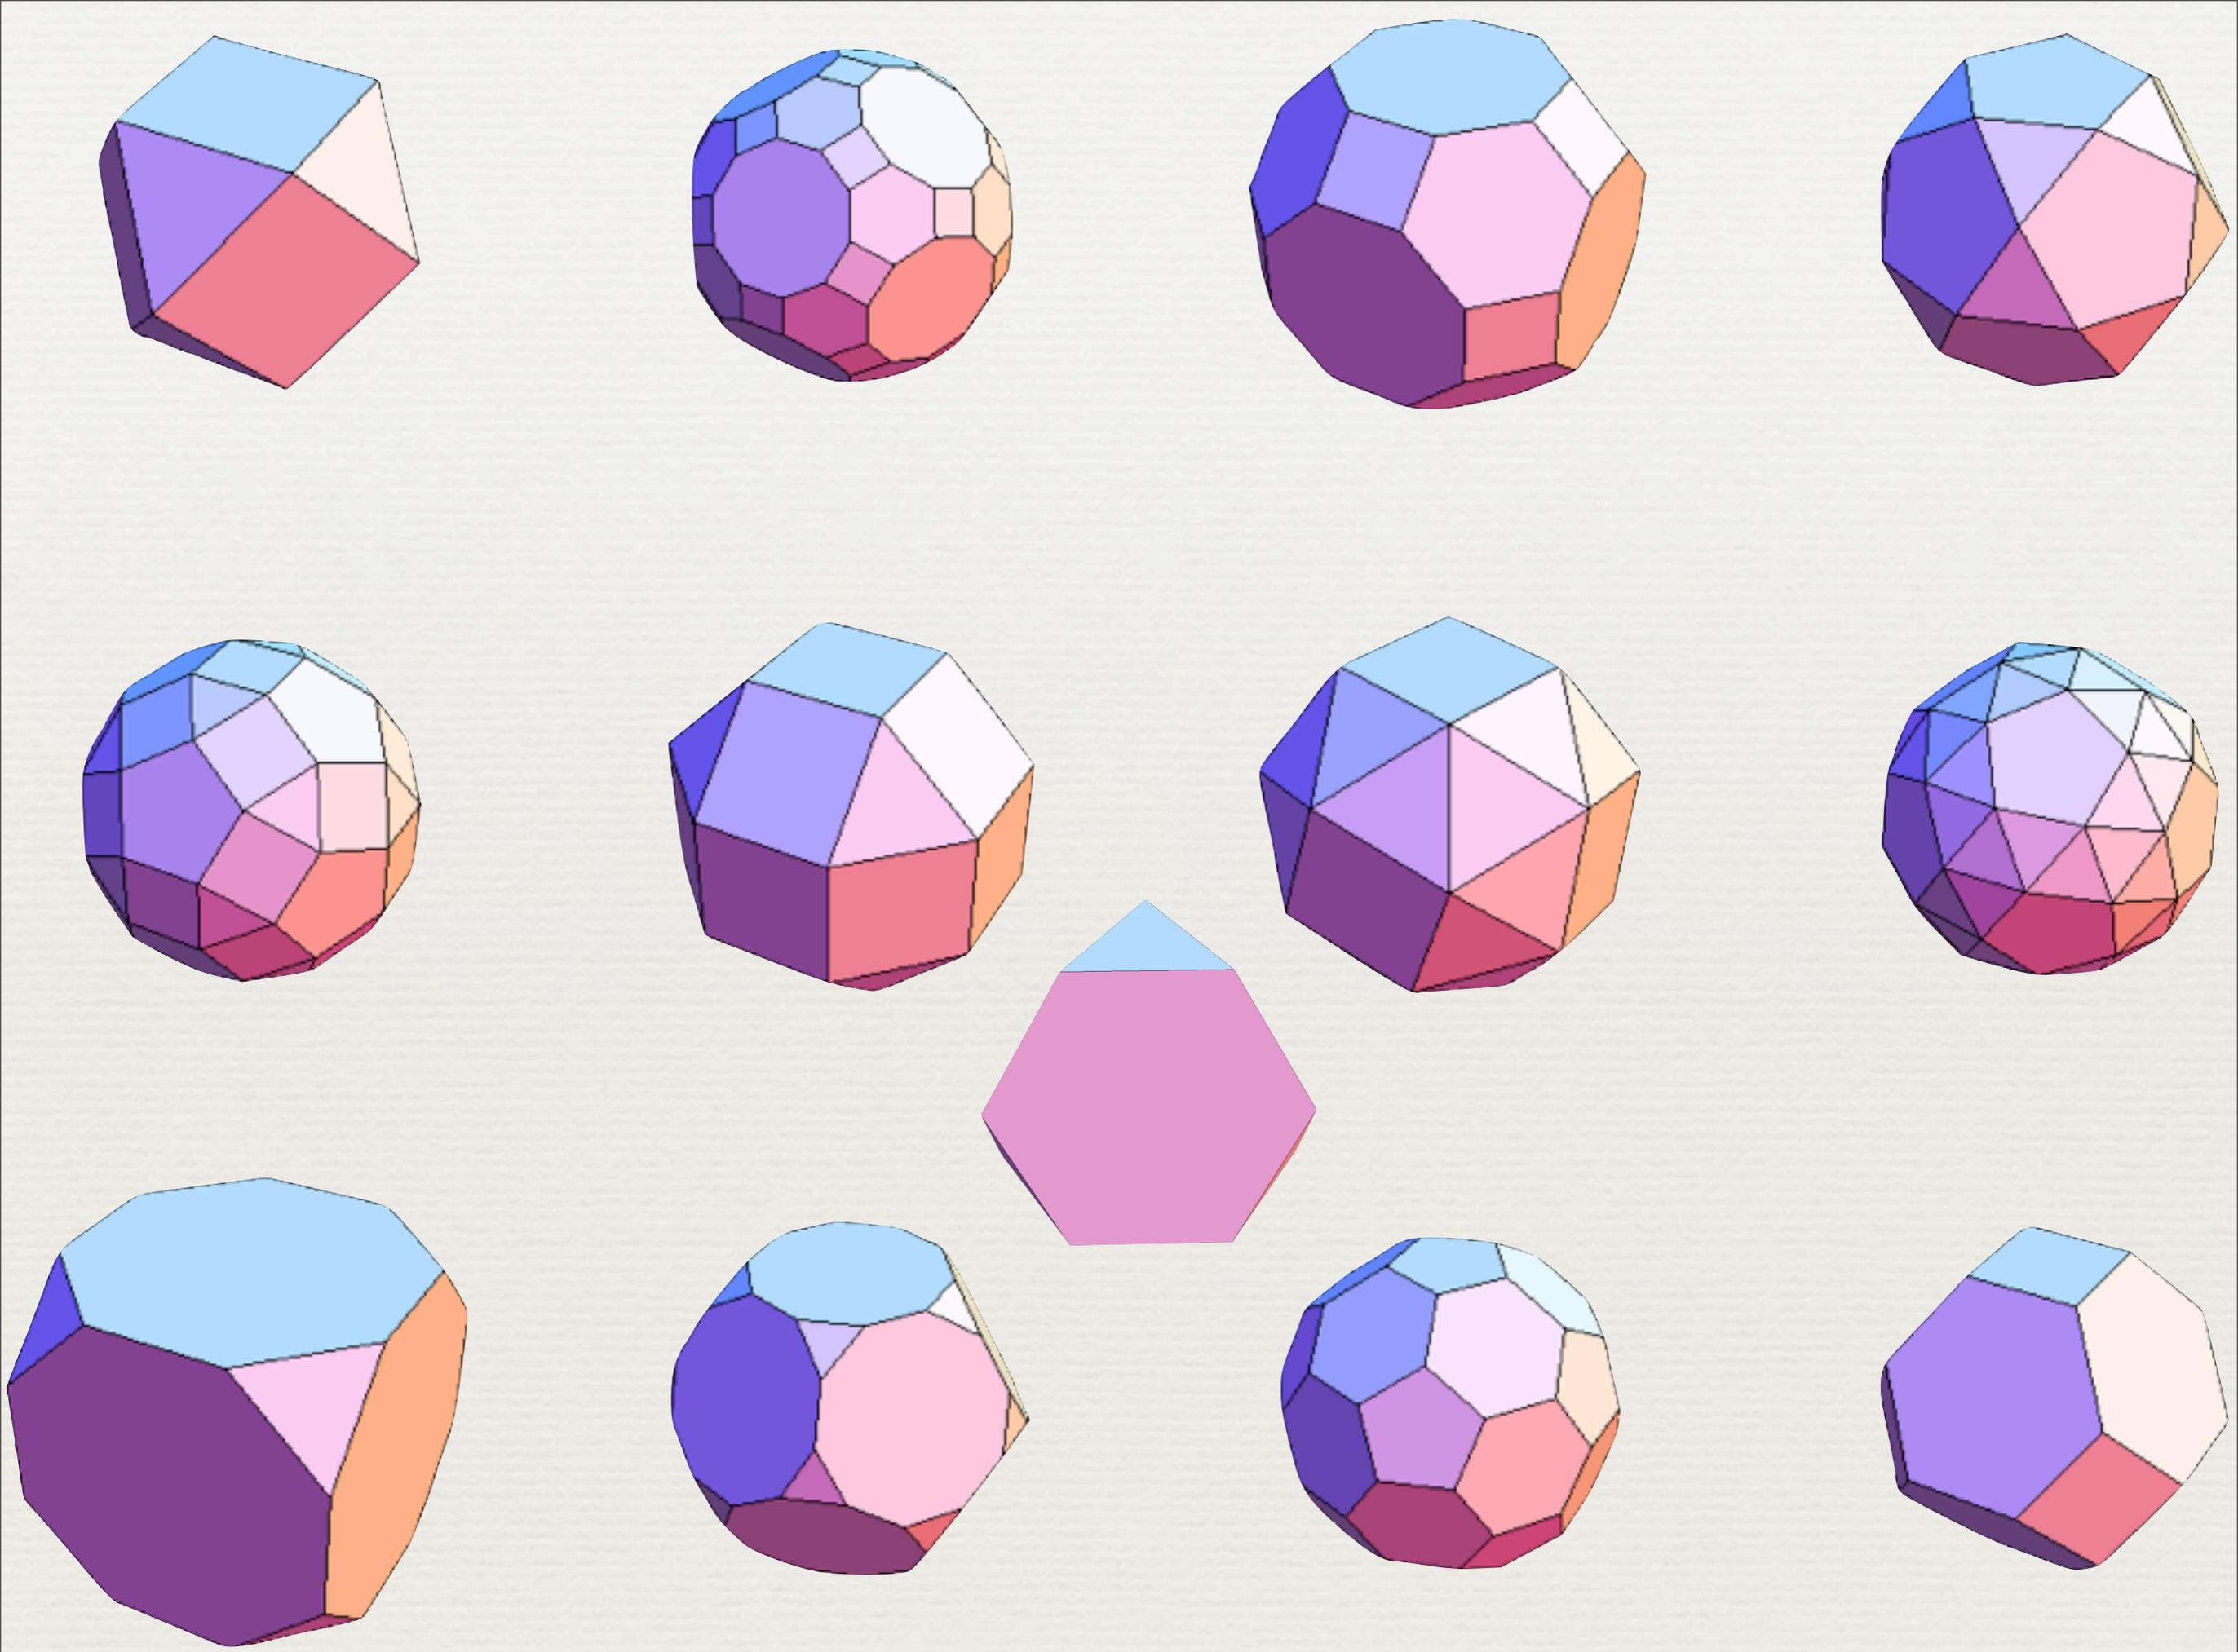

Theorem of Kepler

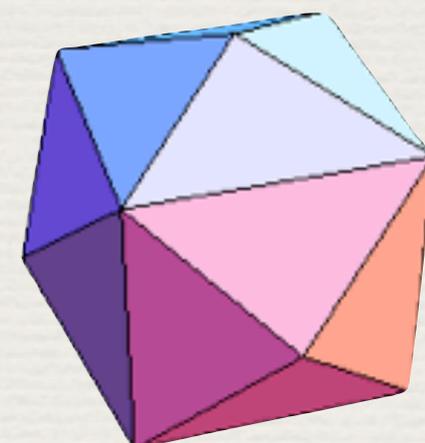

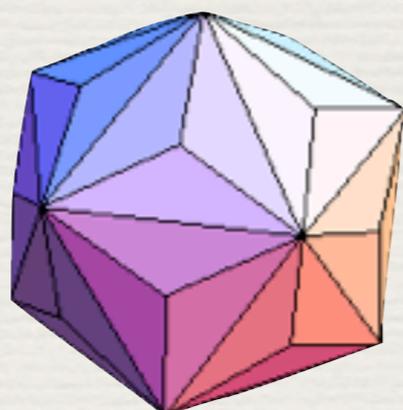

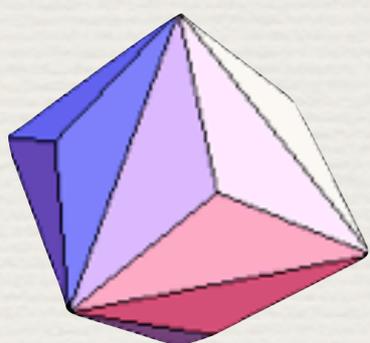

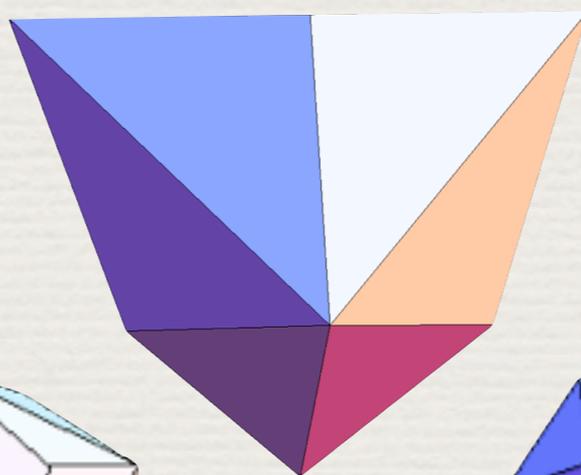

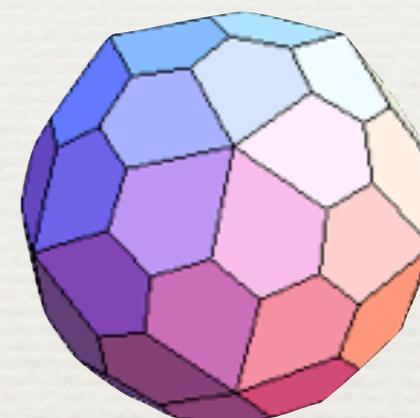

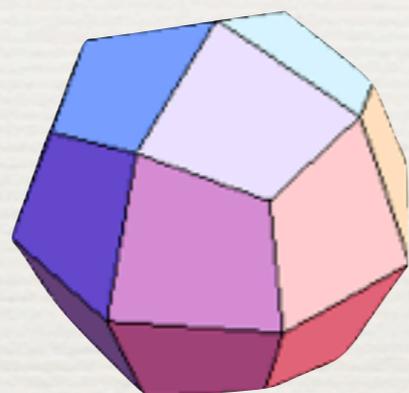

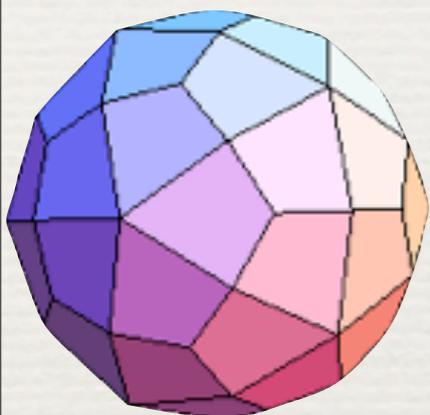

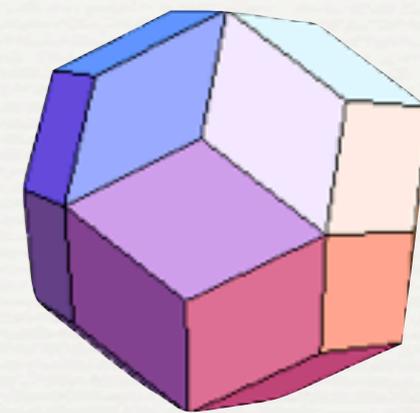

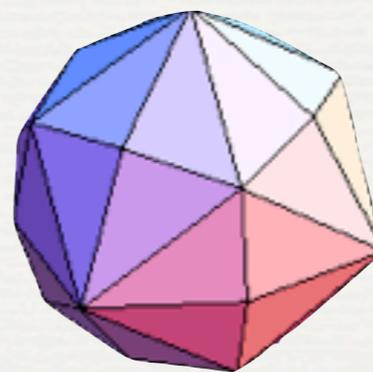

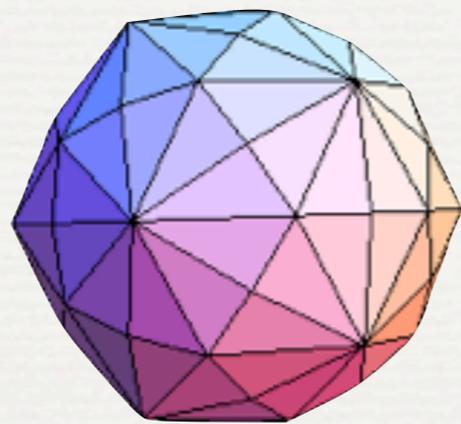

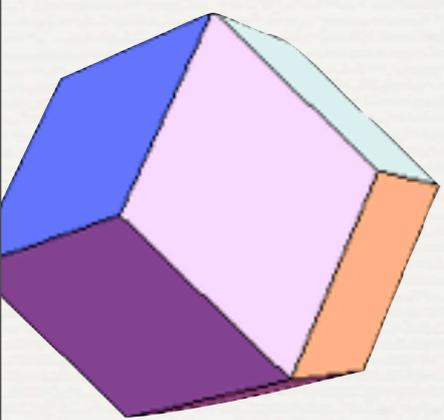

Archimedes
and Kepler

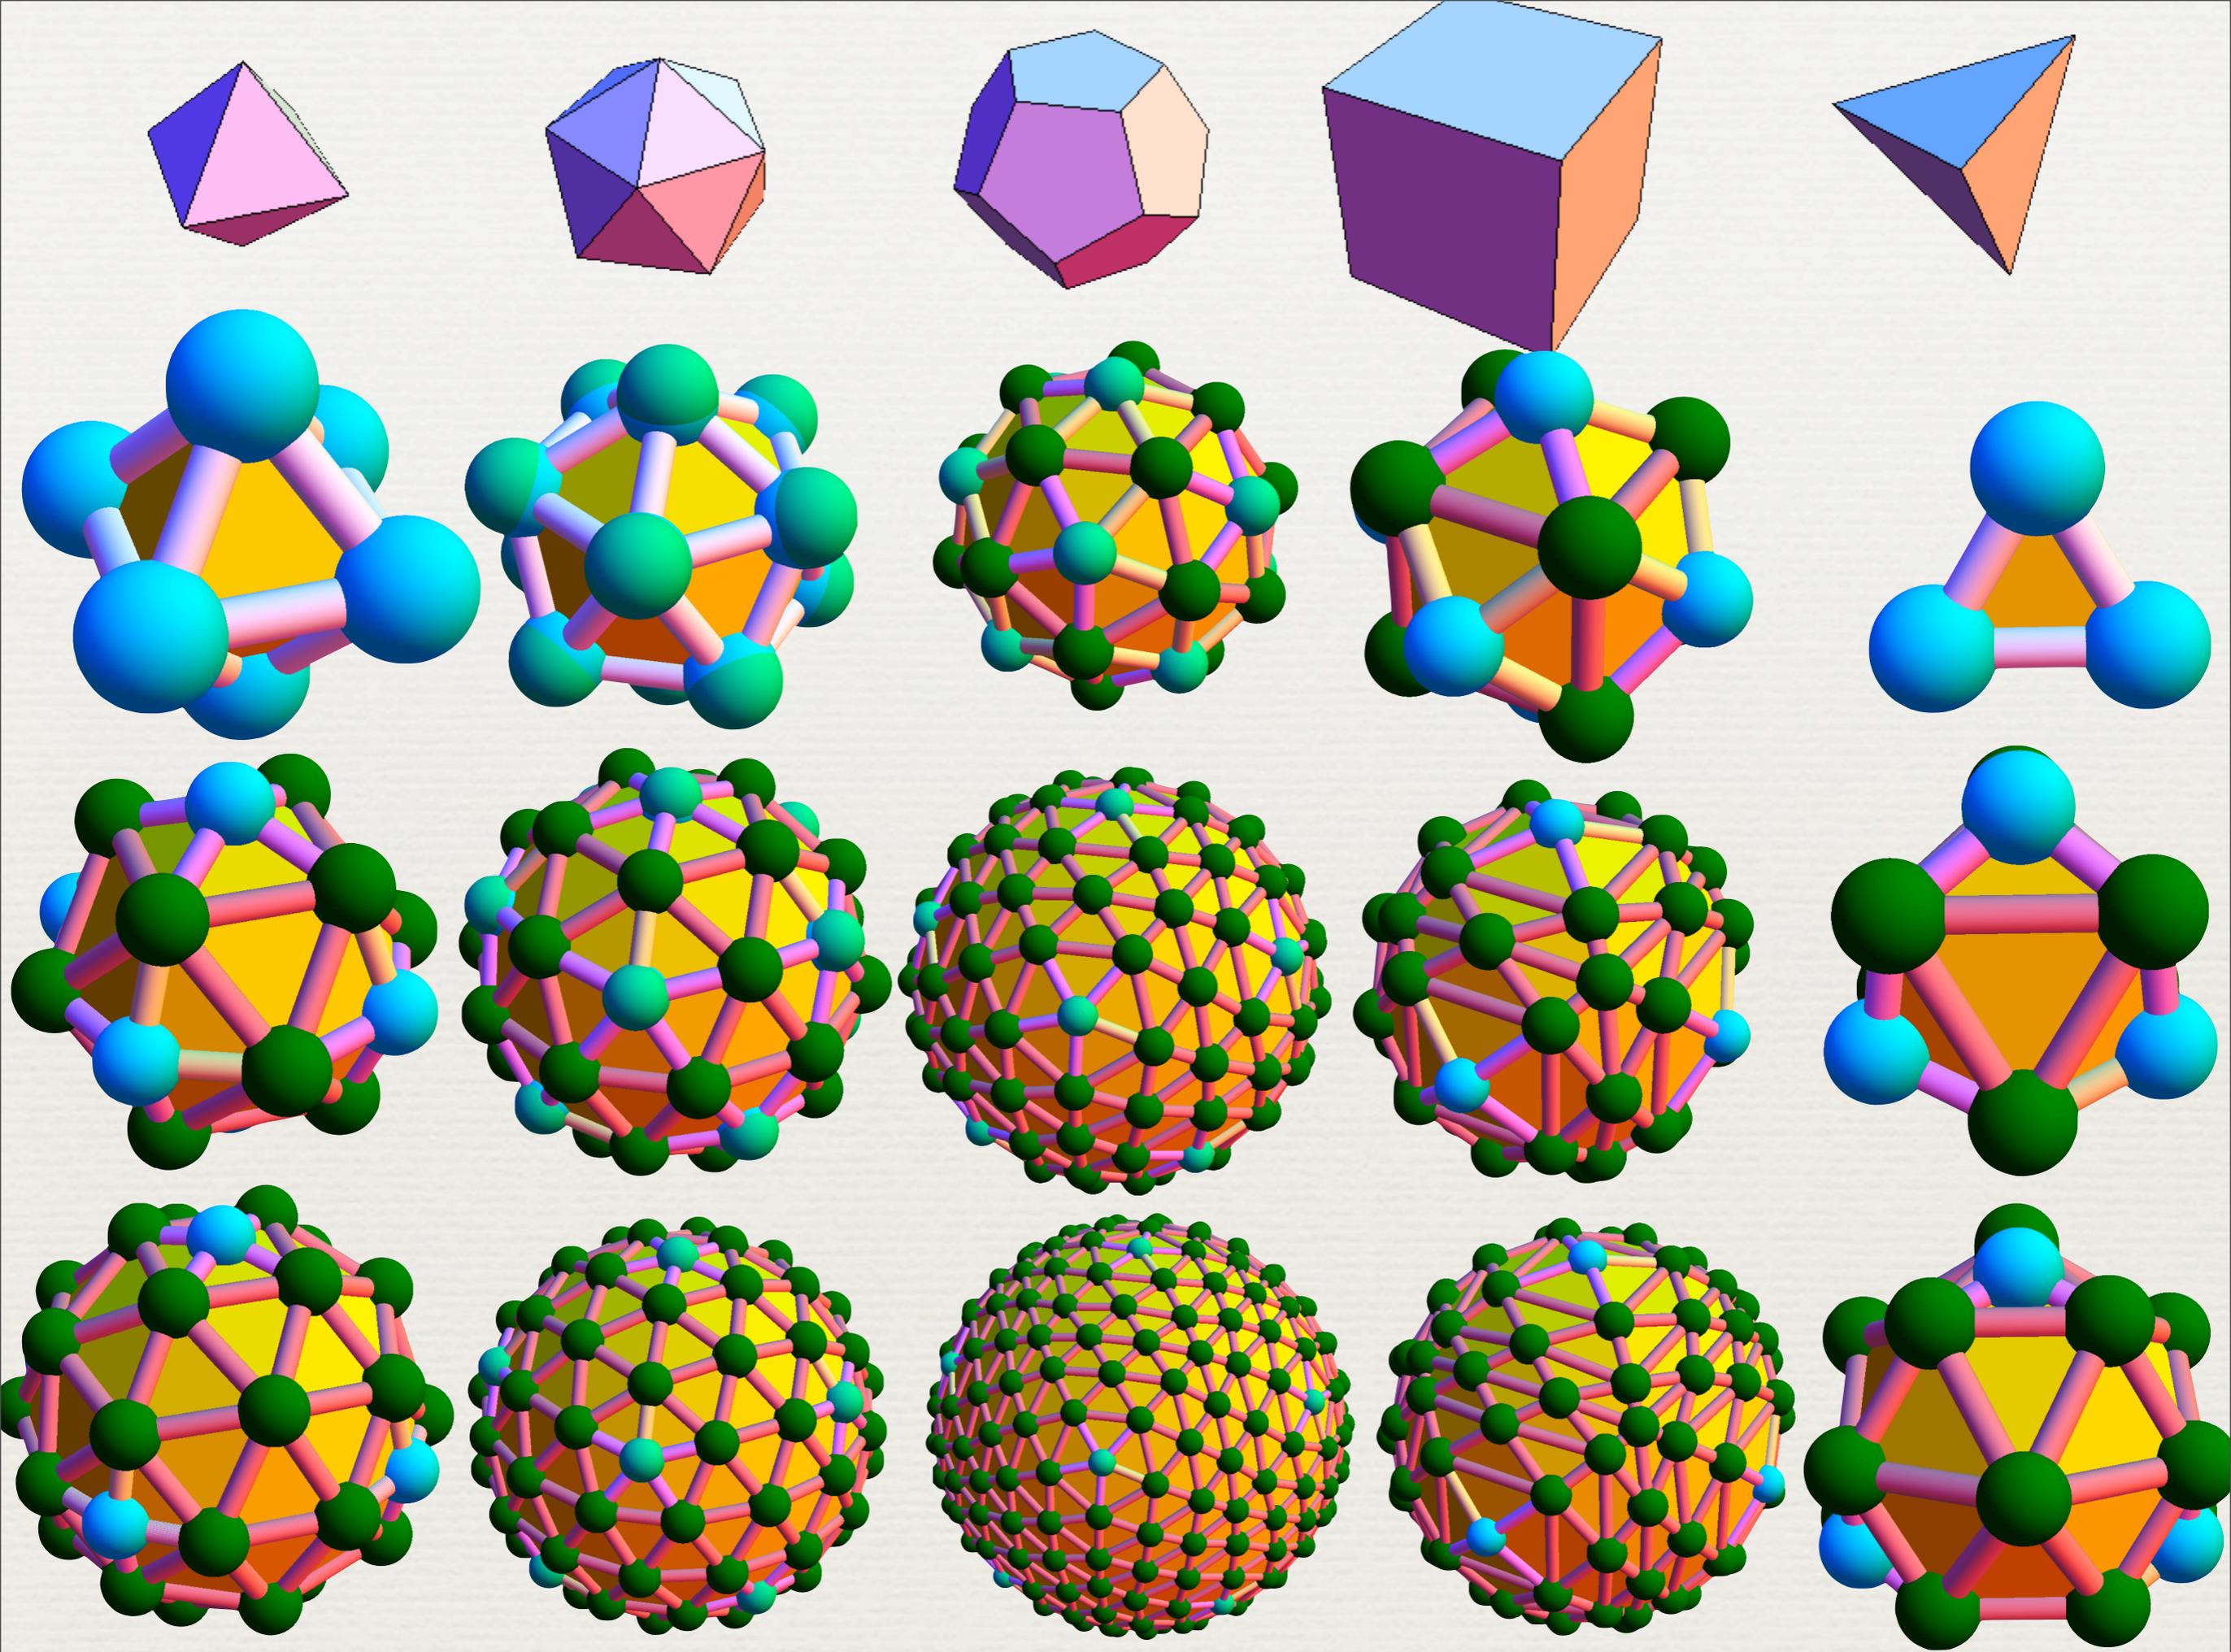

There are 13
Archimedean solids in 3D

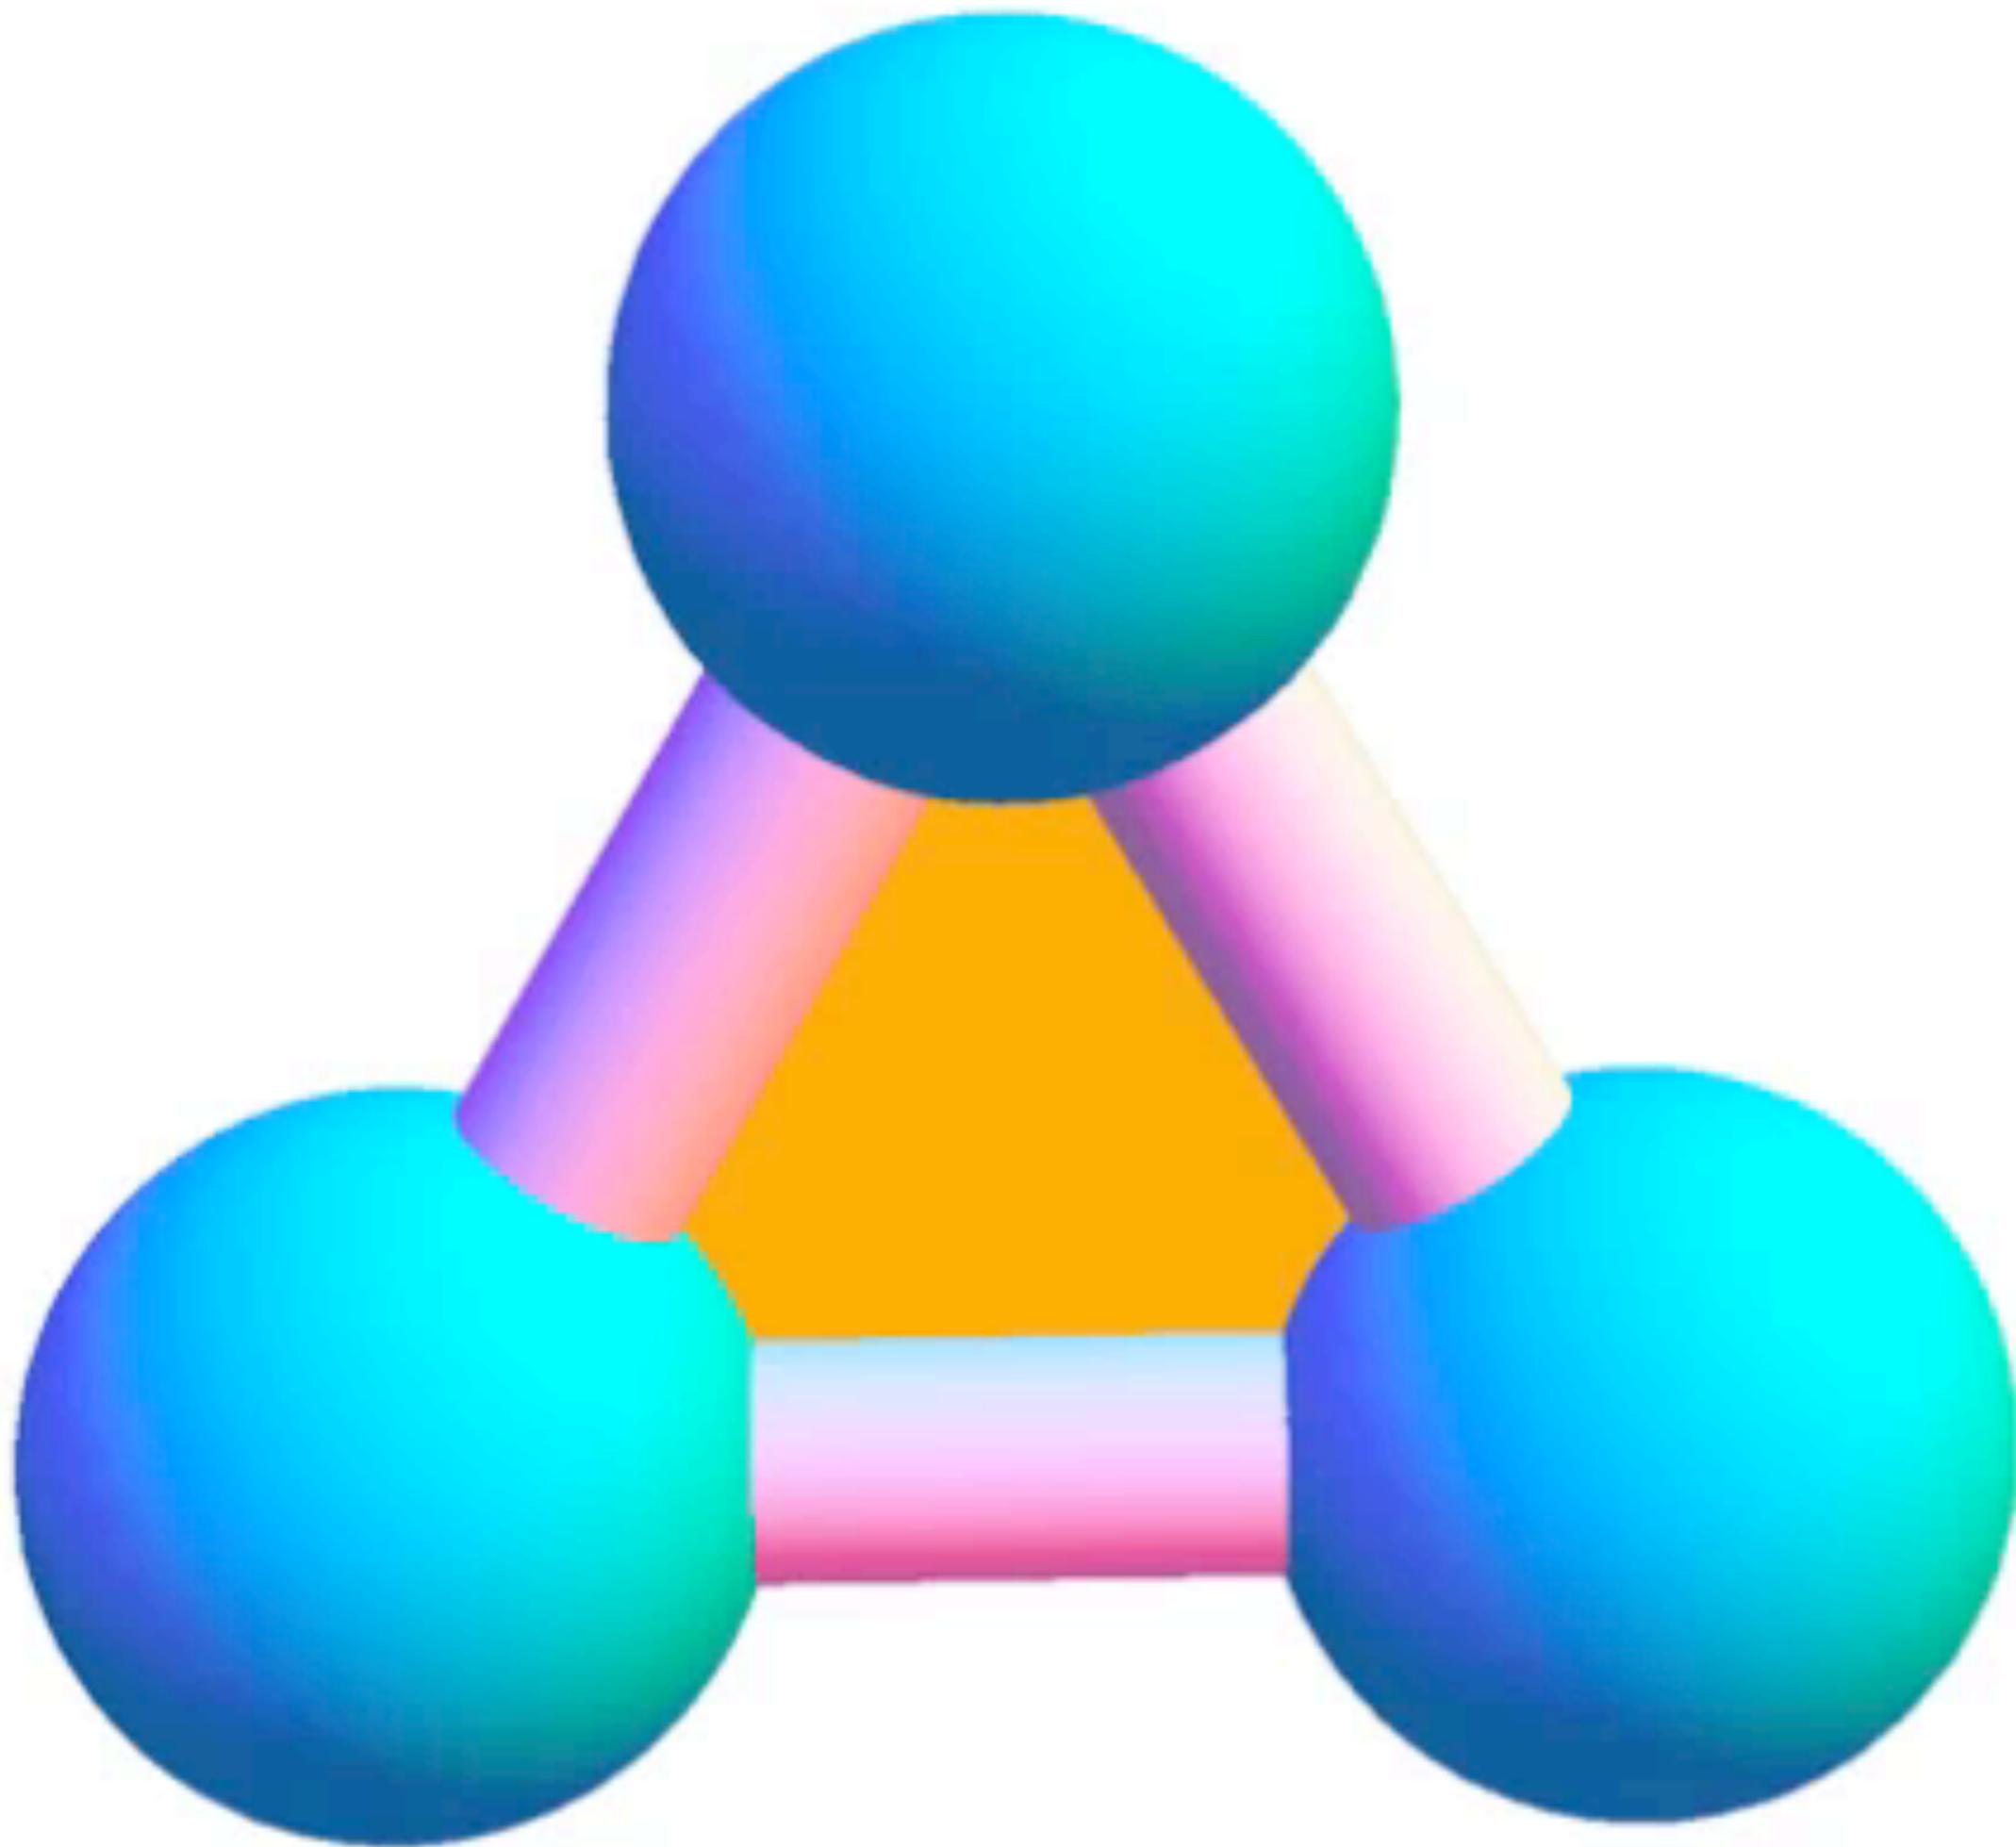

Archimedean: convex, with
tetrahedral, octahedral or
icosahedral symmetry.

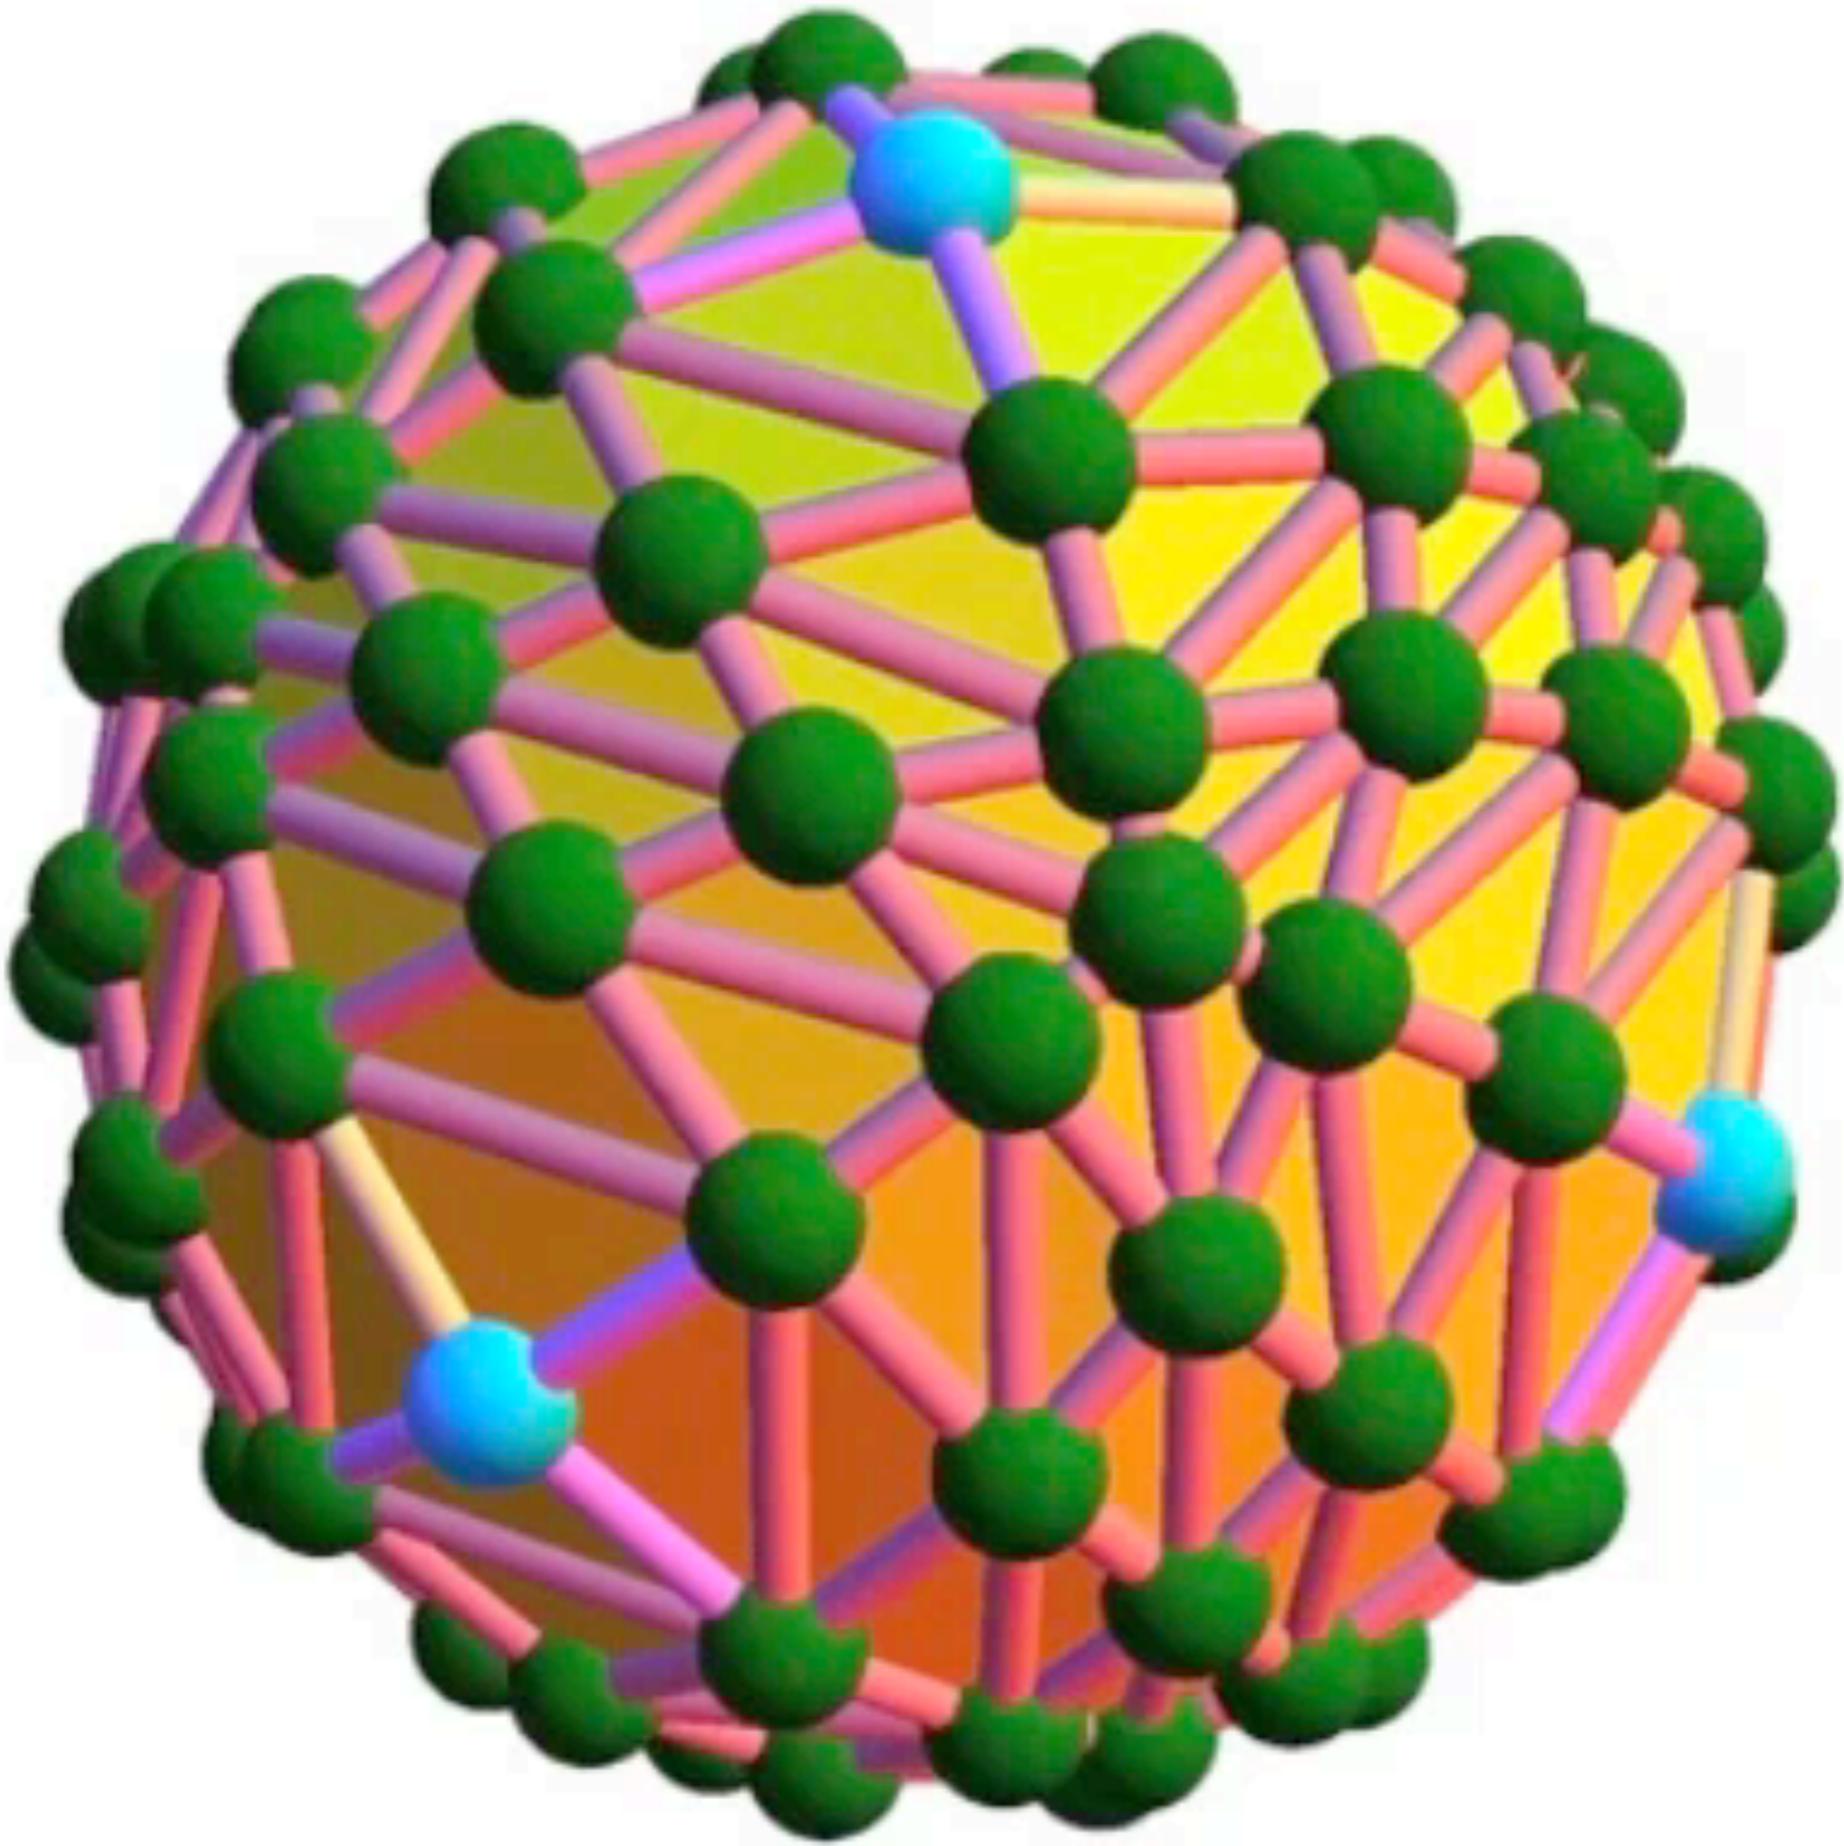

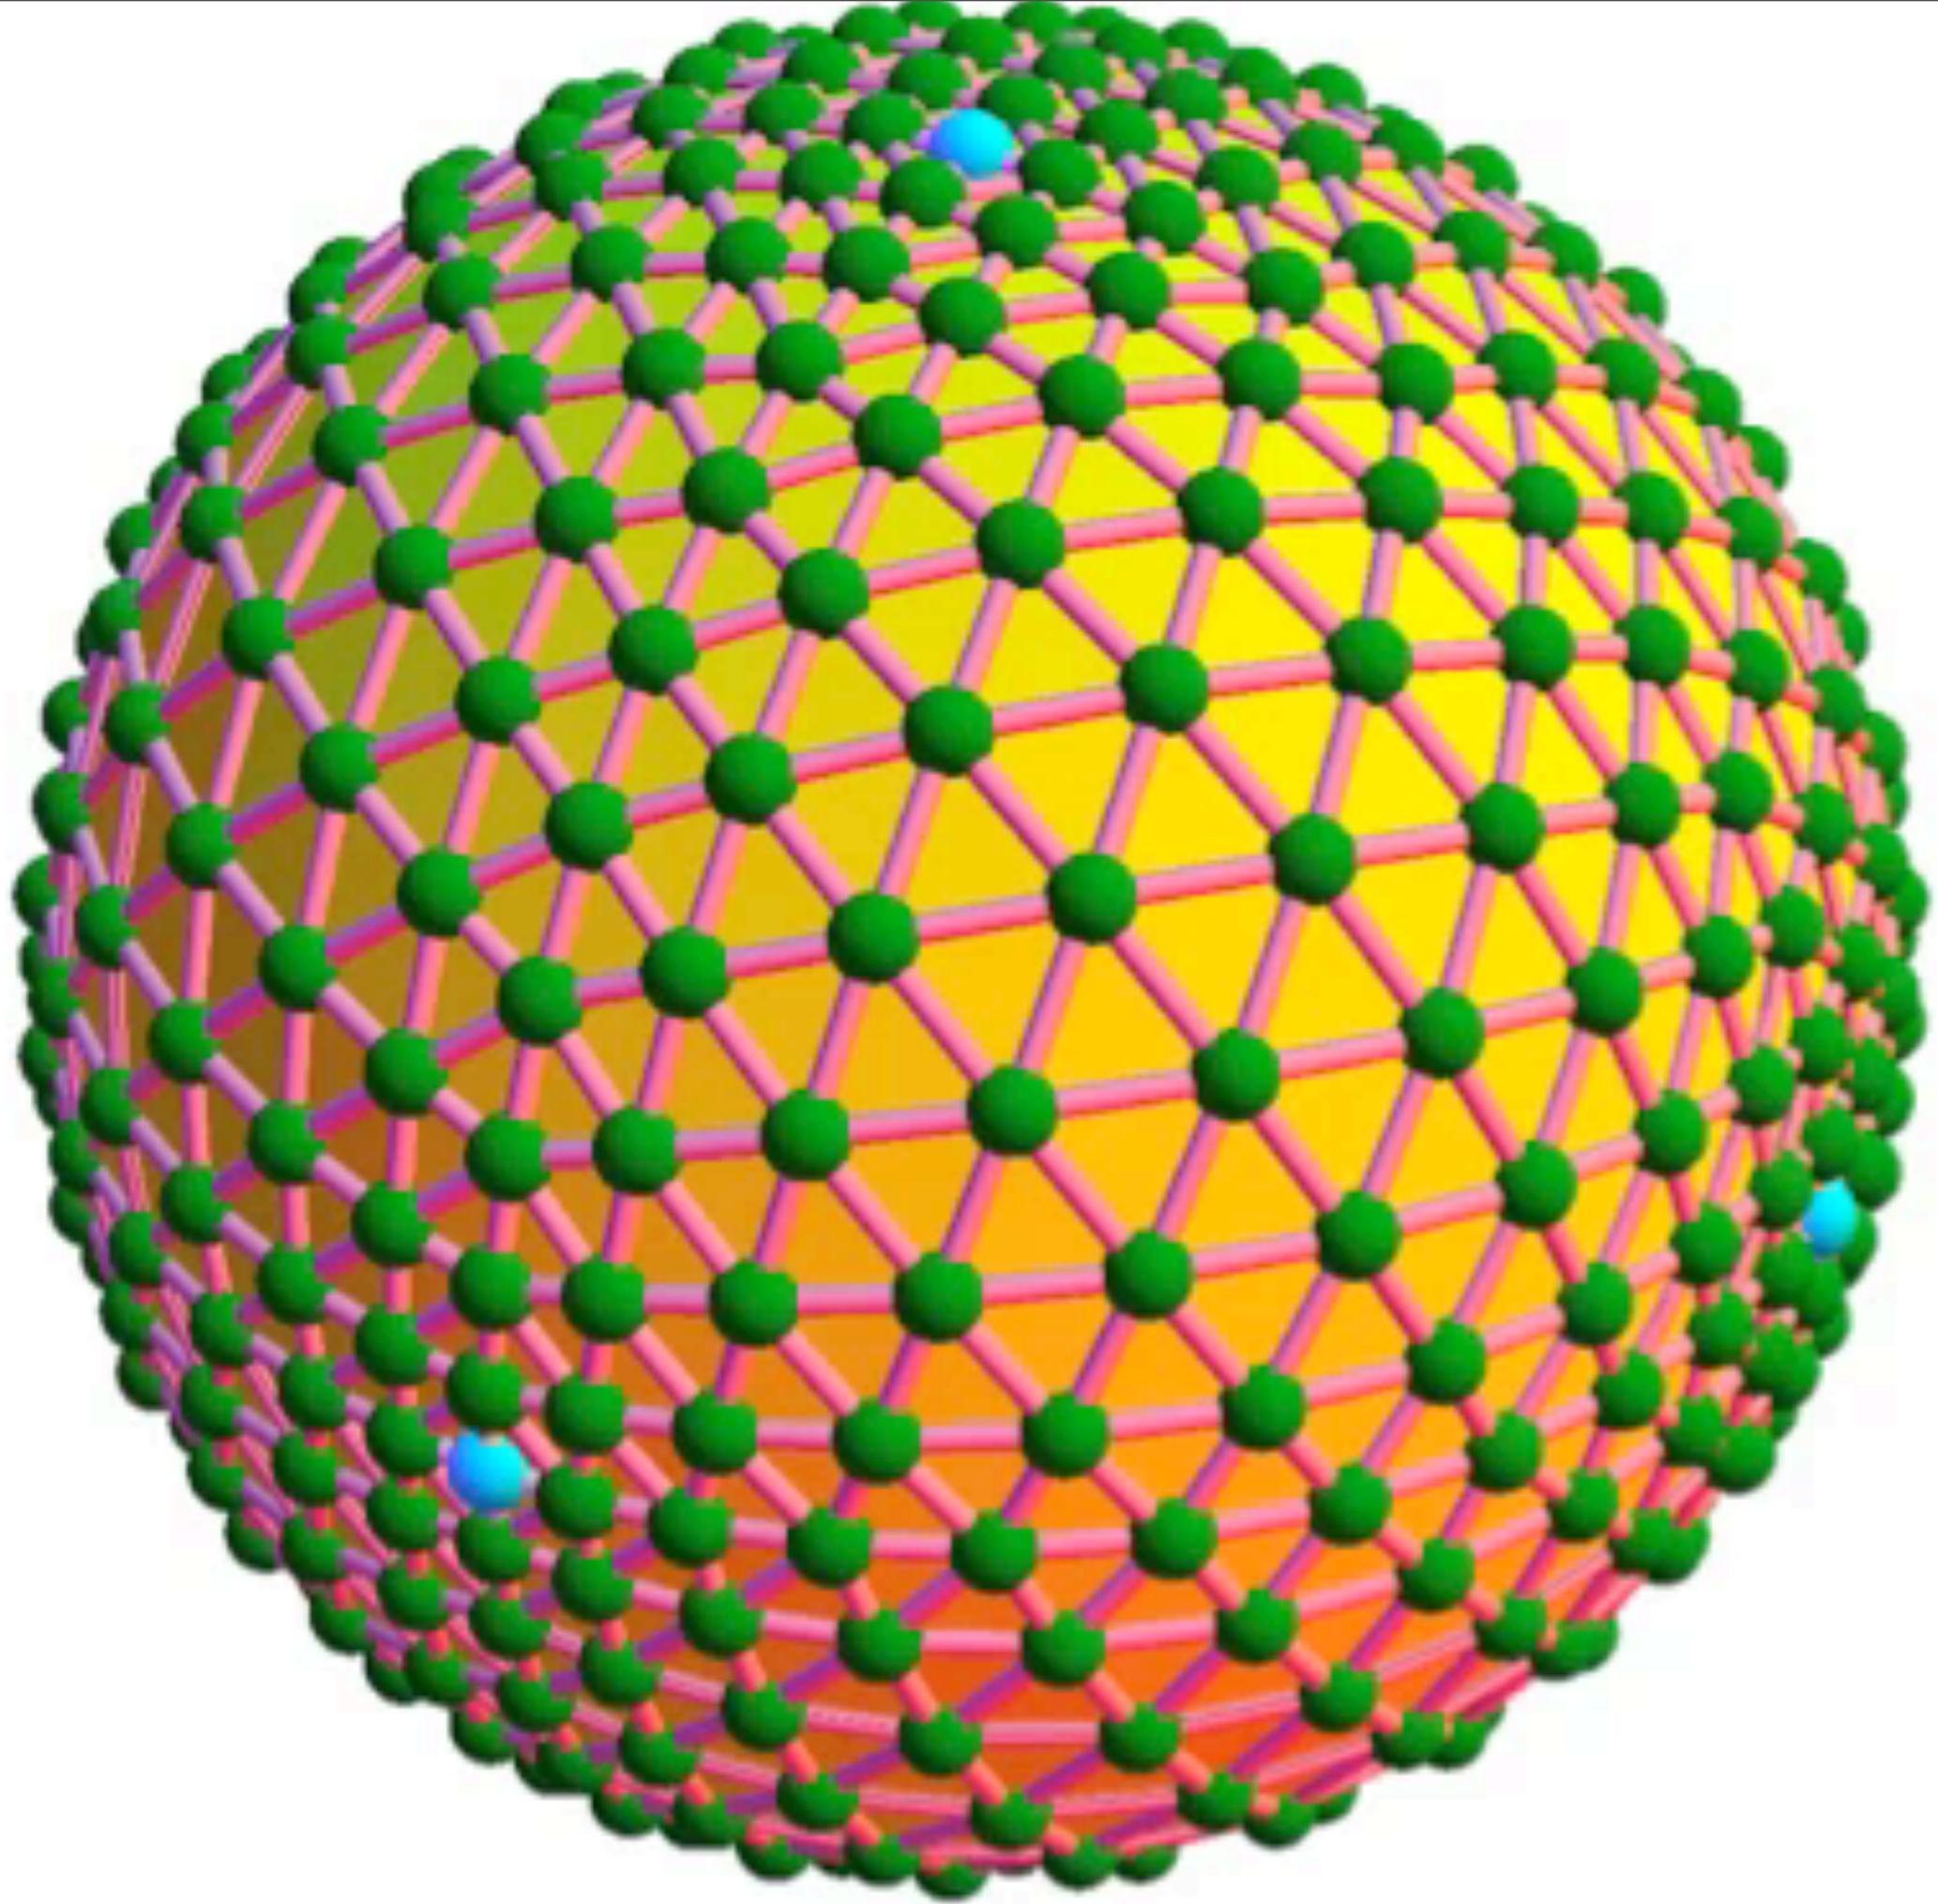

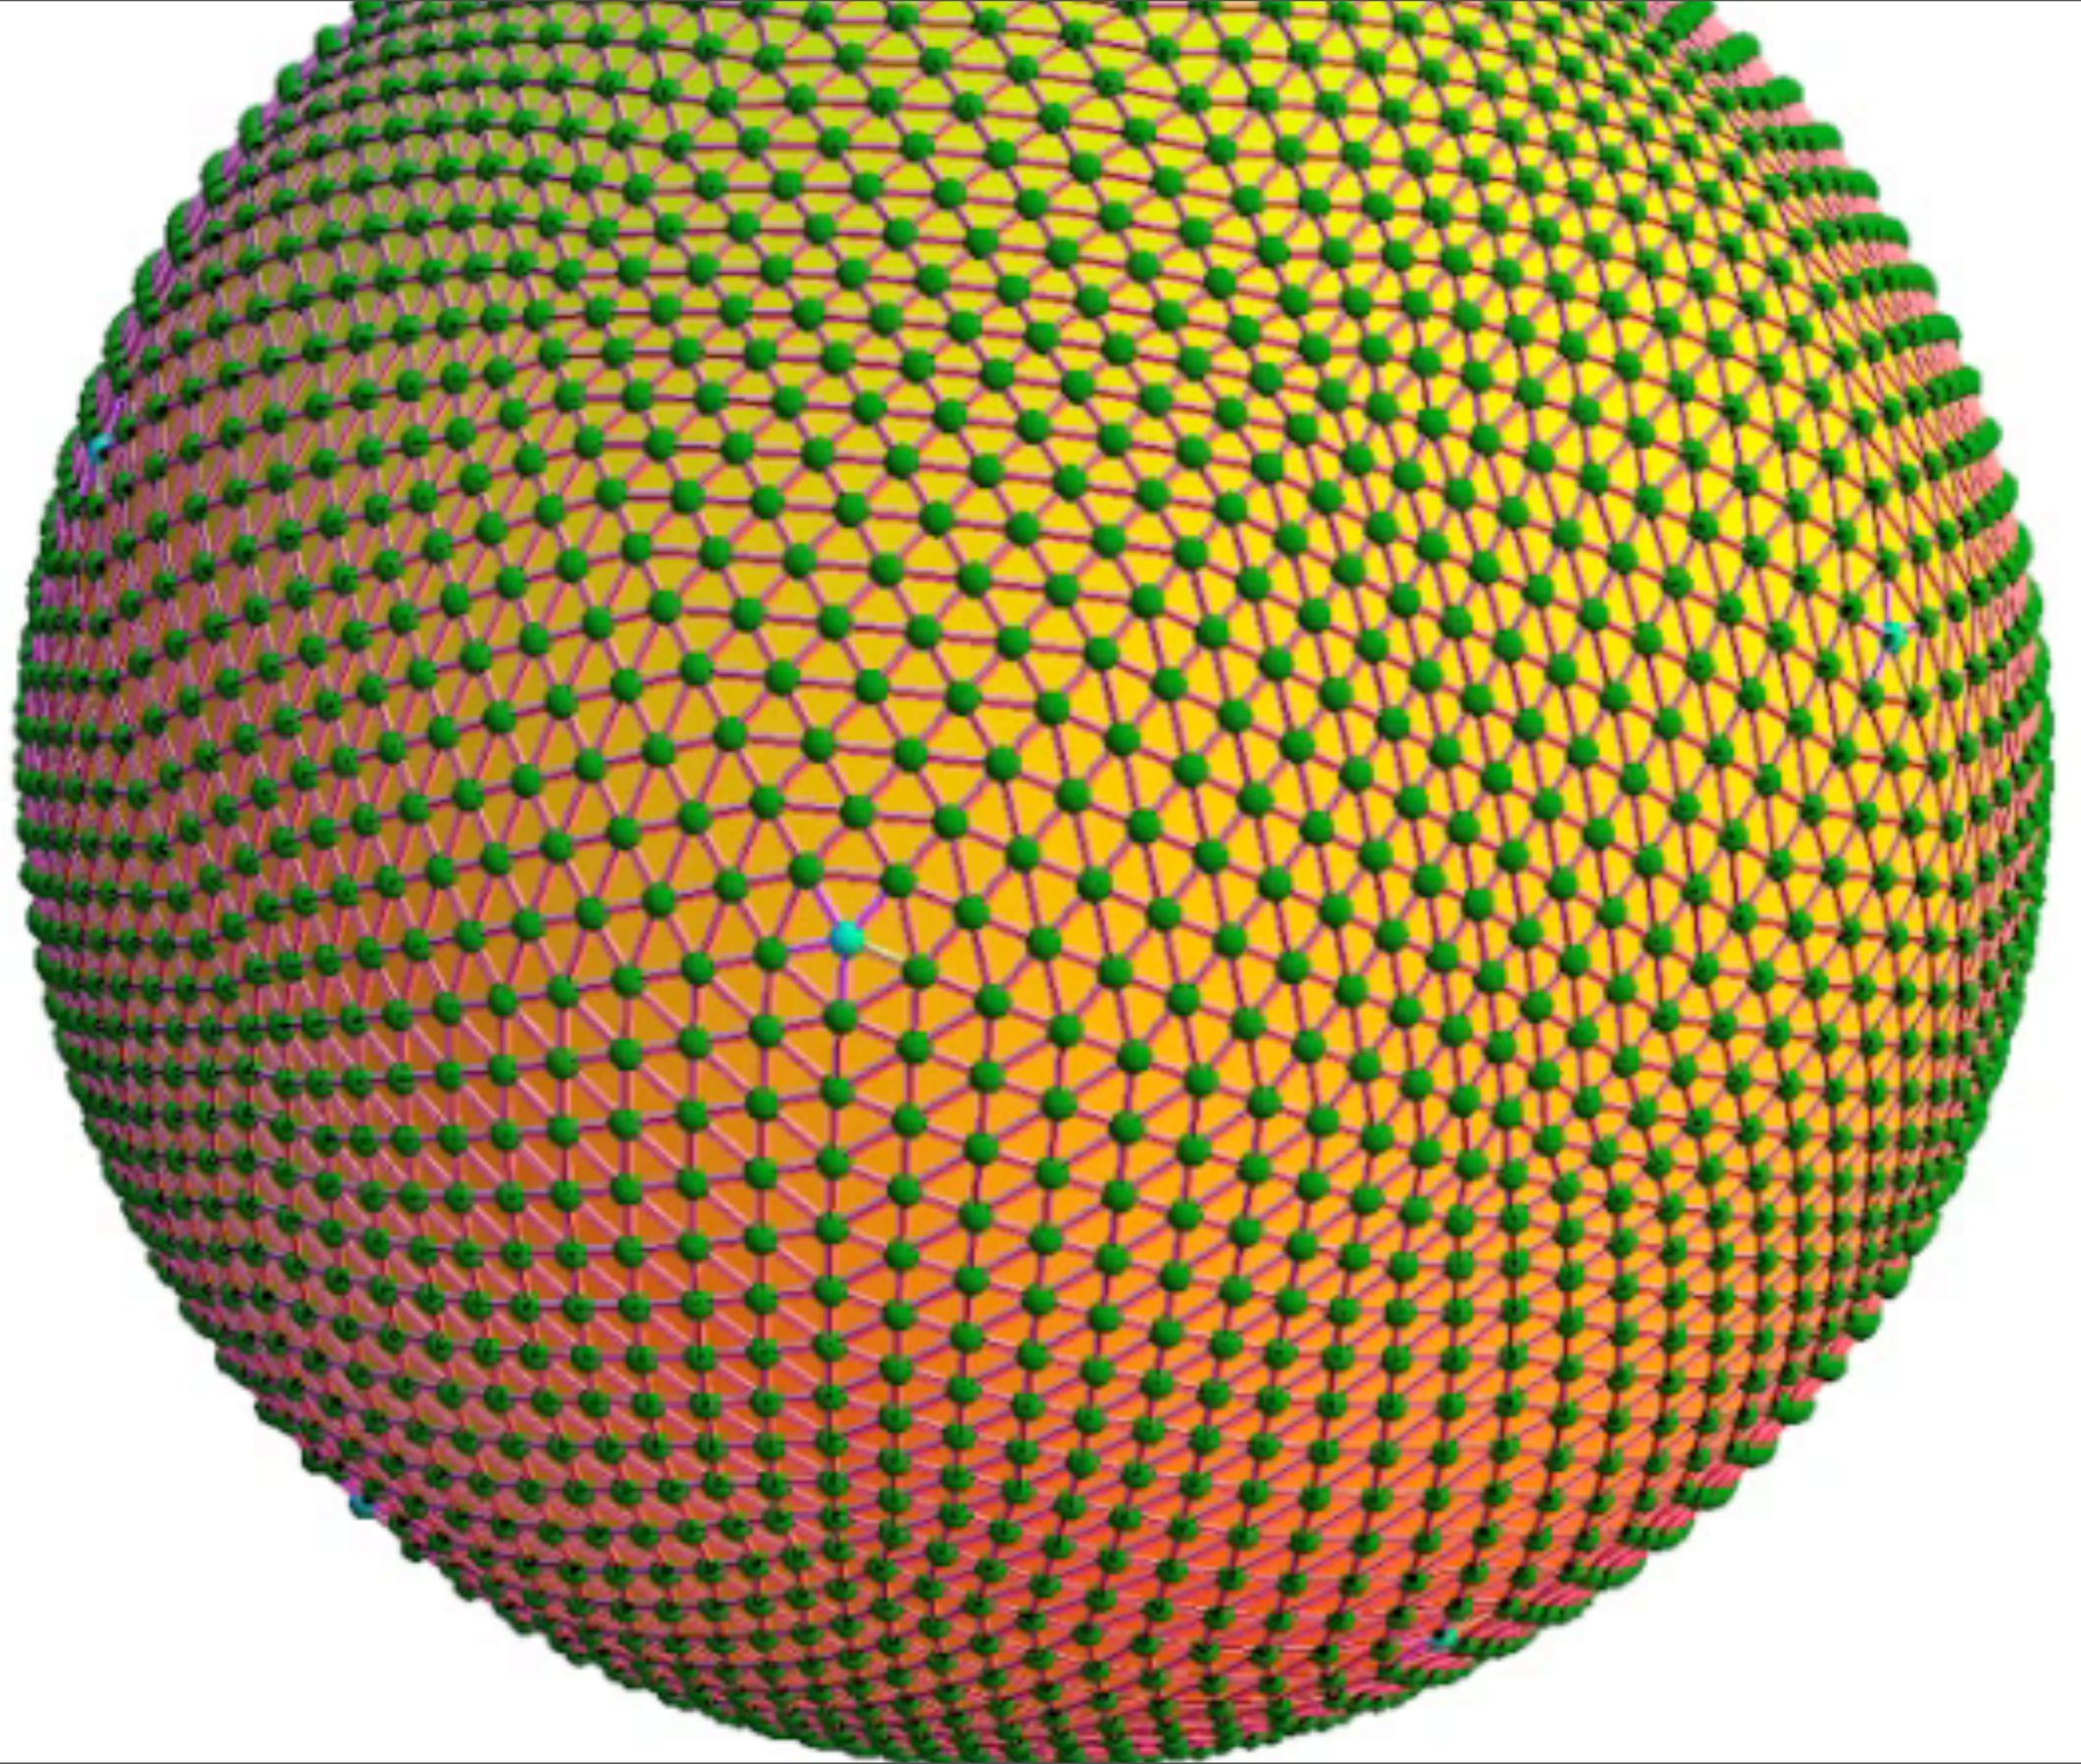

Triangulate

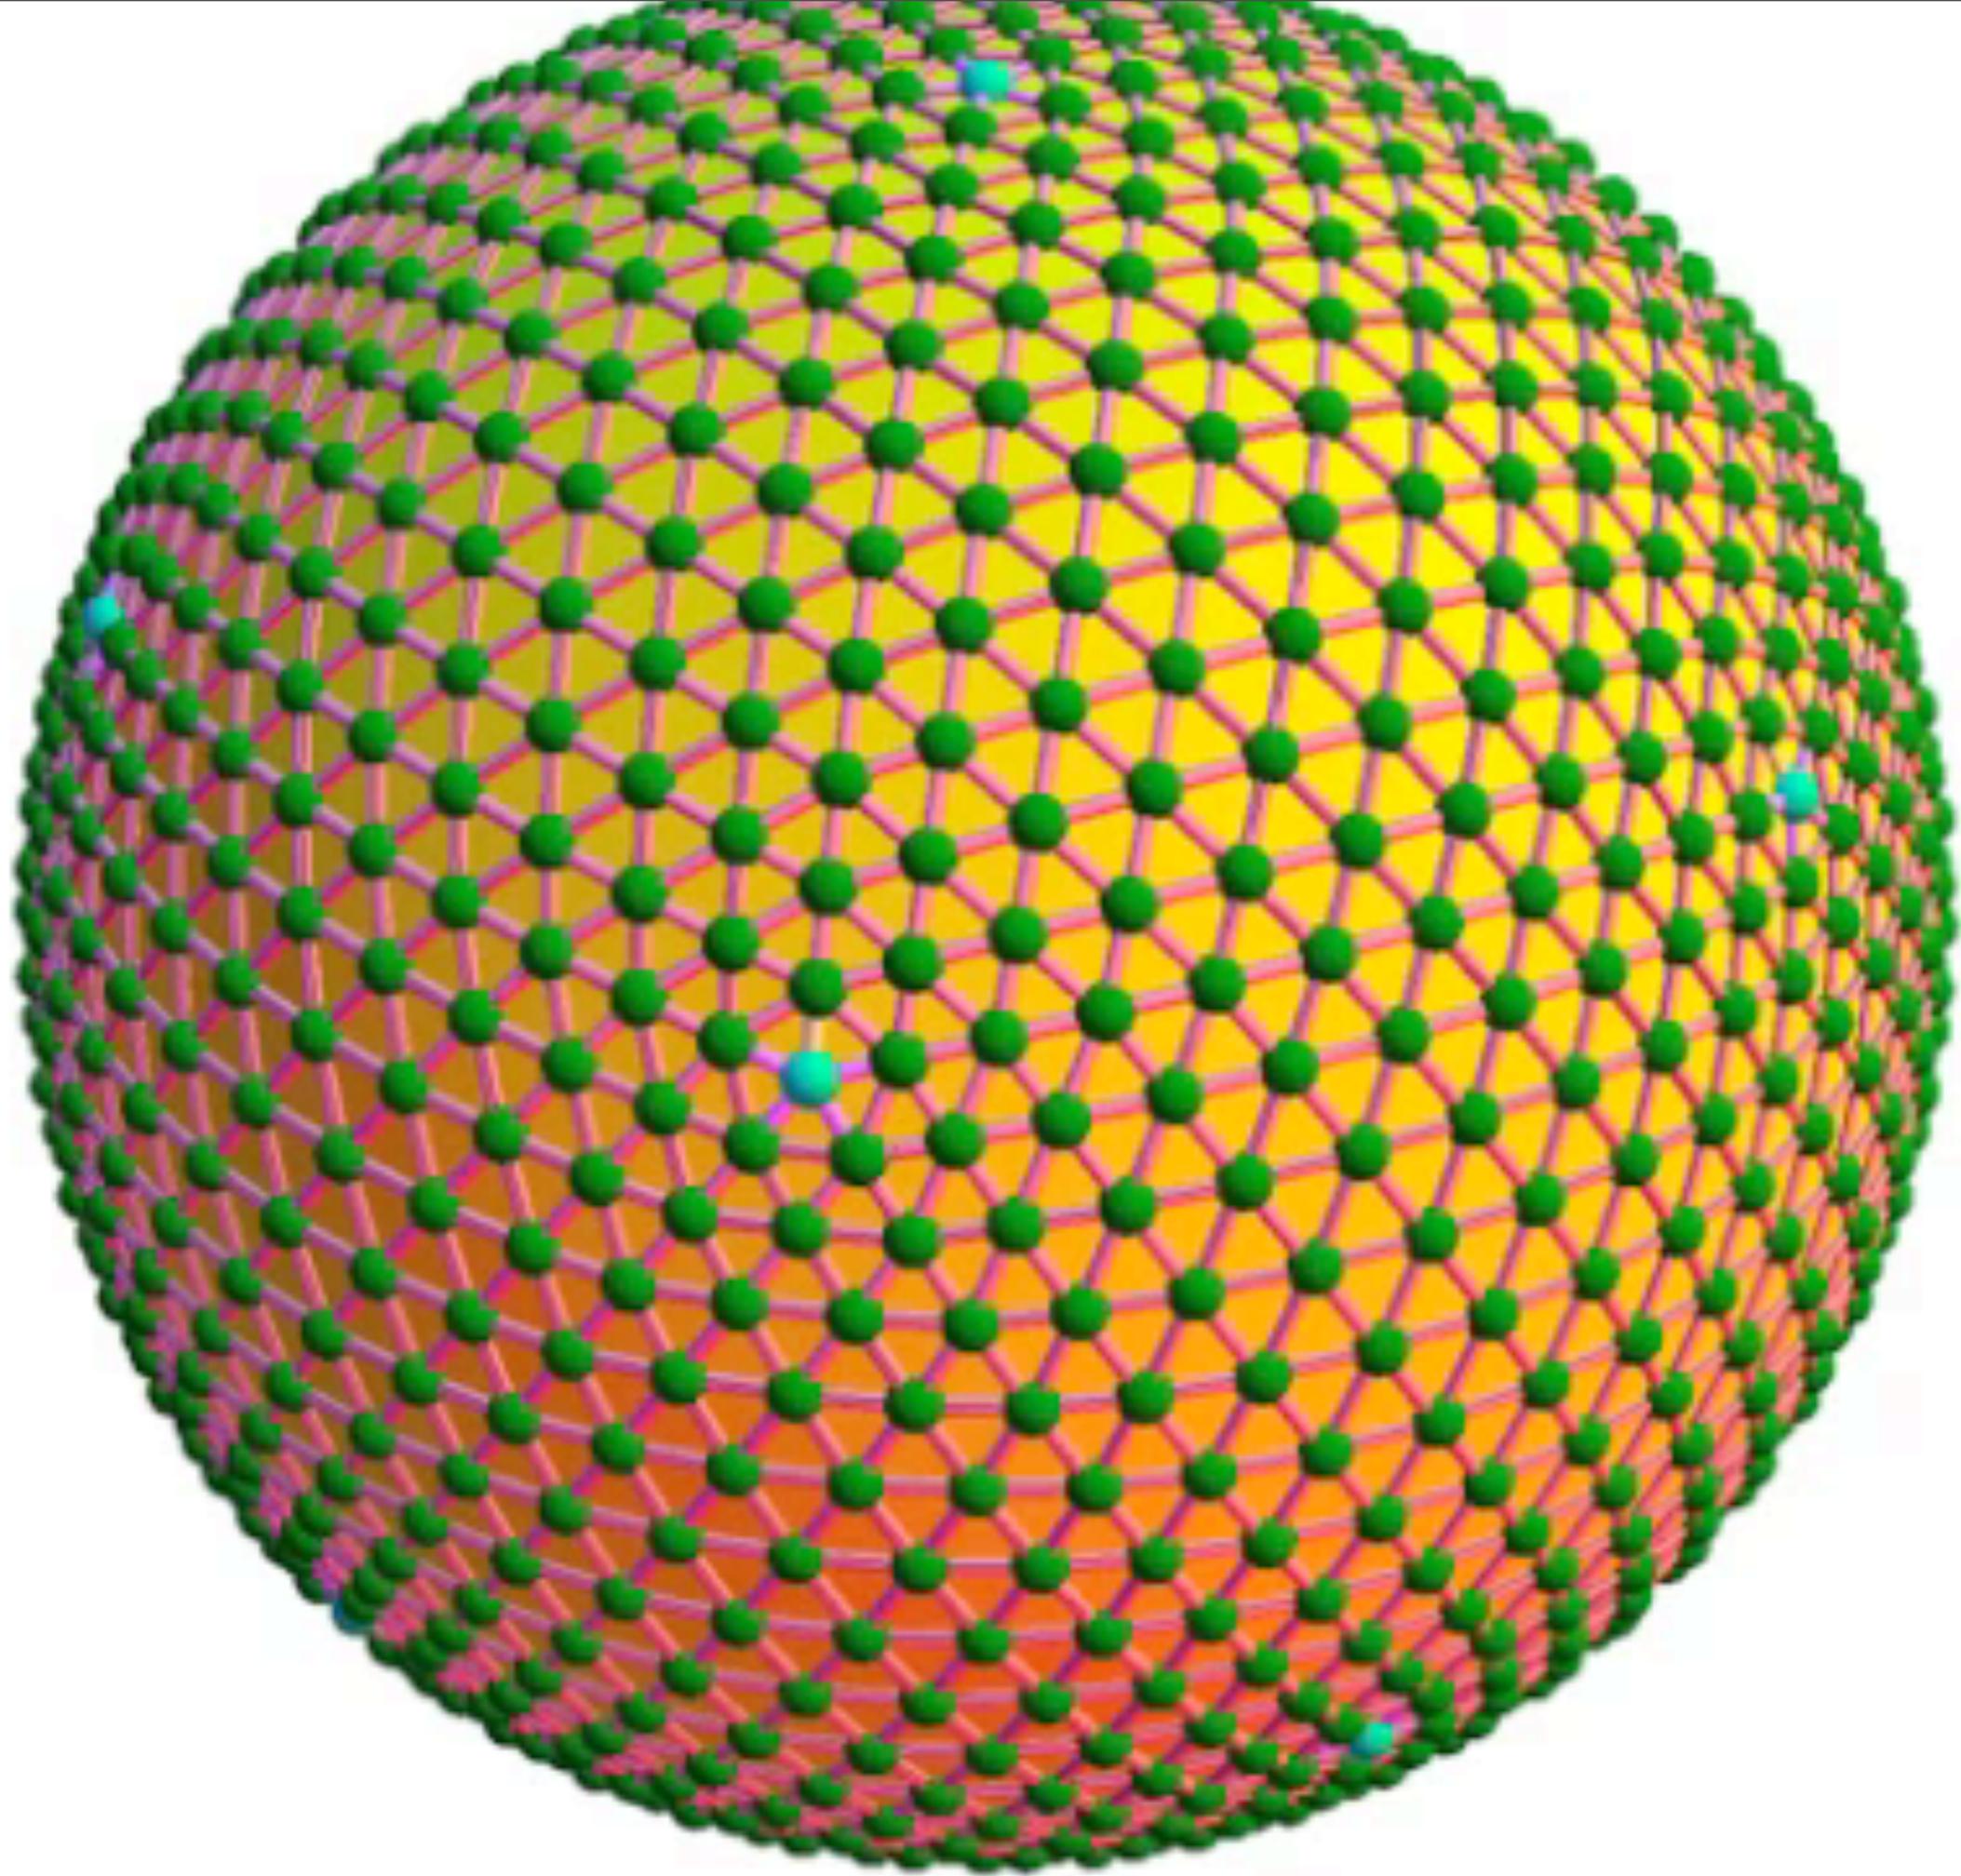

Euler's Gem

$$v - e + f = 2$$

(convex polyhedron)

v: number of vertices
e: number of edges
f: number of faces

v	e	f
4	6	4
6	12	8
8	12	6
12	30	20
20	30	12

80 Uniform Polyhedra

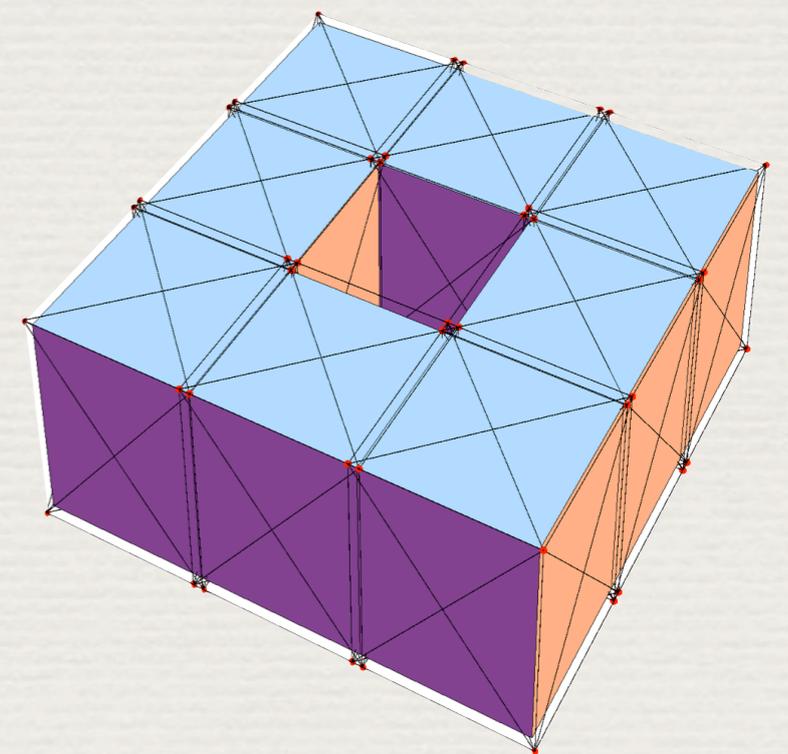

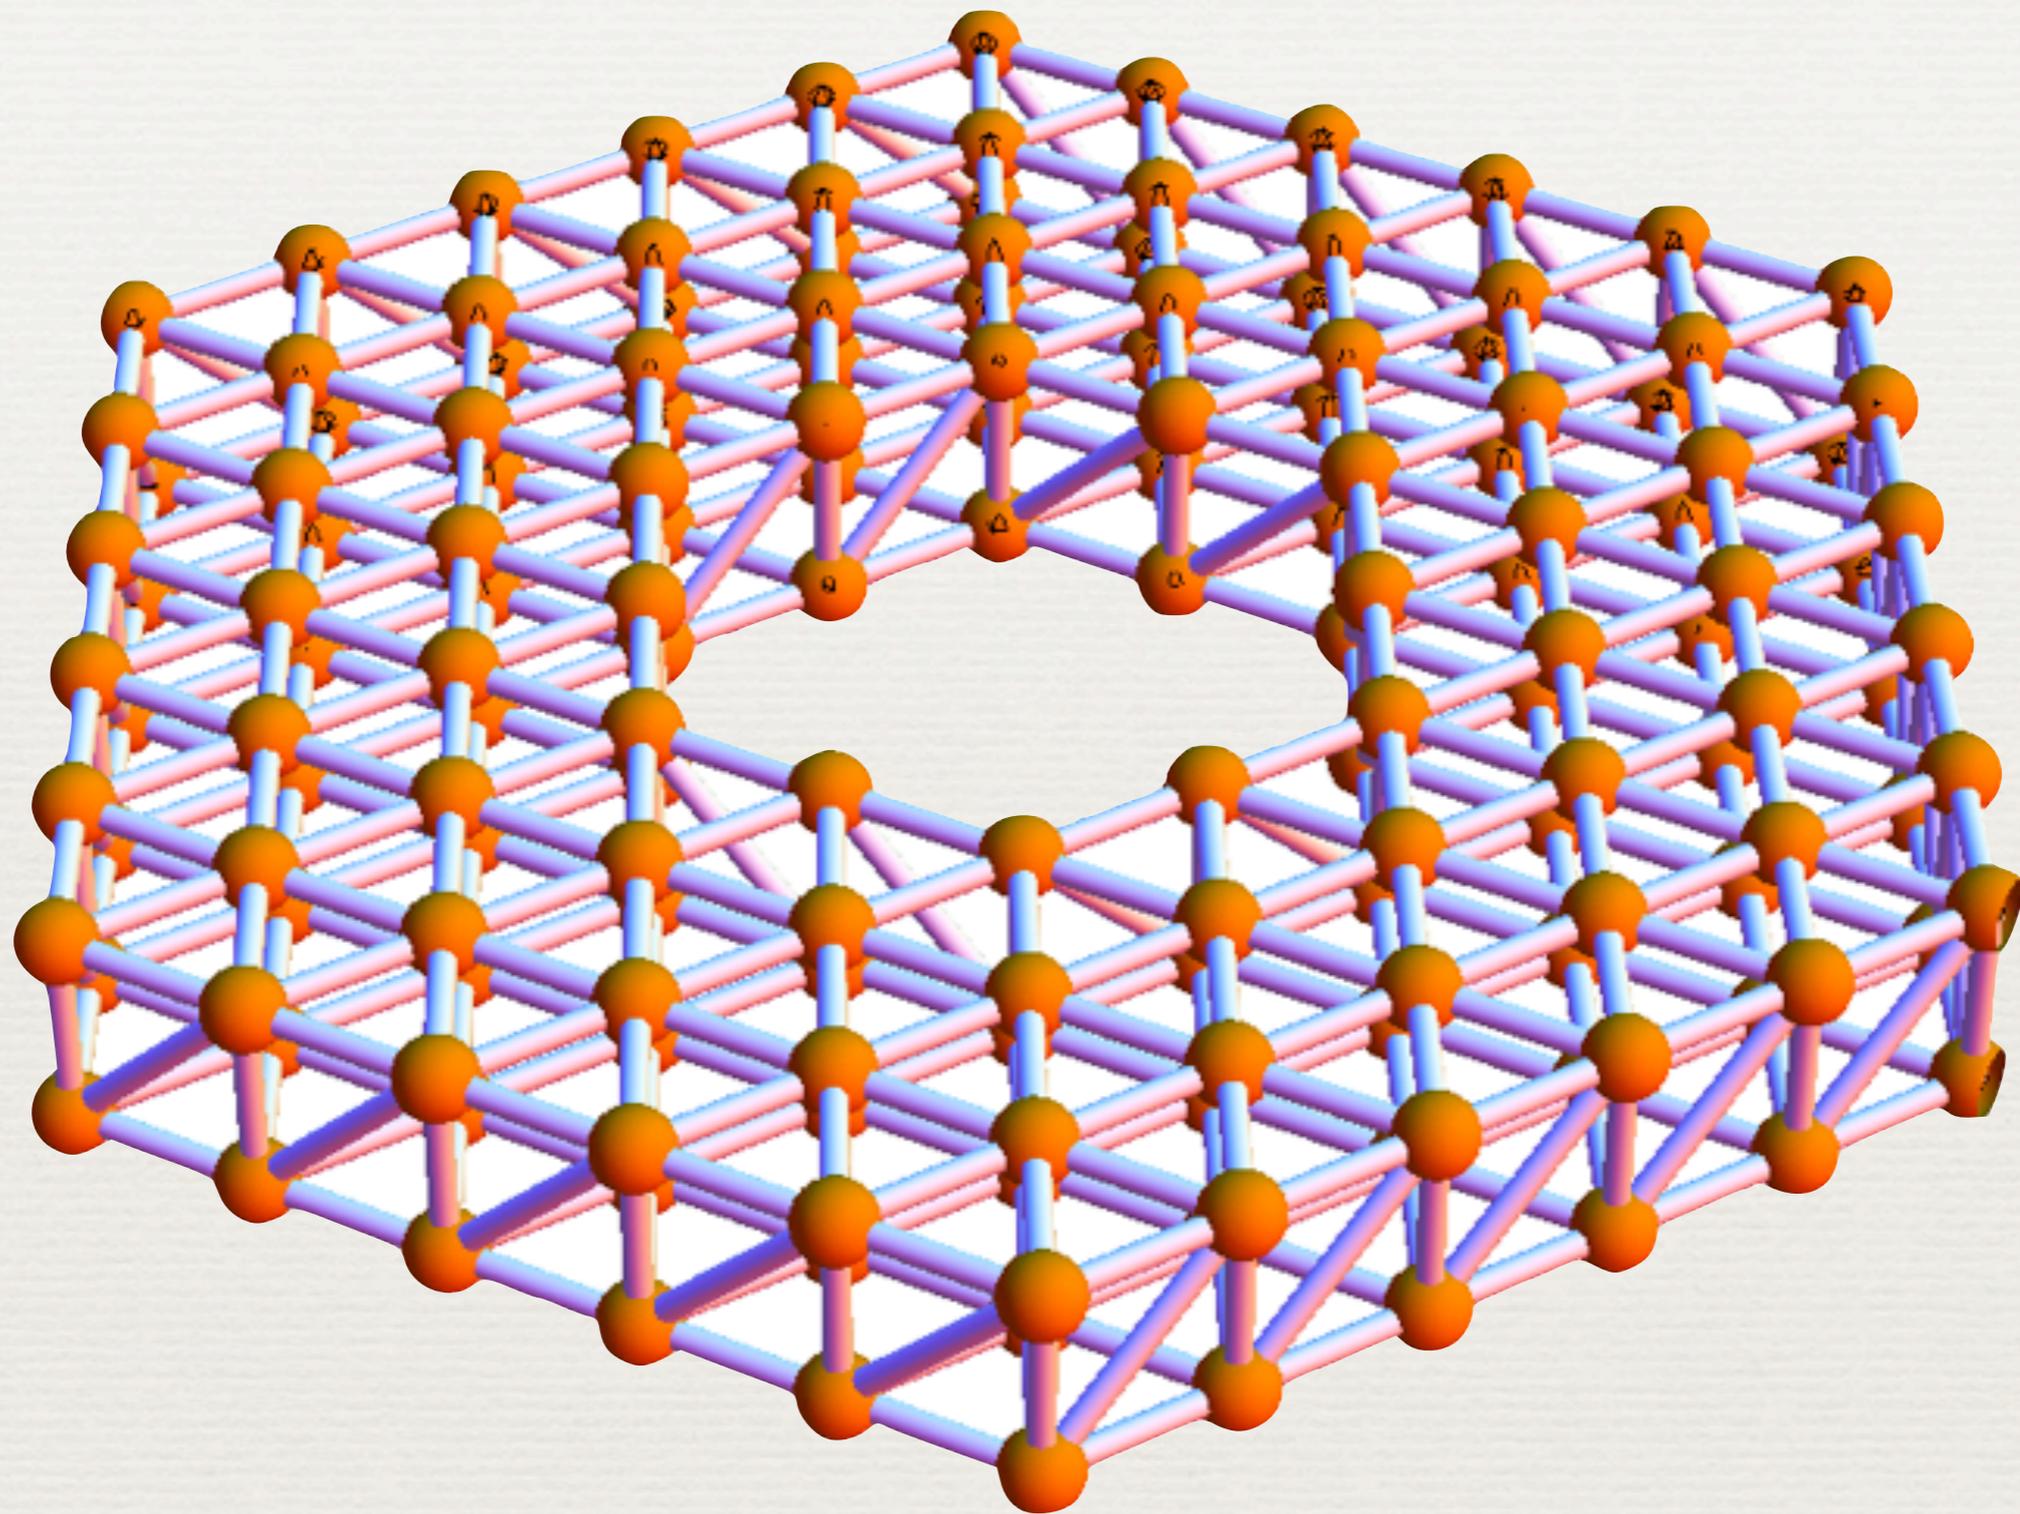

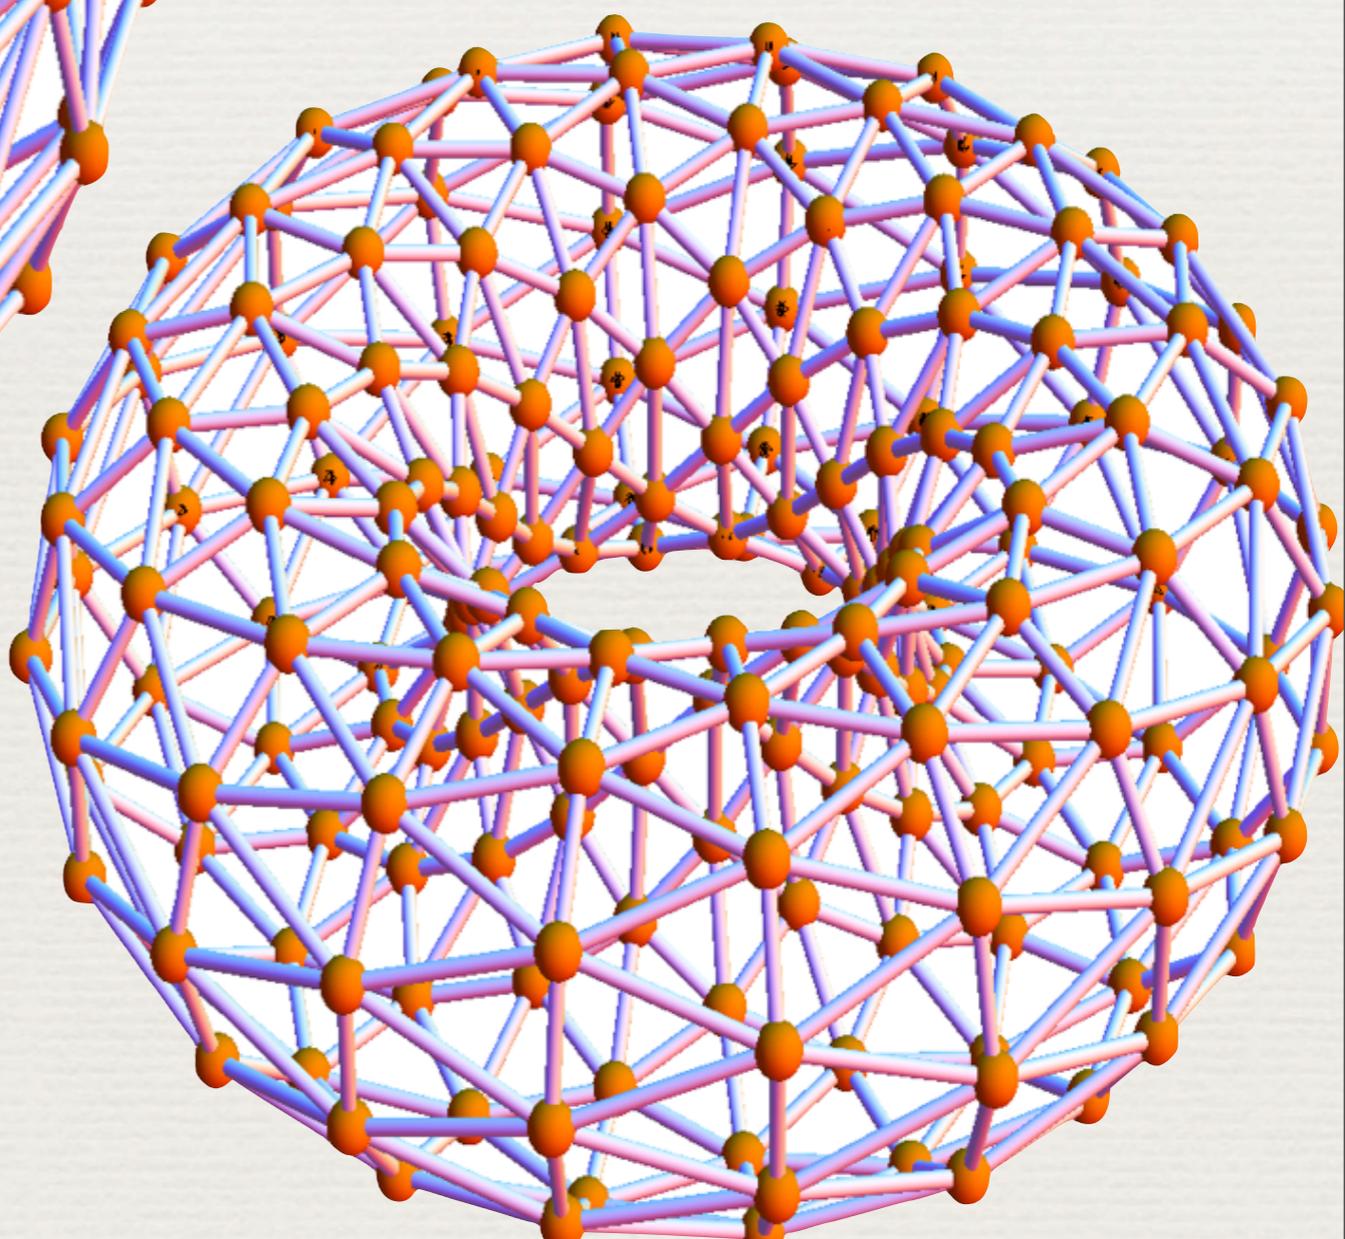

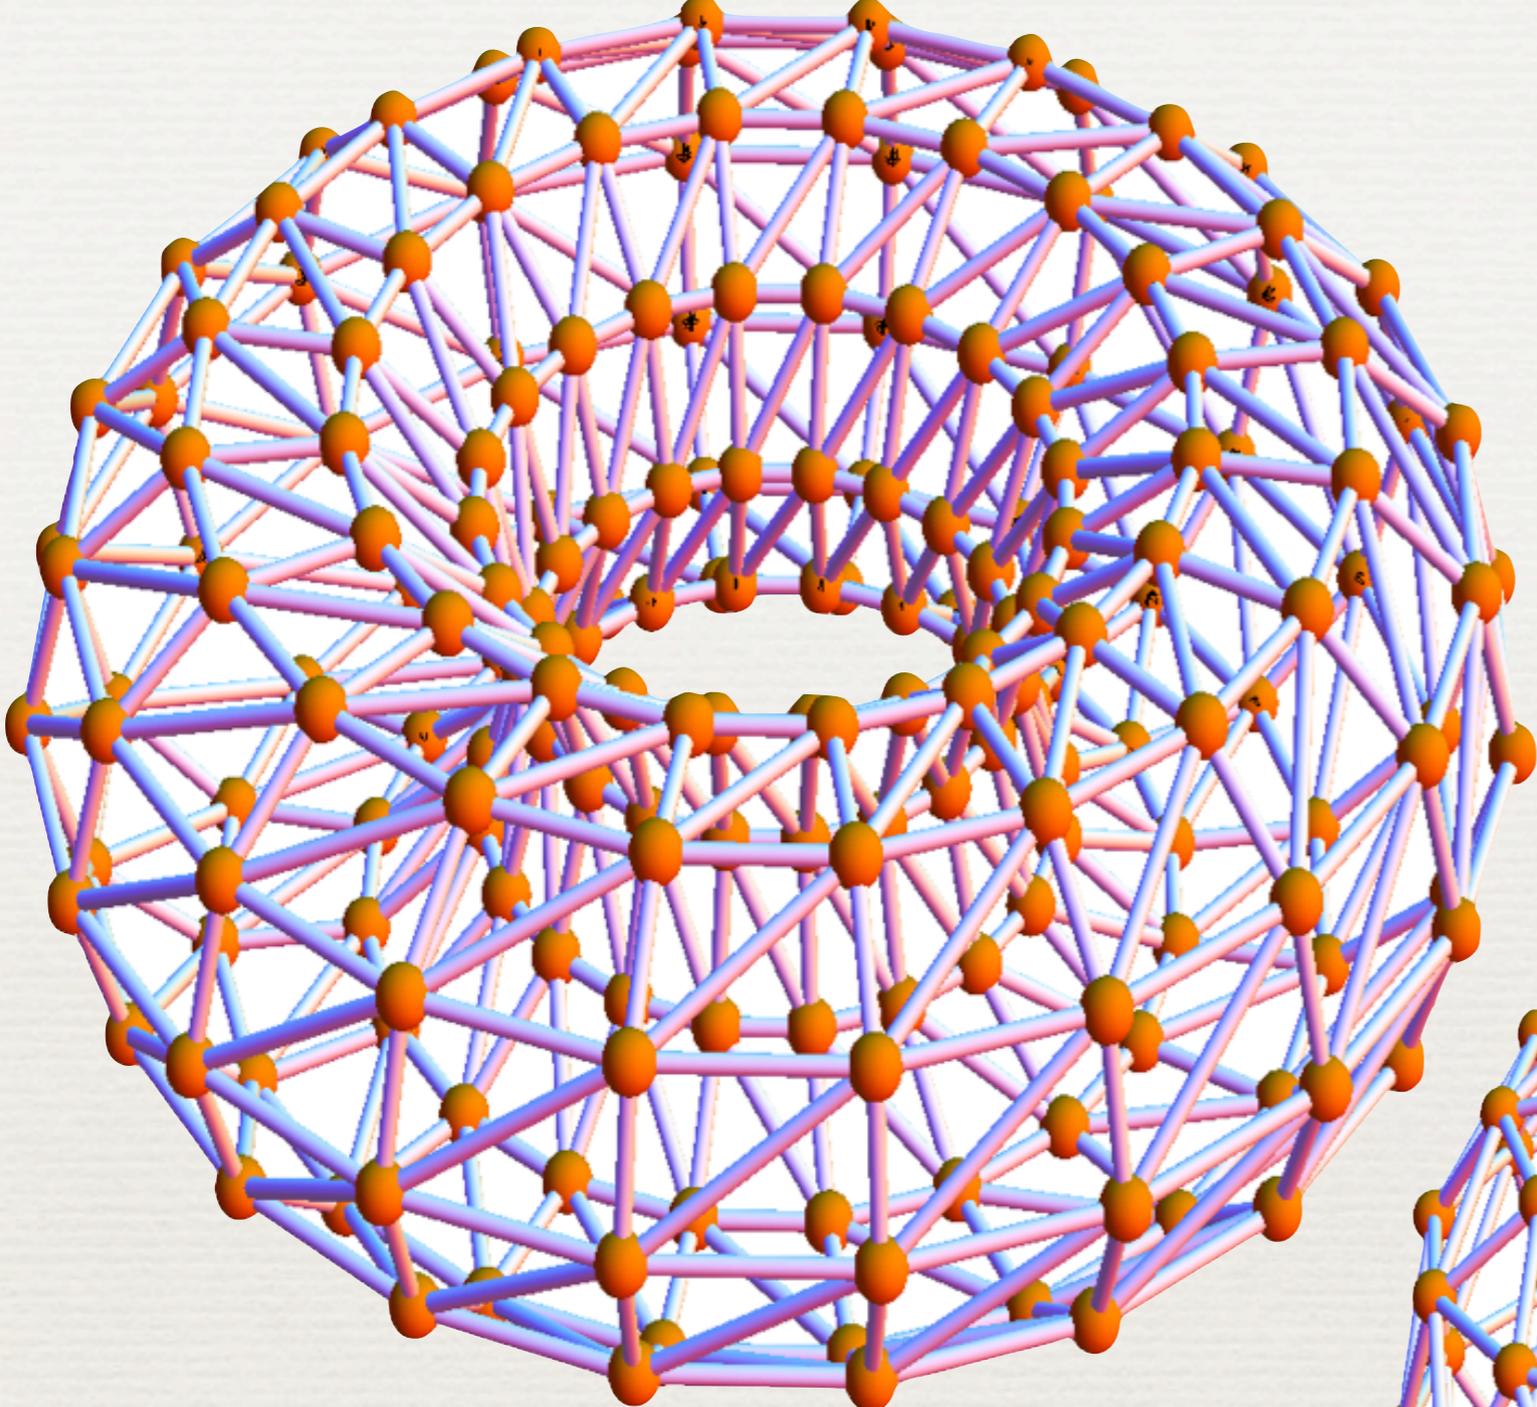

More general polyhedra

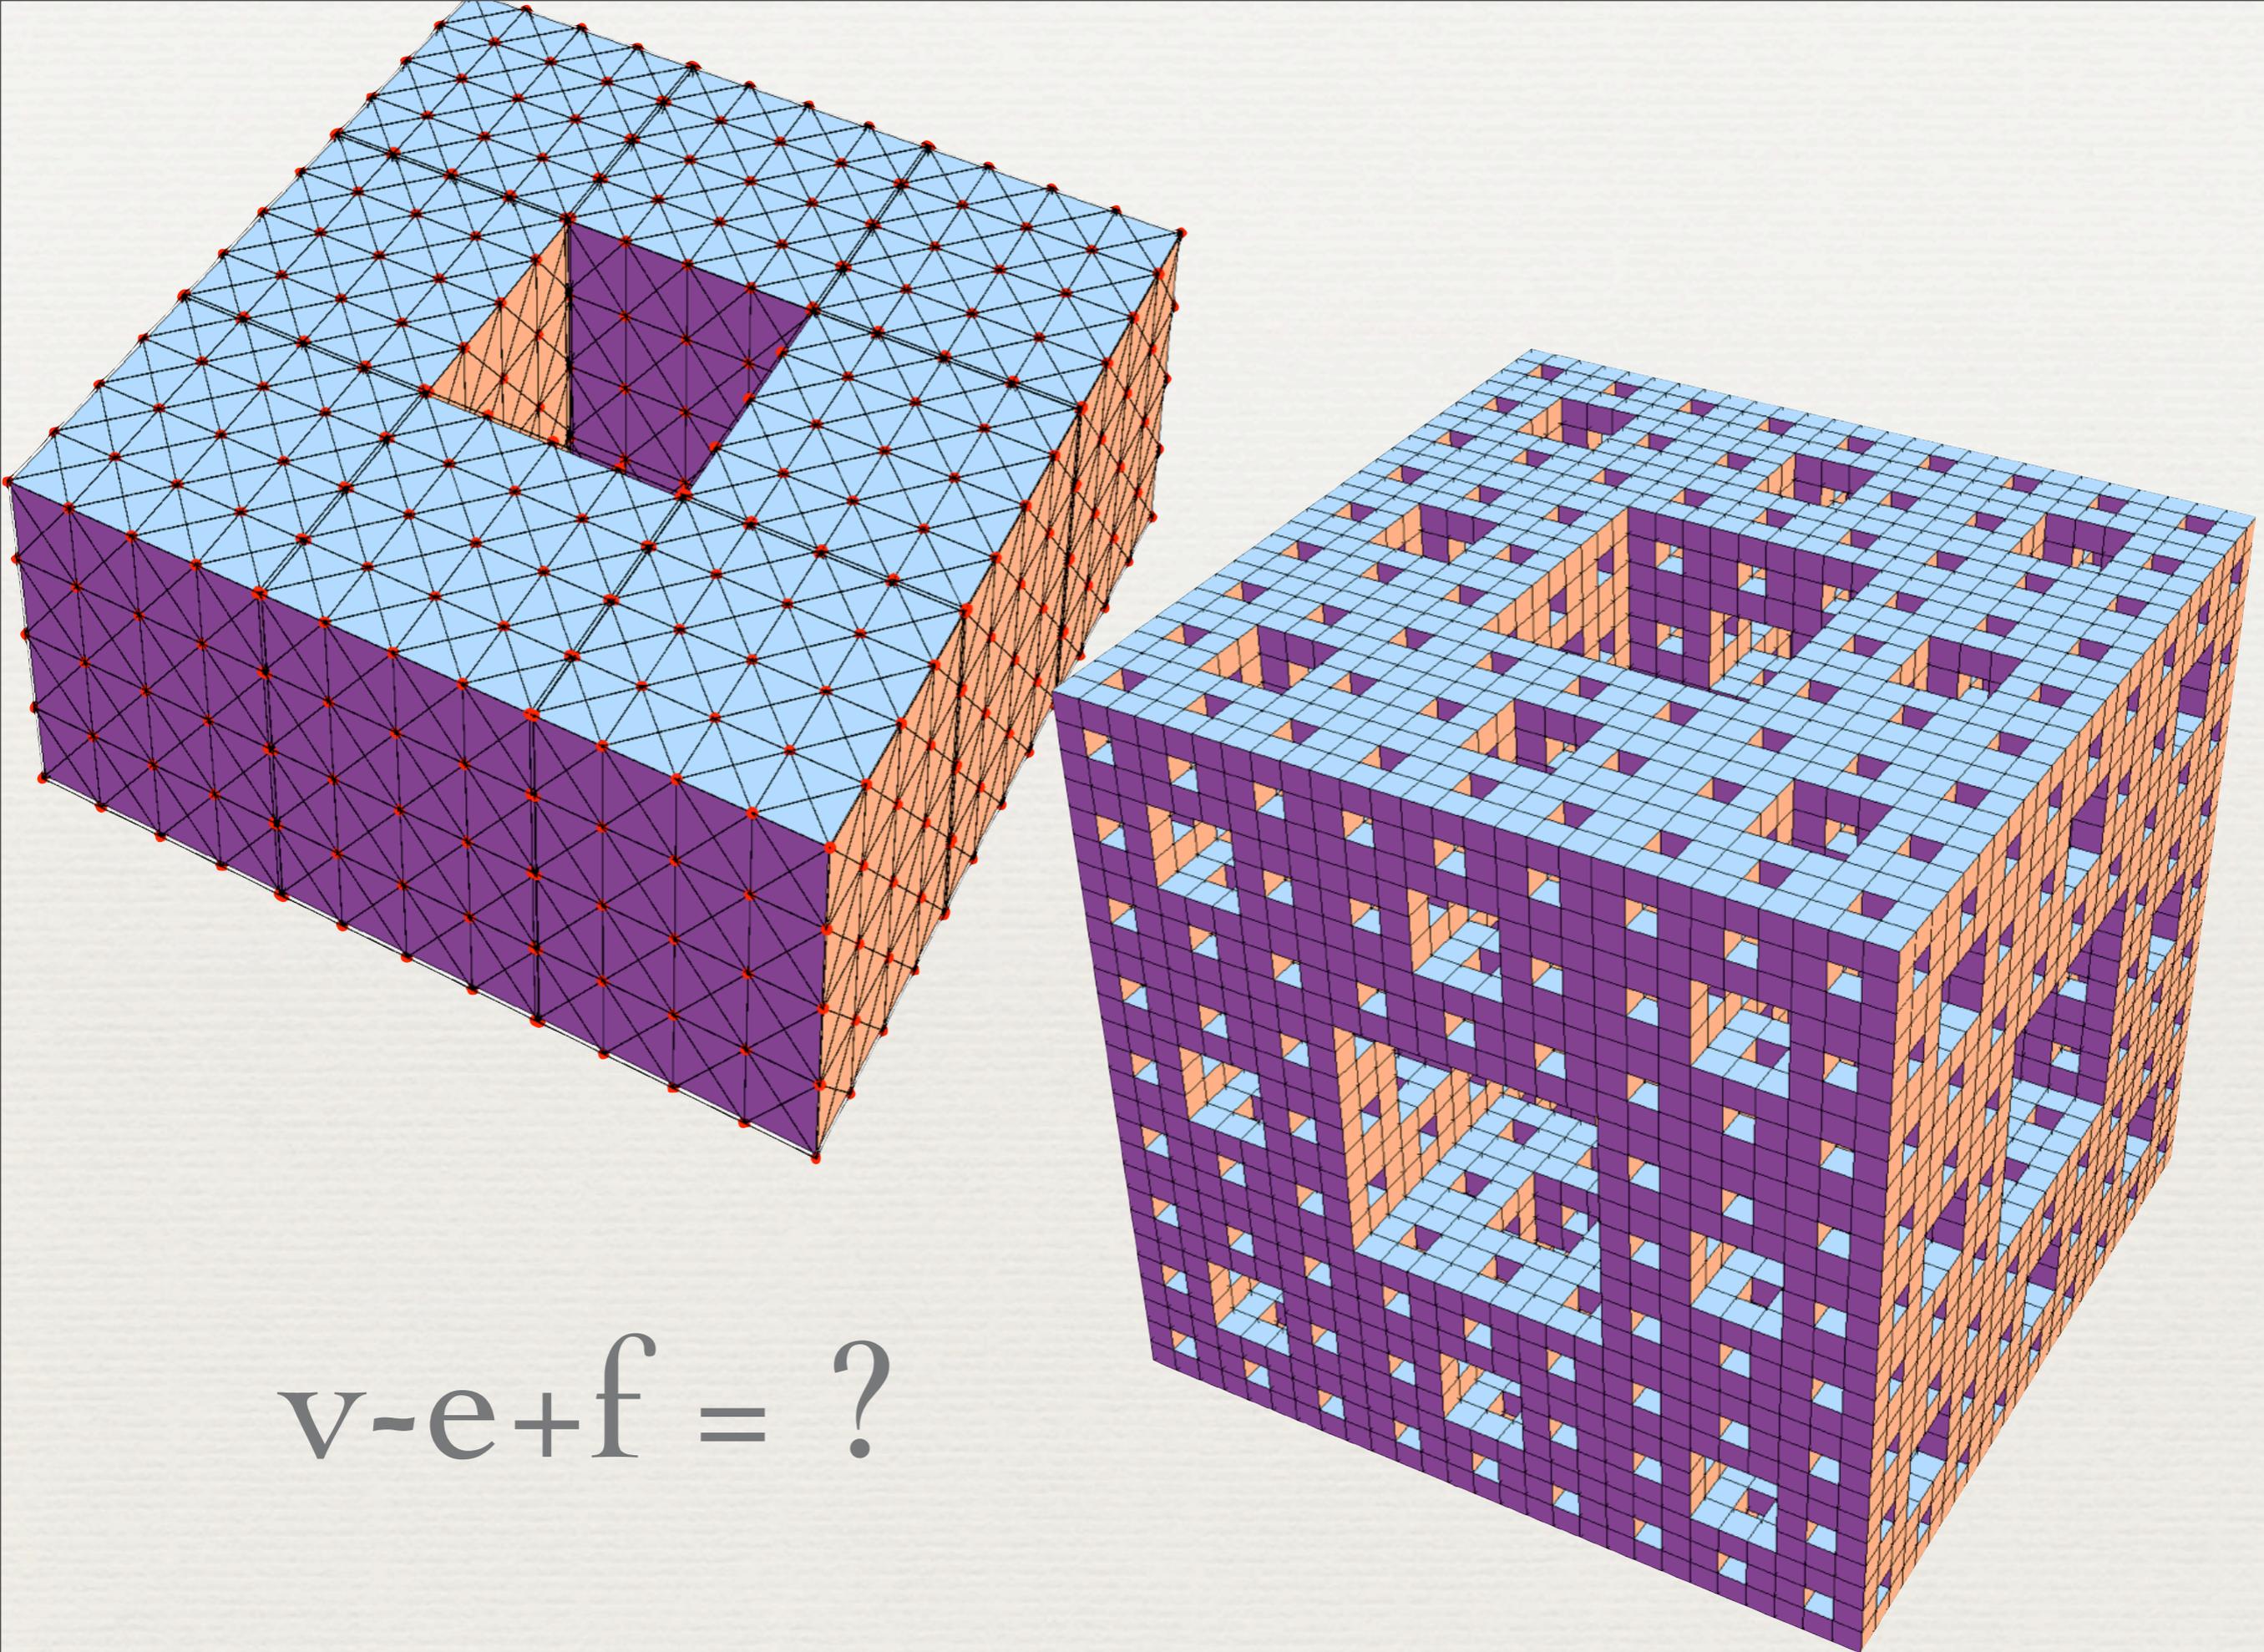

- ♦ The euler formula can be generalized. The number of holes of the surface matters. For the following polyhedra for example, one has

$$v - e + f = 0$$

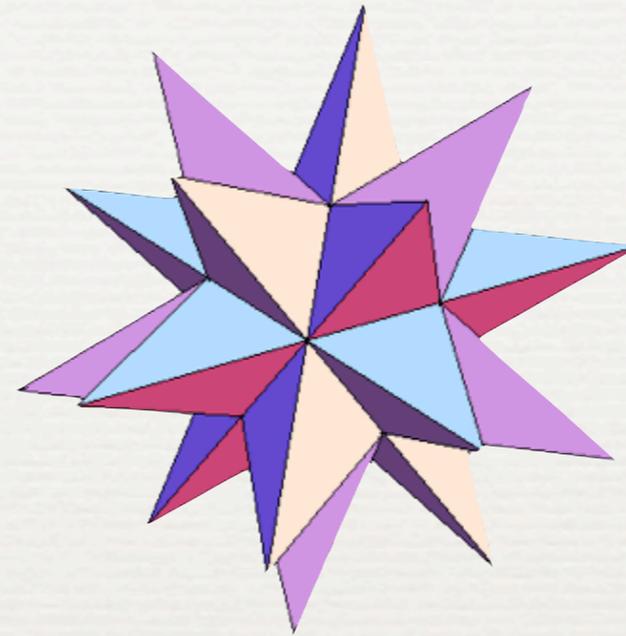

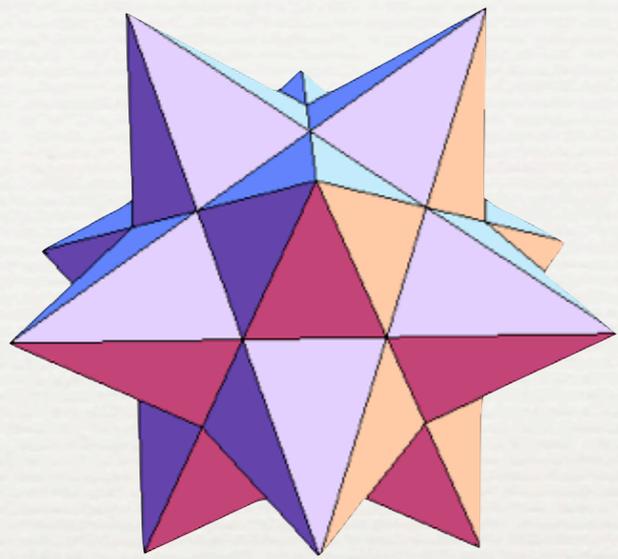

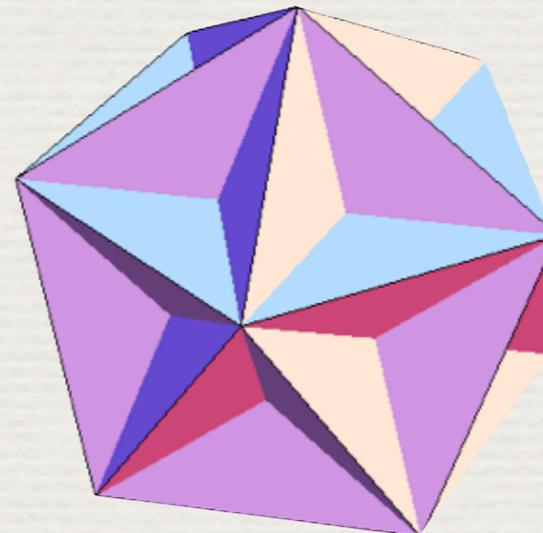

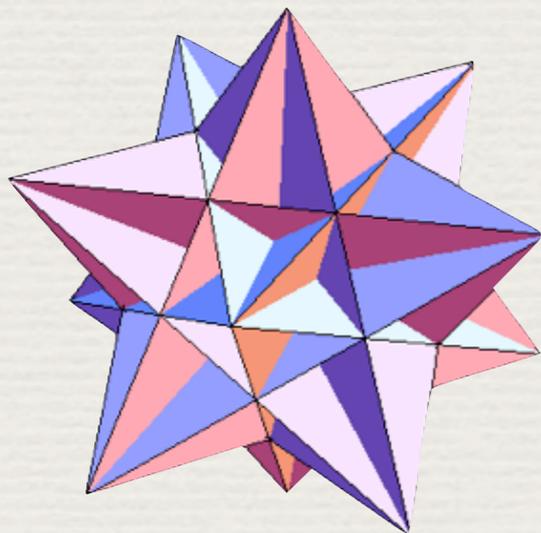

$$v - e + f = ?$$

$$v - e + f = 2$$

Kepler-Poinsot polyhedra

| v | e | f |
|-----|-----|-----|
| 20 | 30 | 12 |
| 12 | 30 | 20 |
| 12 | 30 | 12 |
| 12 | 30 | 12 |

$$v - e + f = -6$$
