

LECTURE 10

E, F', F''

Oliver Knill, Harvard University

September 25 2020

PLAN

1. Matching

2. continuous and differentiable

3. f and f'

4. f and f''

5. find f from f'

6. find f' from f

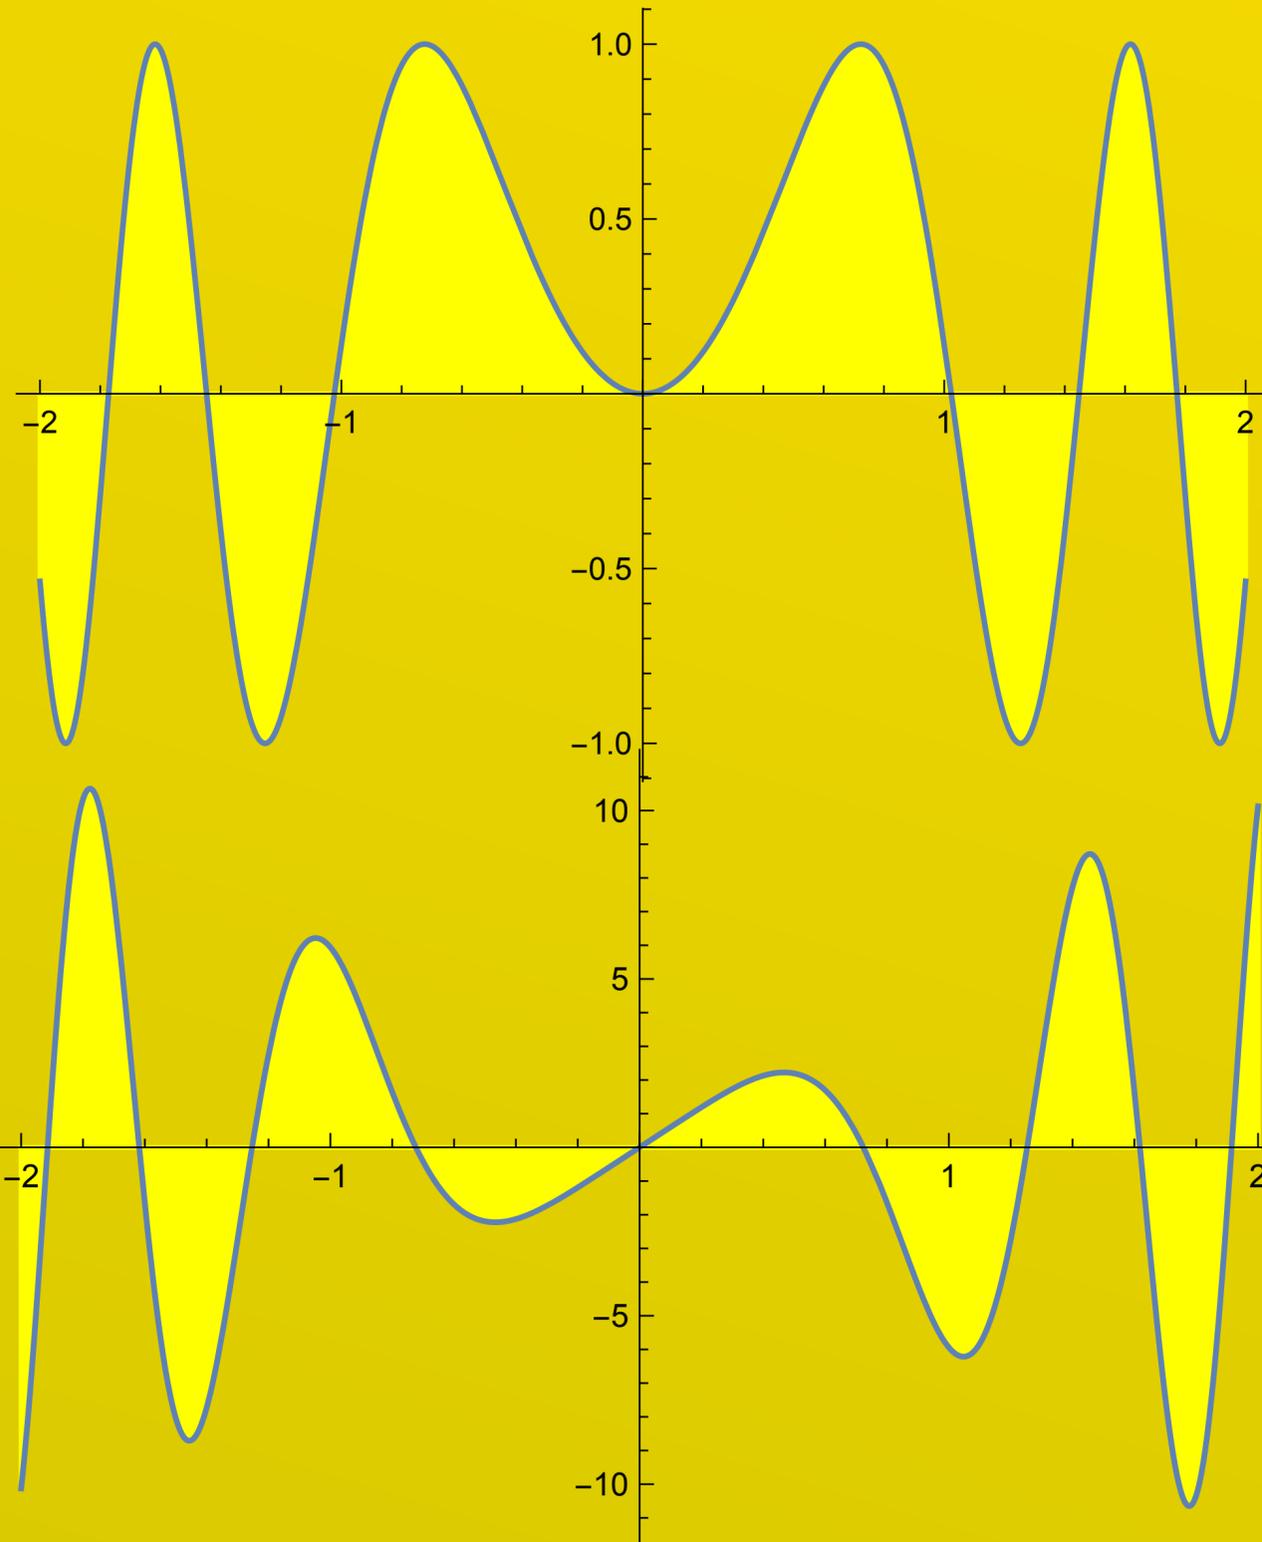

7. Jam

8. Jam with CA

POLL

One of the functions is f and one is f' . Which one is f , A or B?

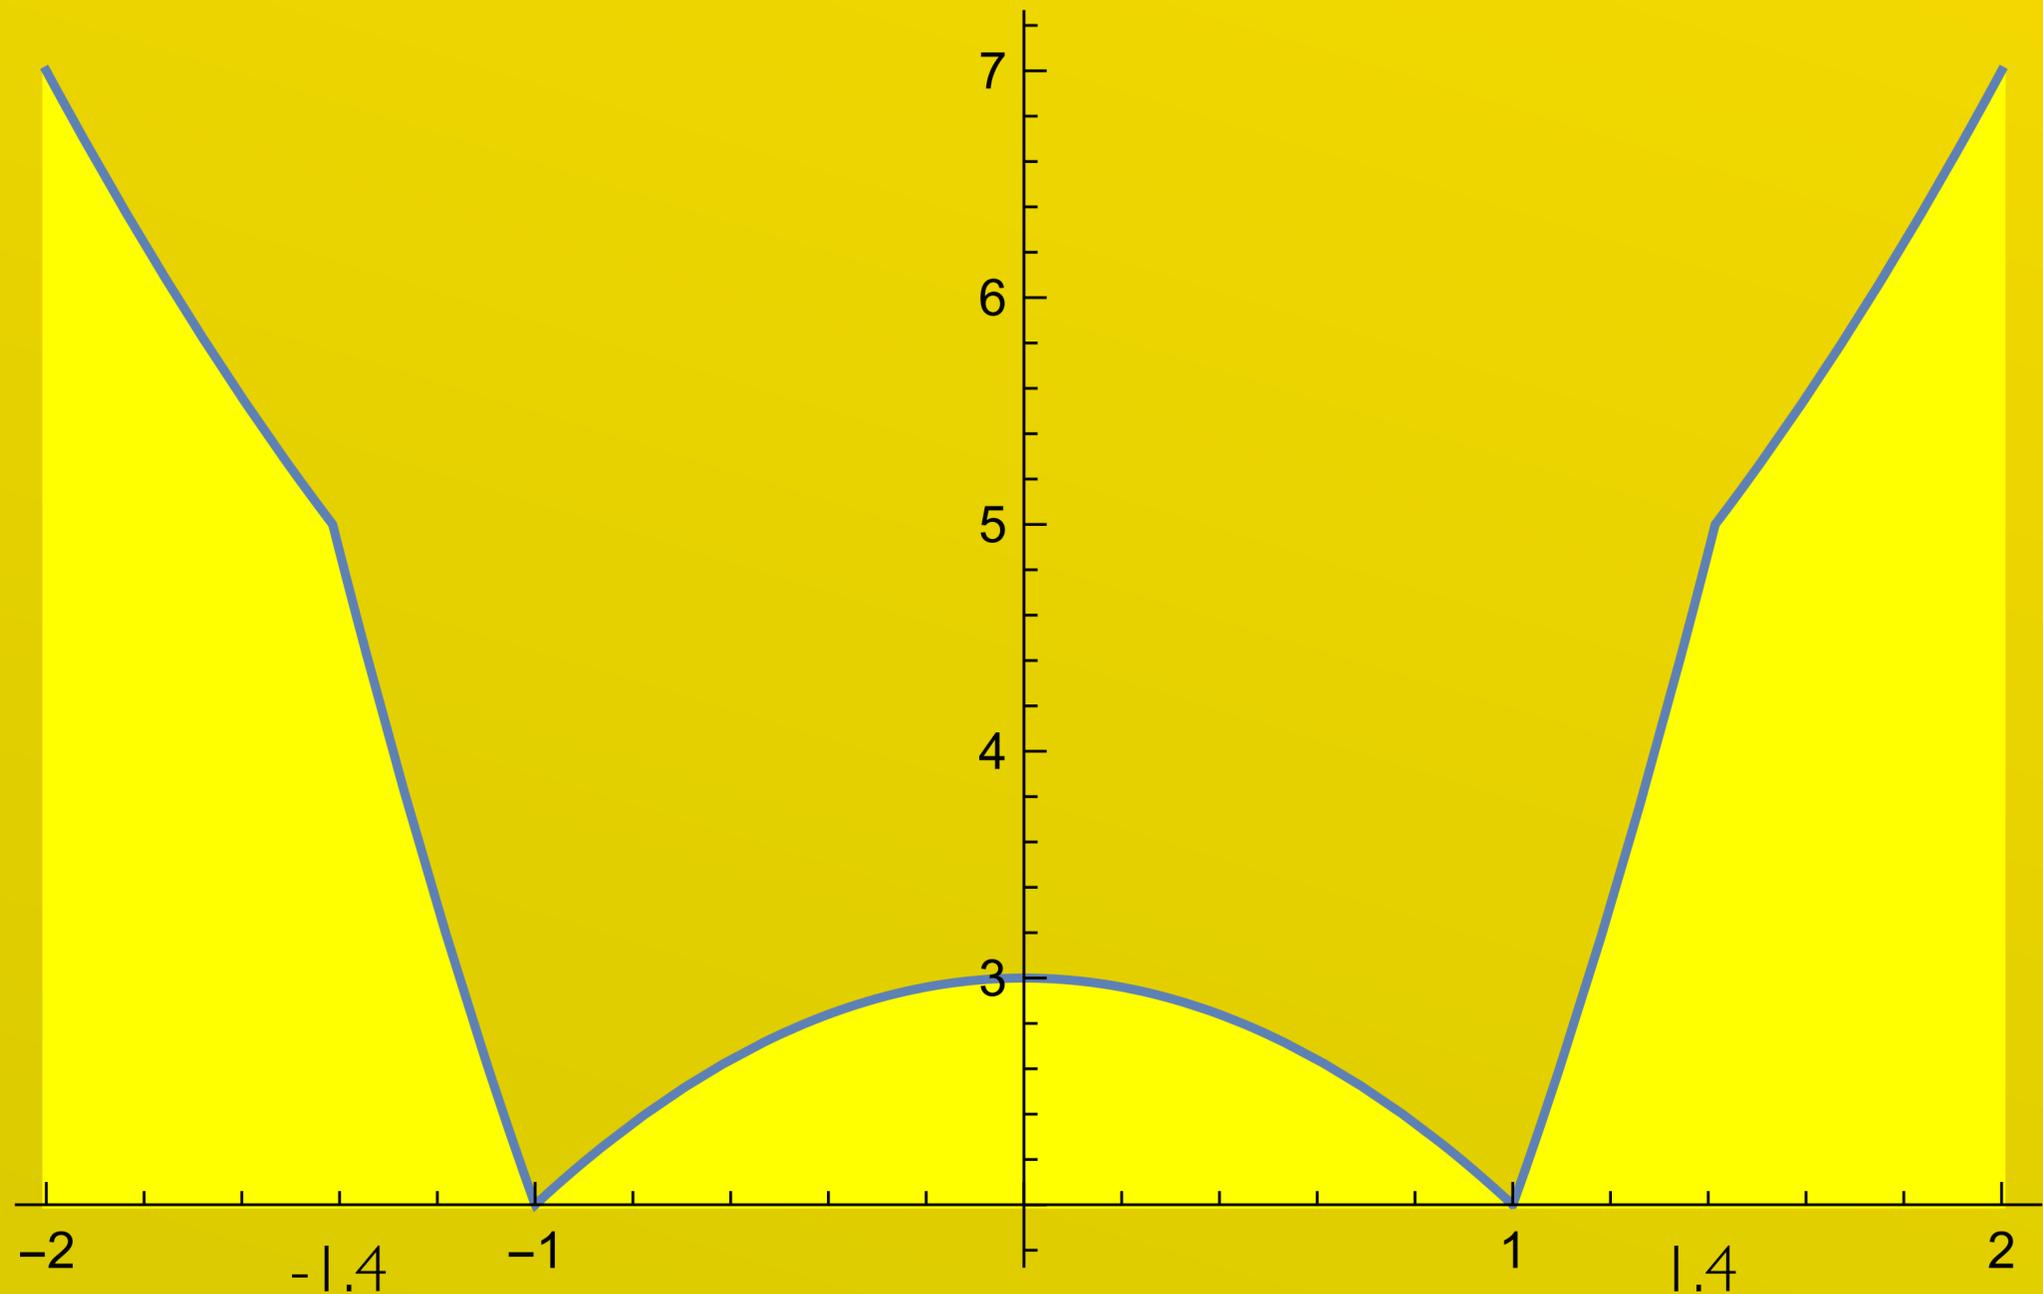

A

B

DIFFERENTIABLE

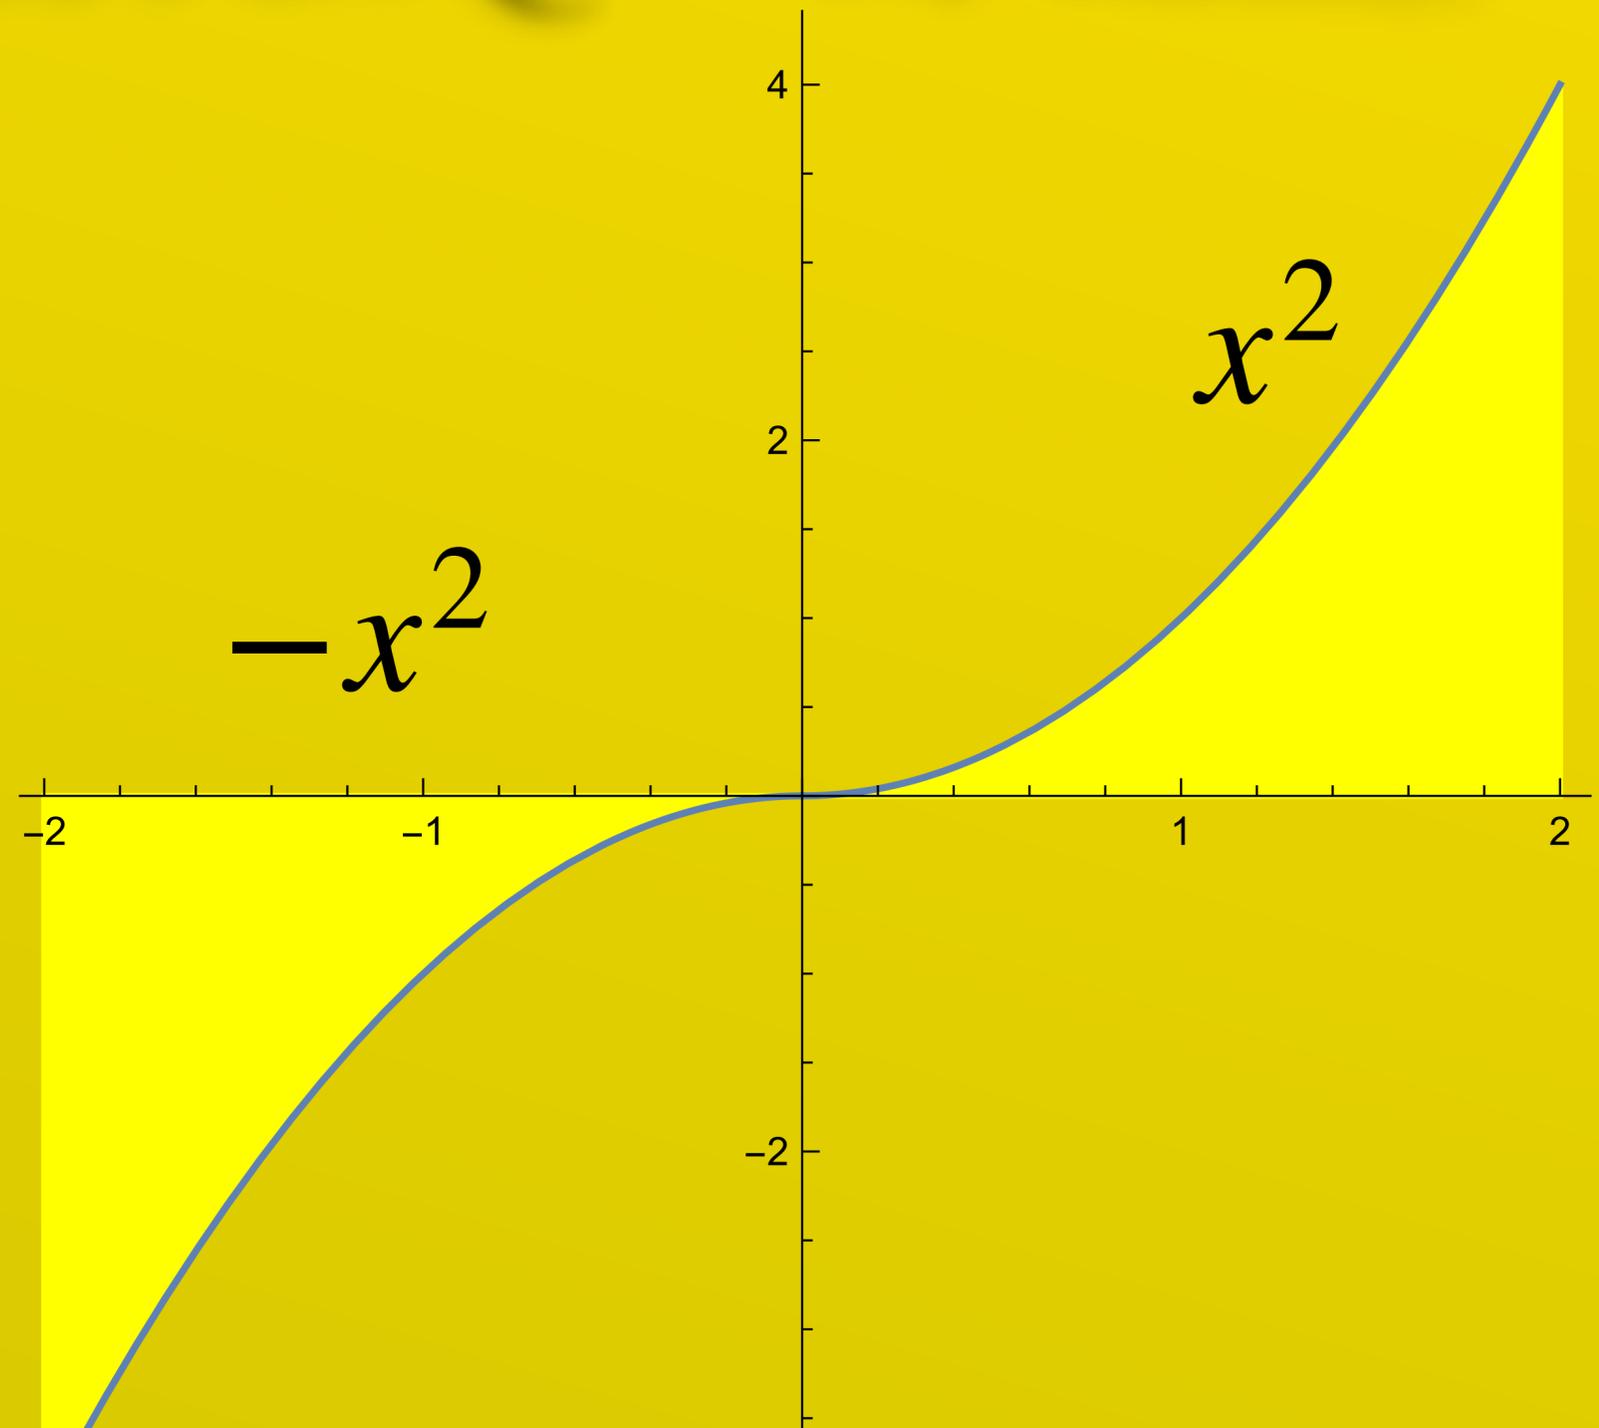

Continuous
and
differentiable

Where is f
differentiable?
Where is it continuous?
Where is f' continuous?

CONTINUOUSLY DIFFERENTIABLE

Continuous
and
differentiable

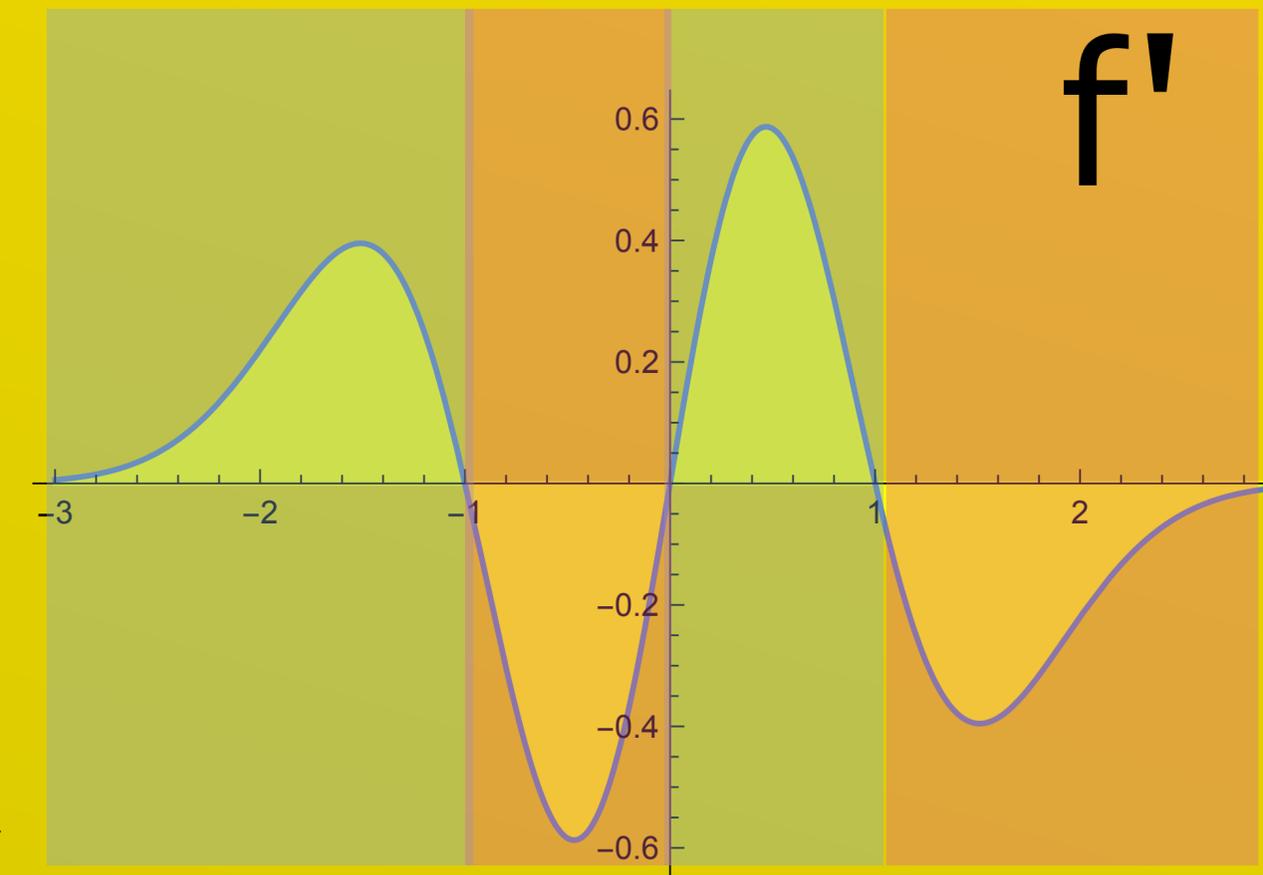

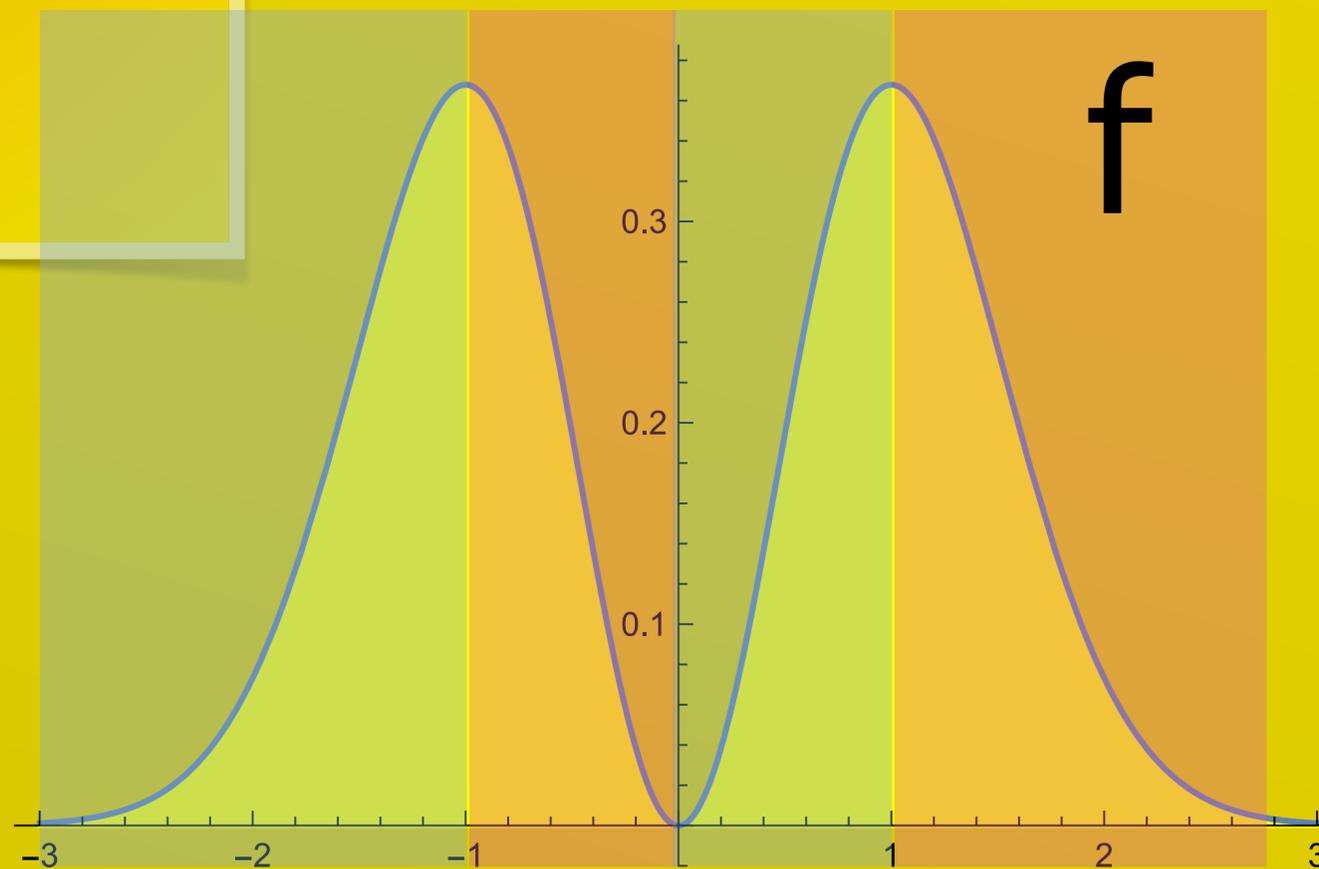

Is this function
continuously
differentiable?

DERIVATIVE

Derivative = Slope = Instantaneous Rate of Change

Positive
derivative

Negative
derivative

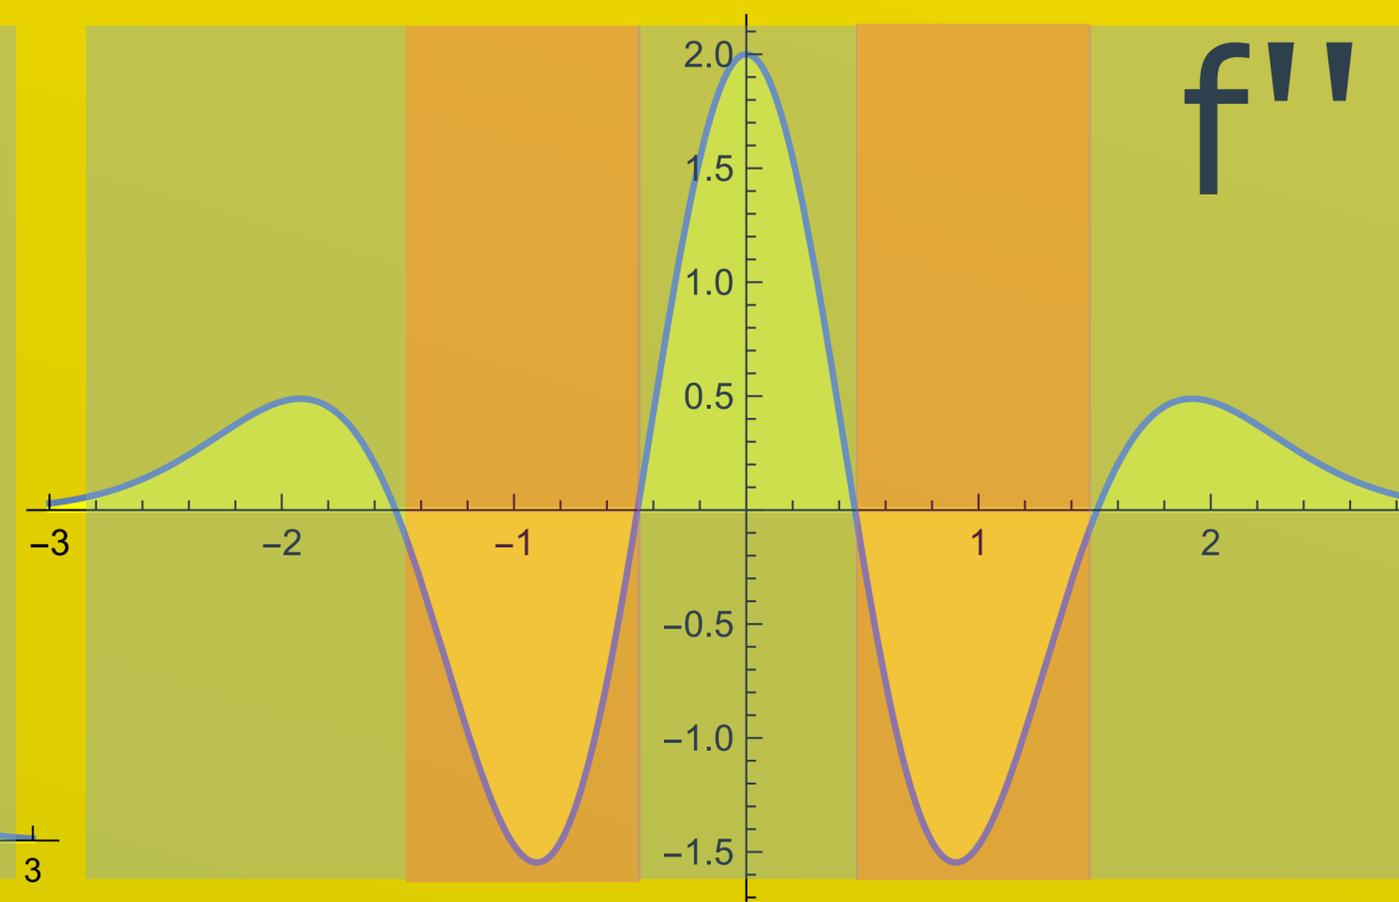

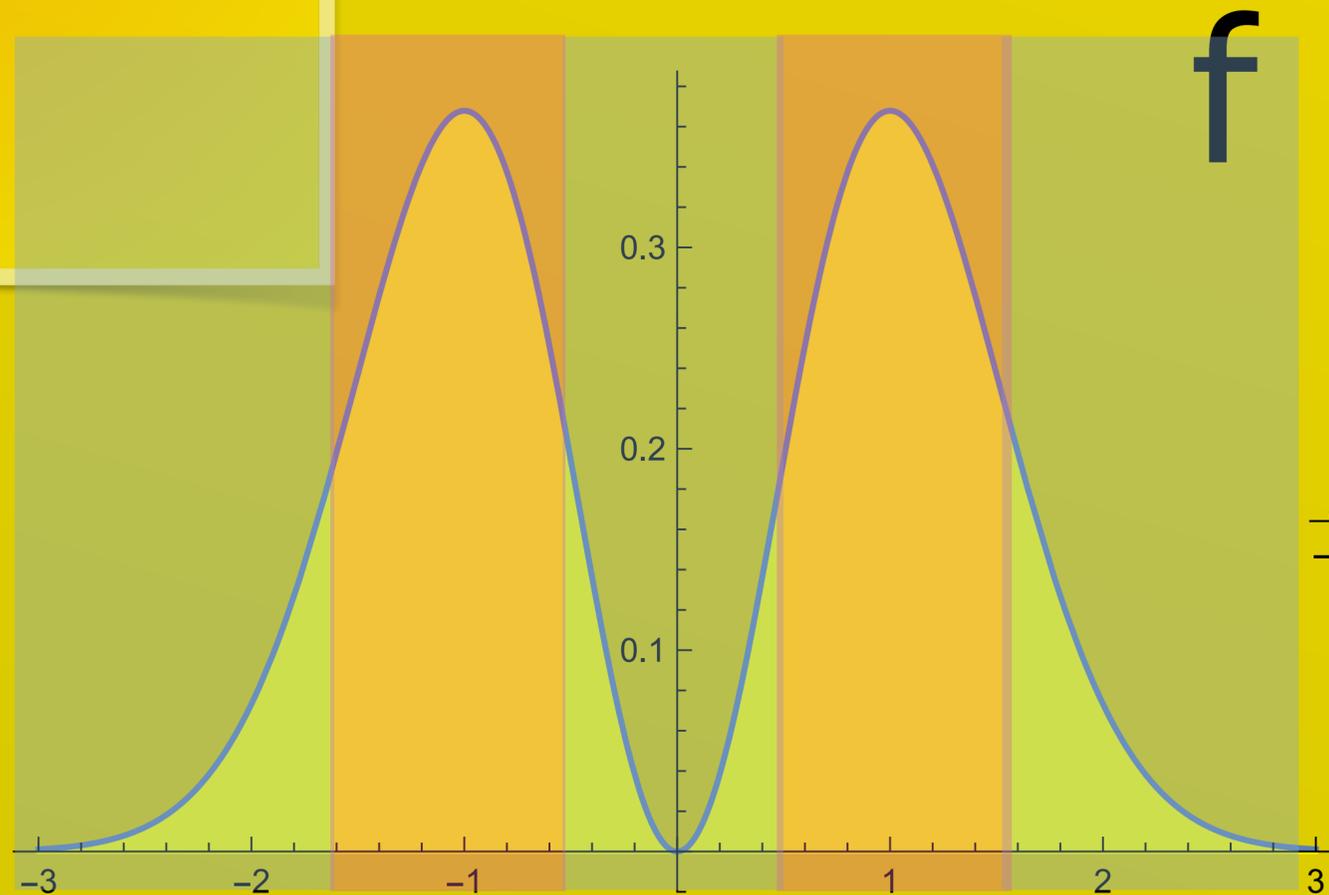

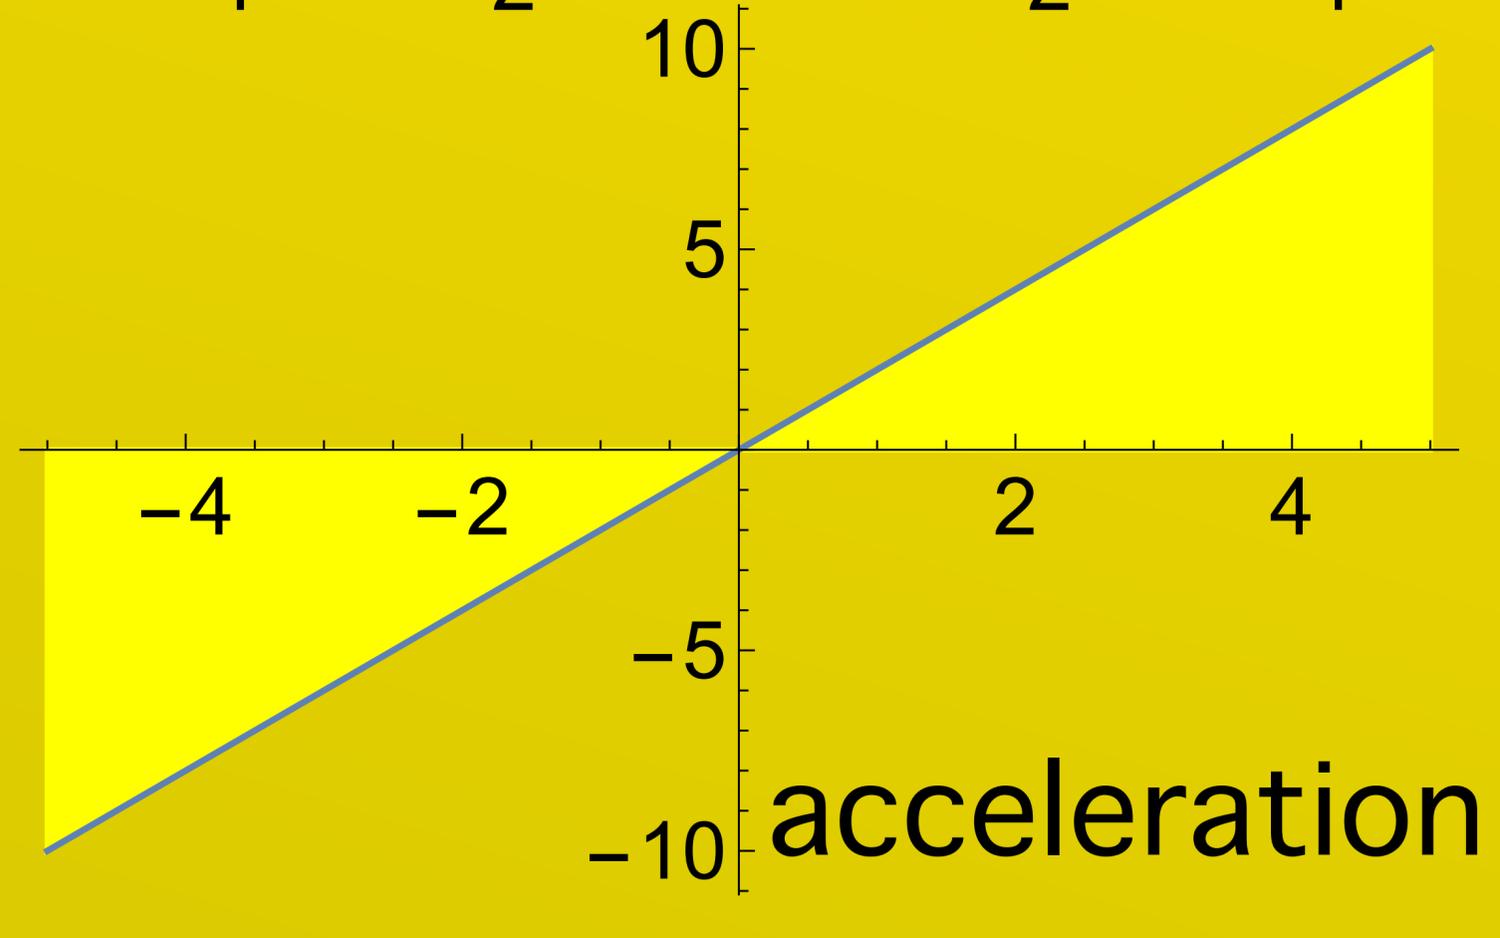

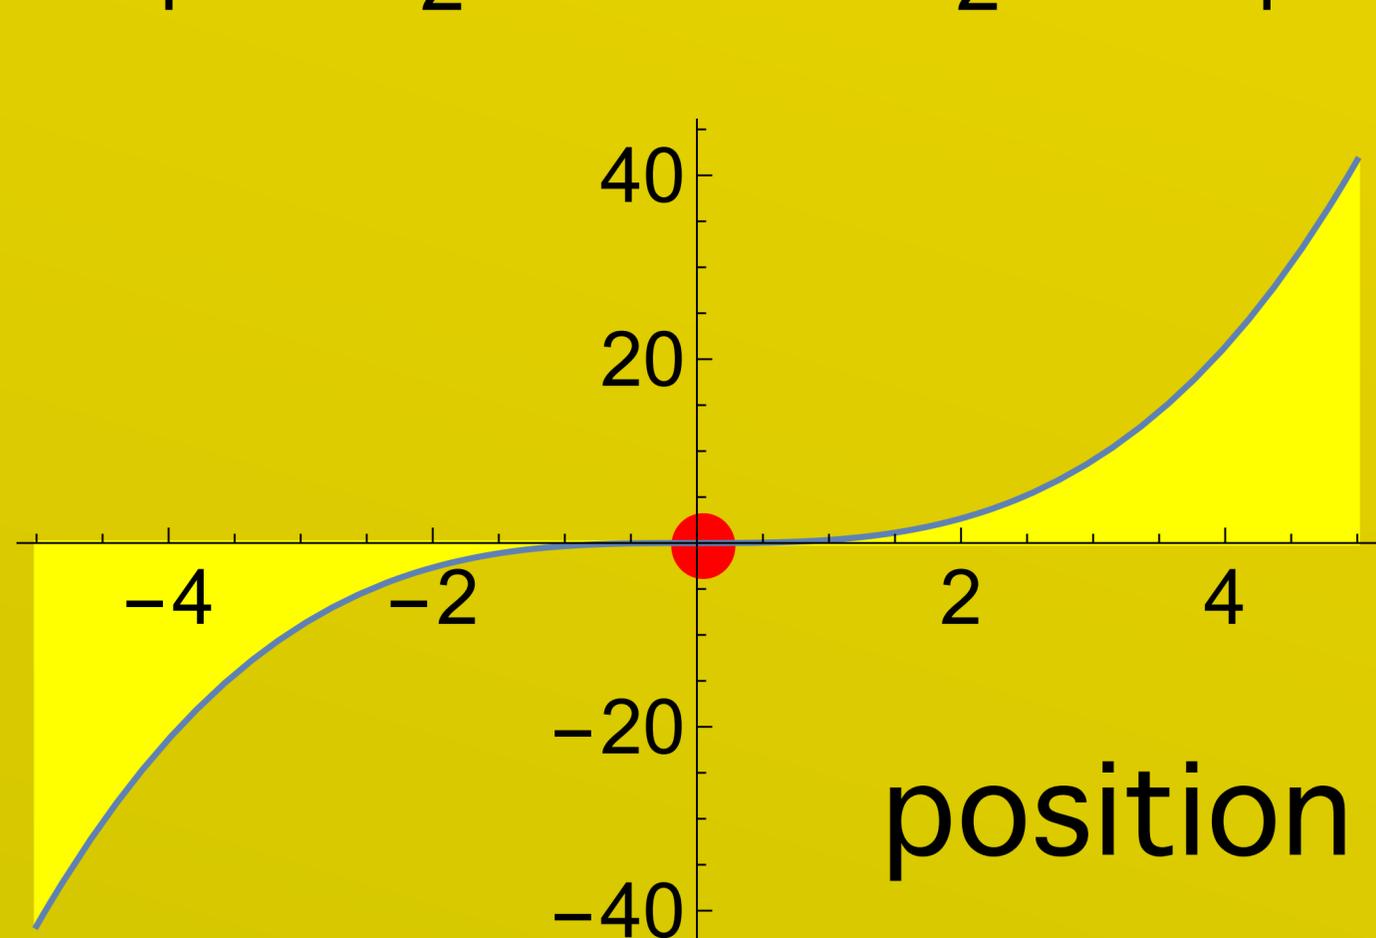

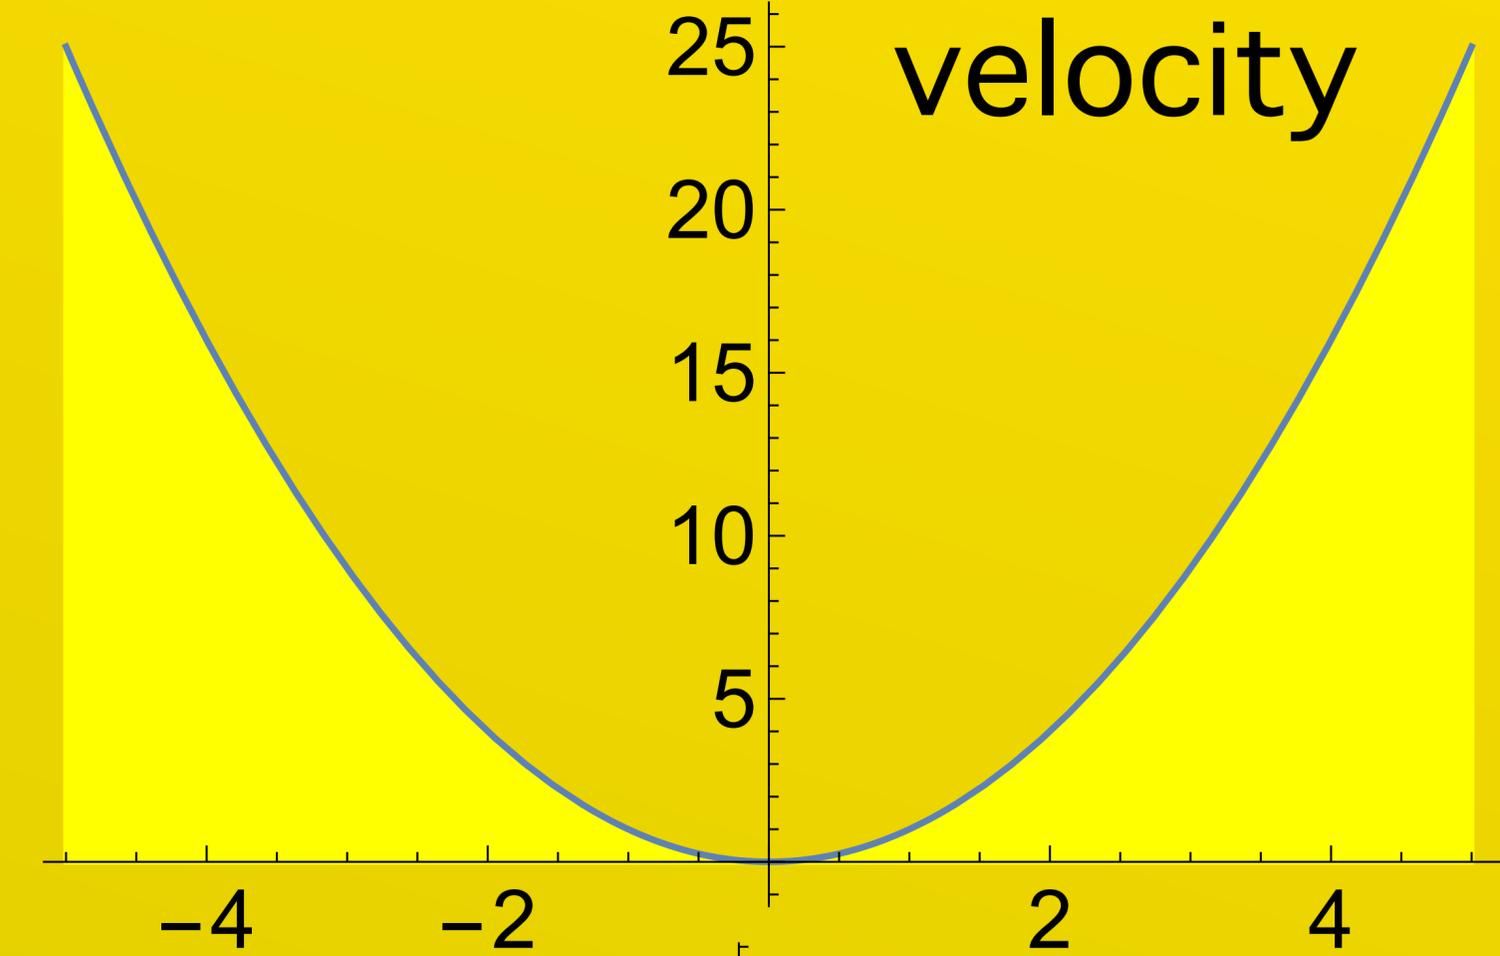

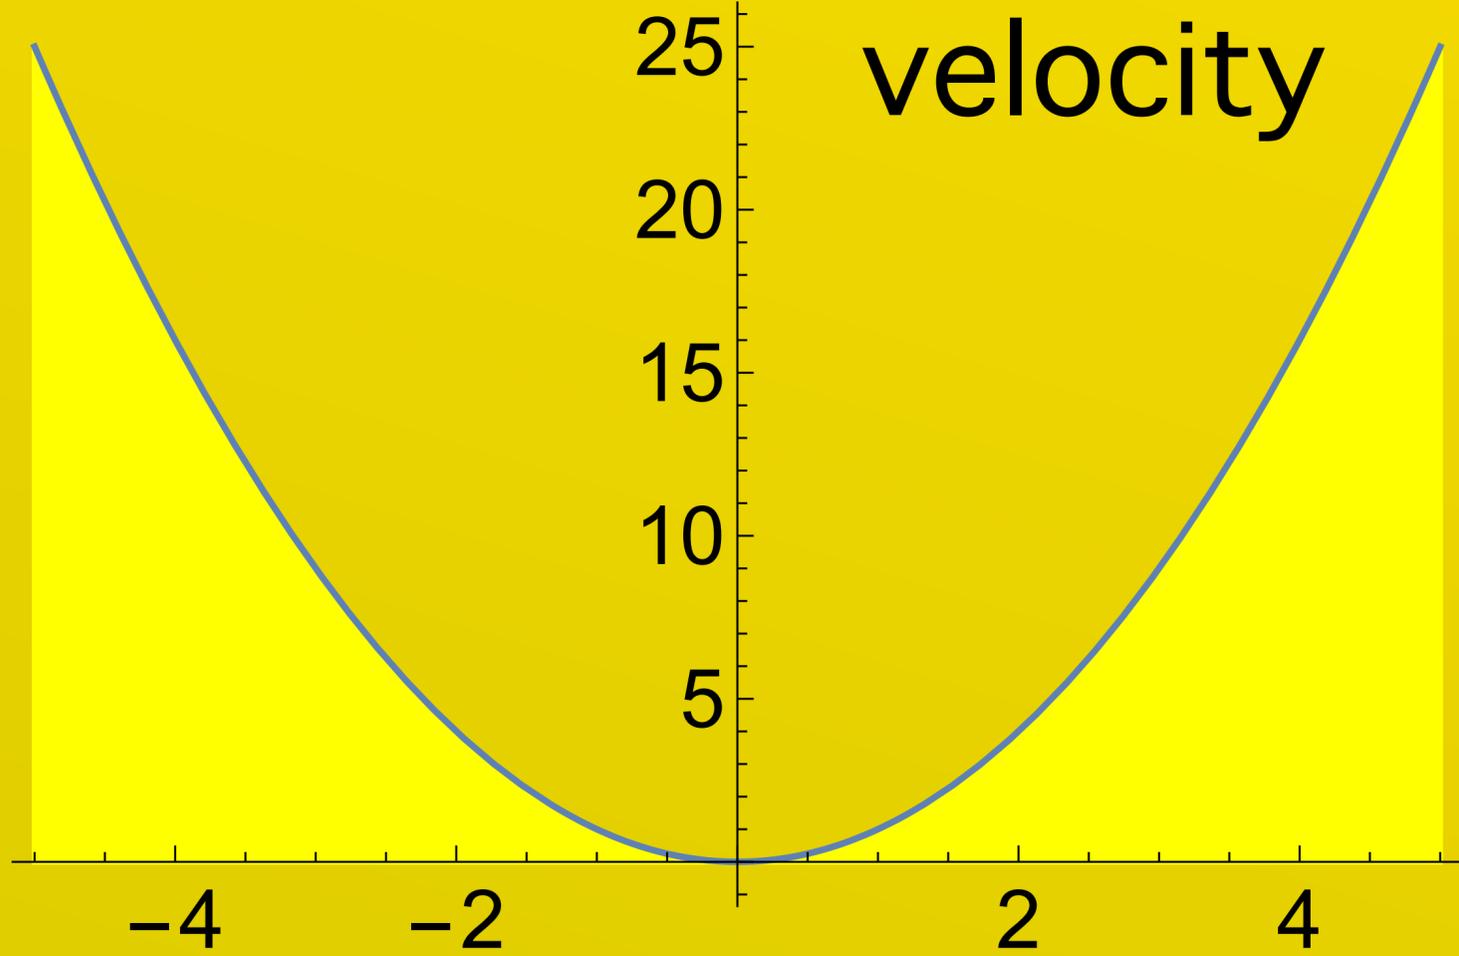

SECOND DERIVATIVE

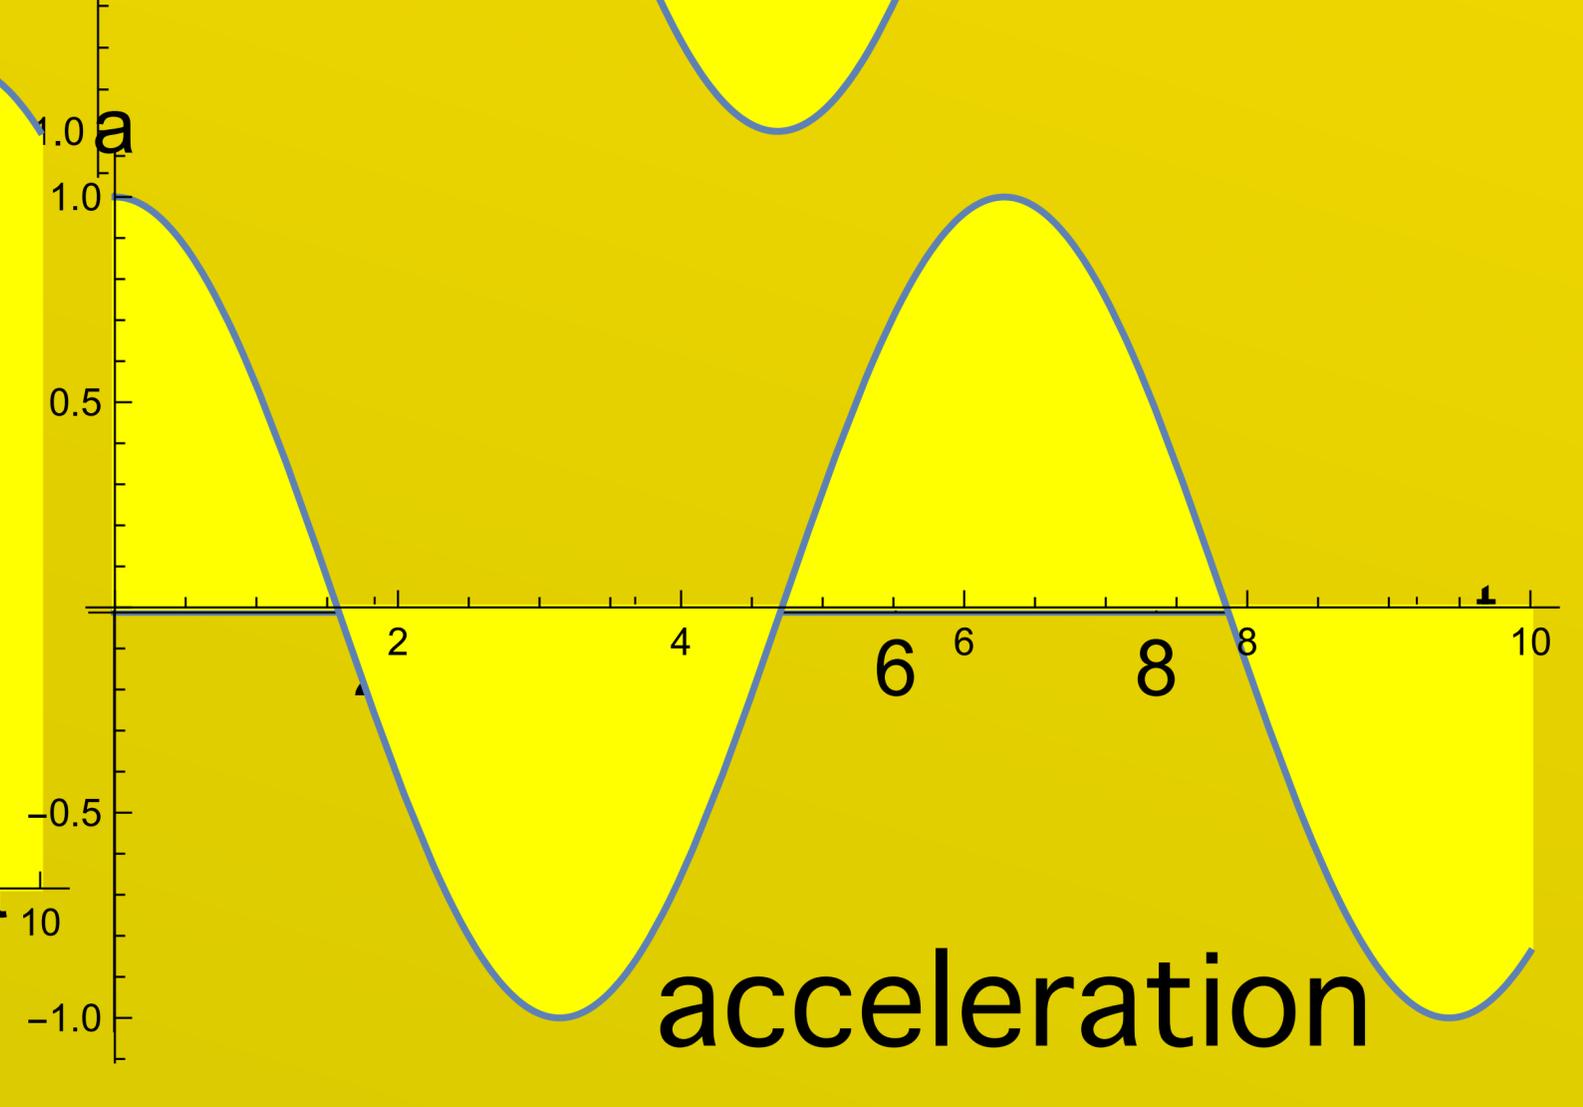

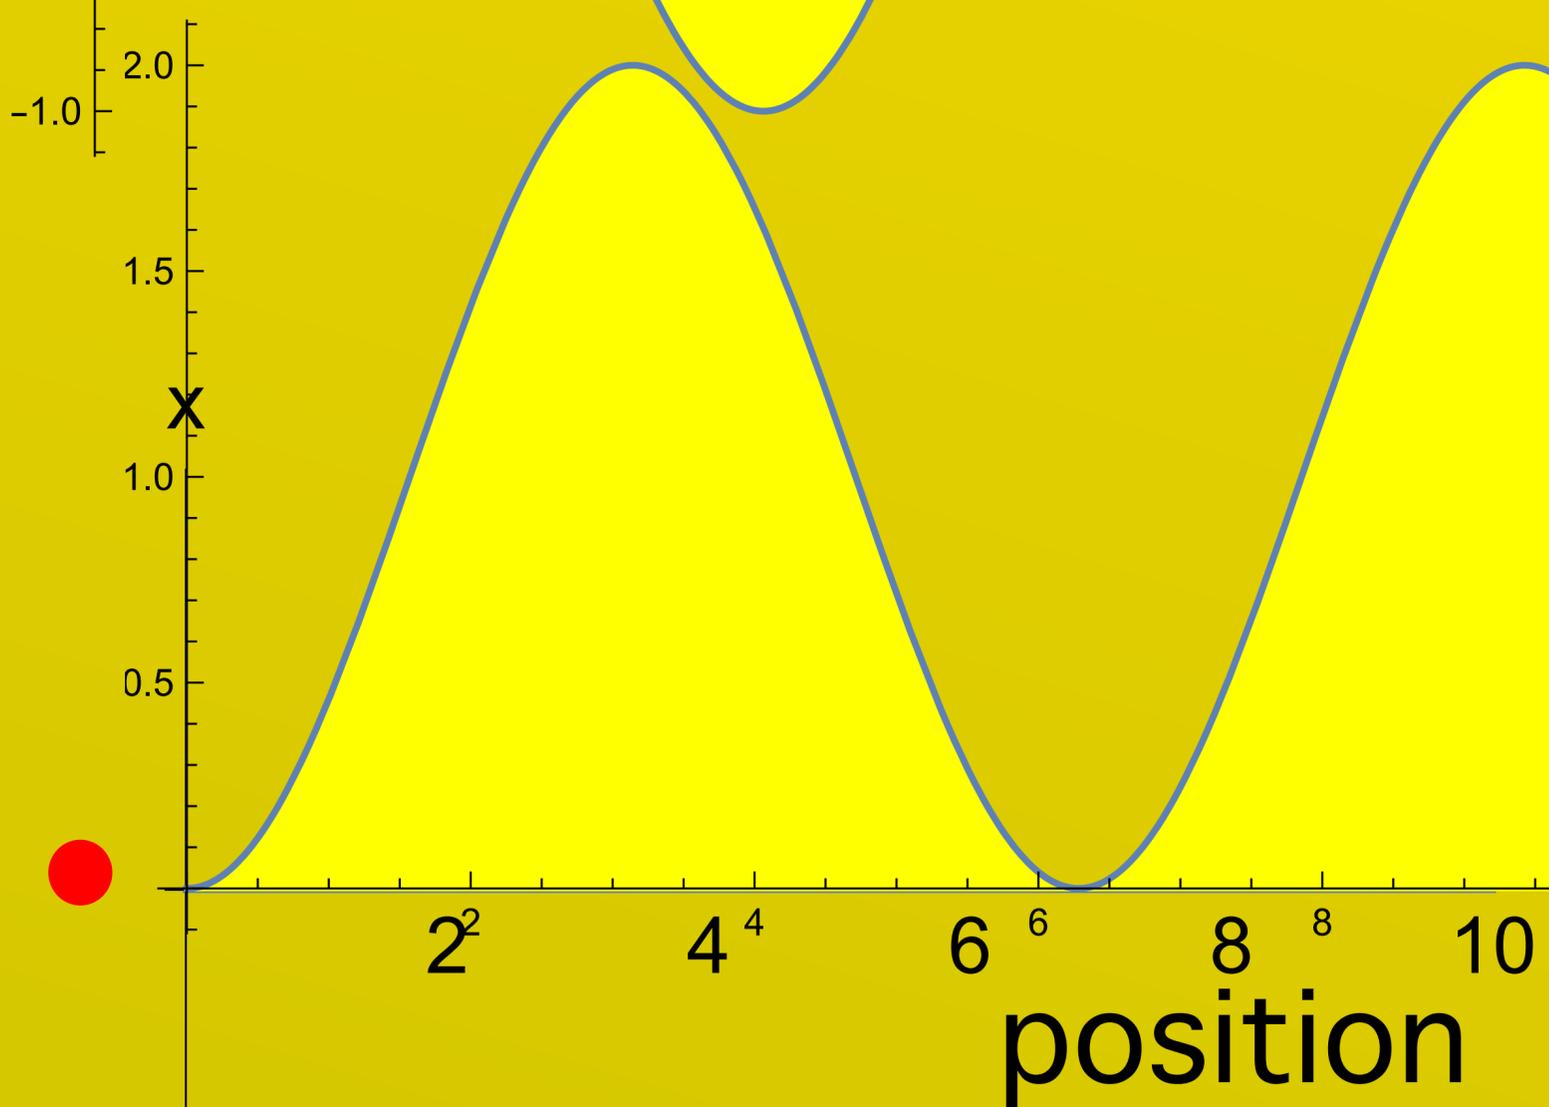

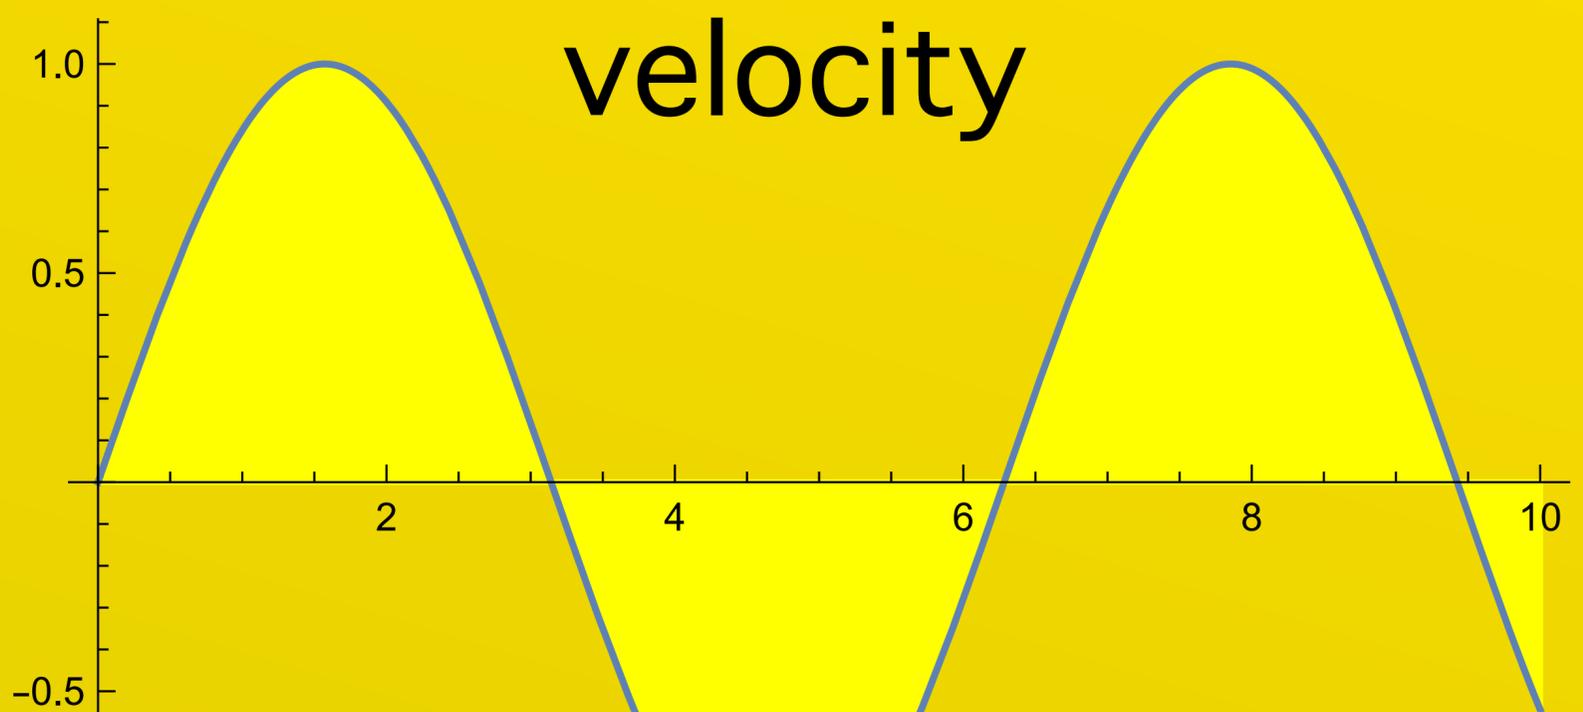

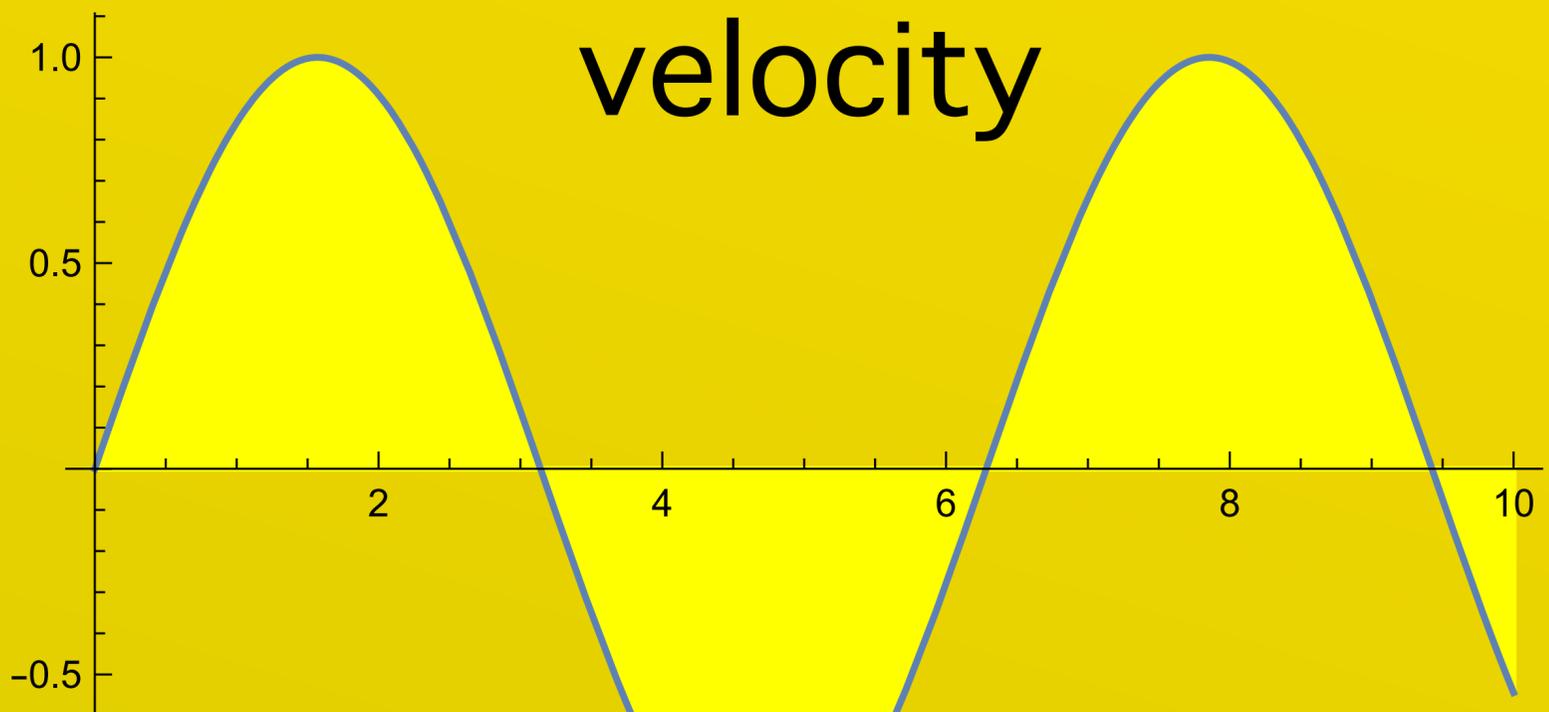

Second Derivative = Concavity

Concave
Up

Concave
Down

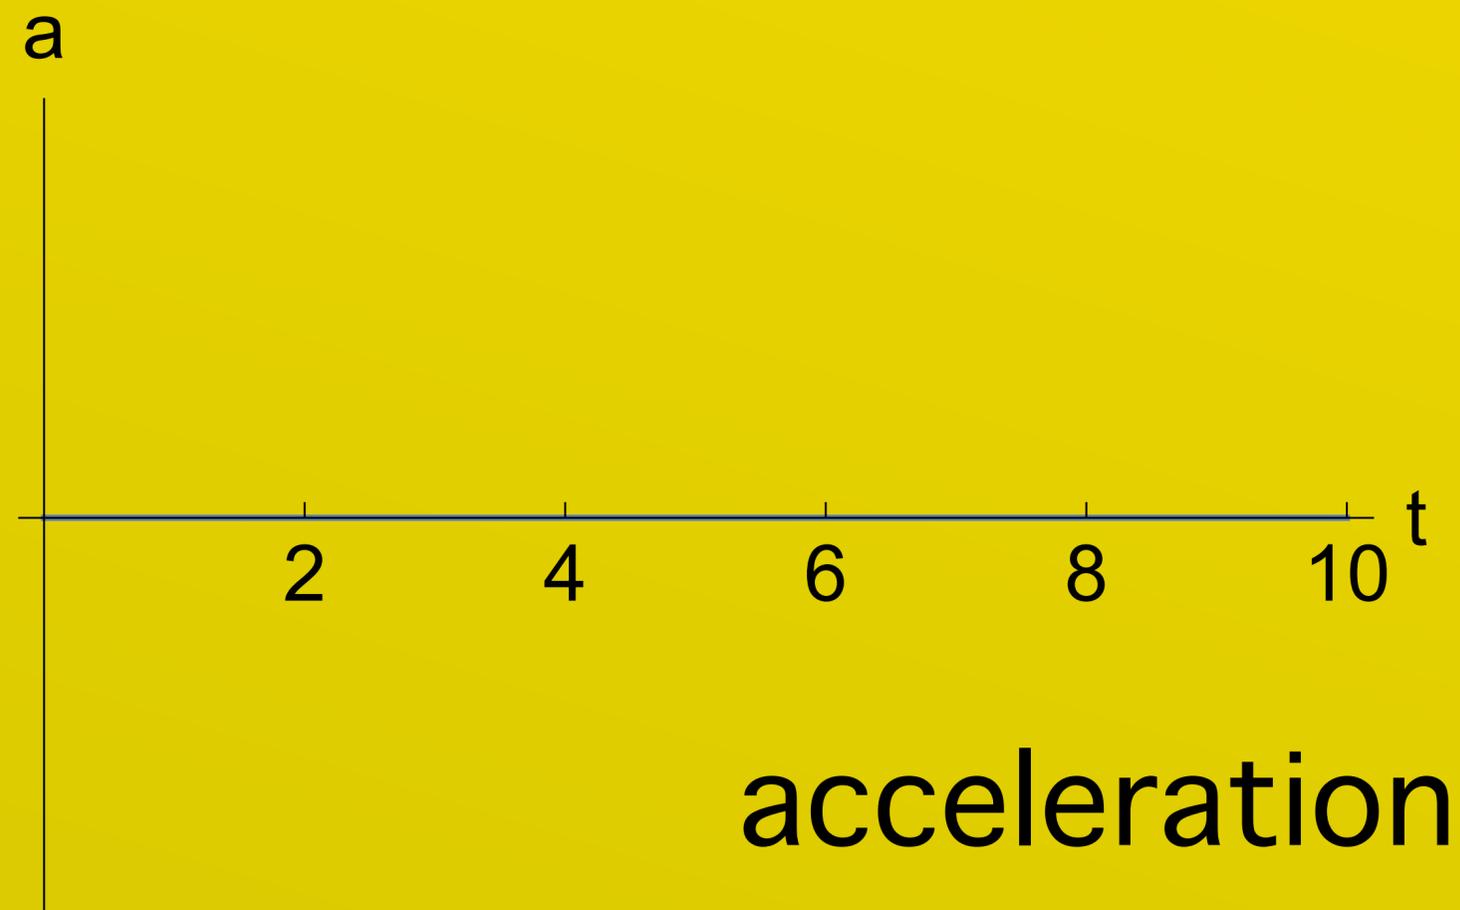

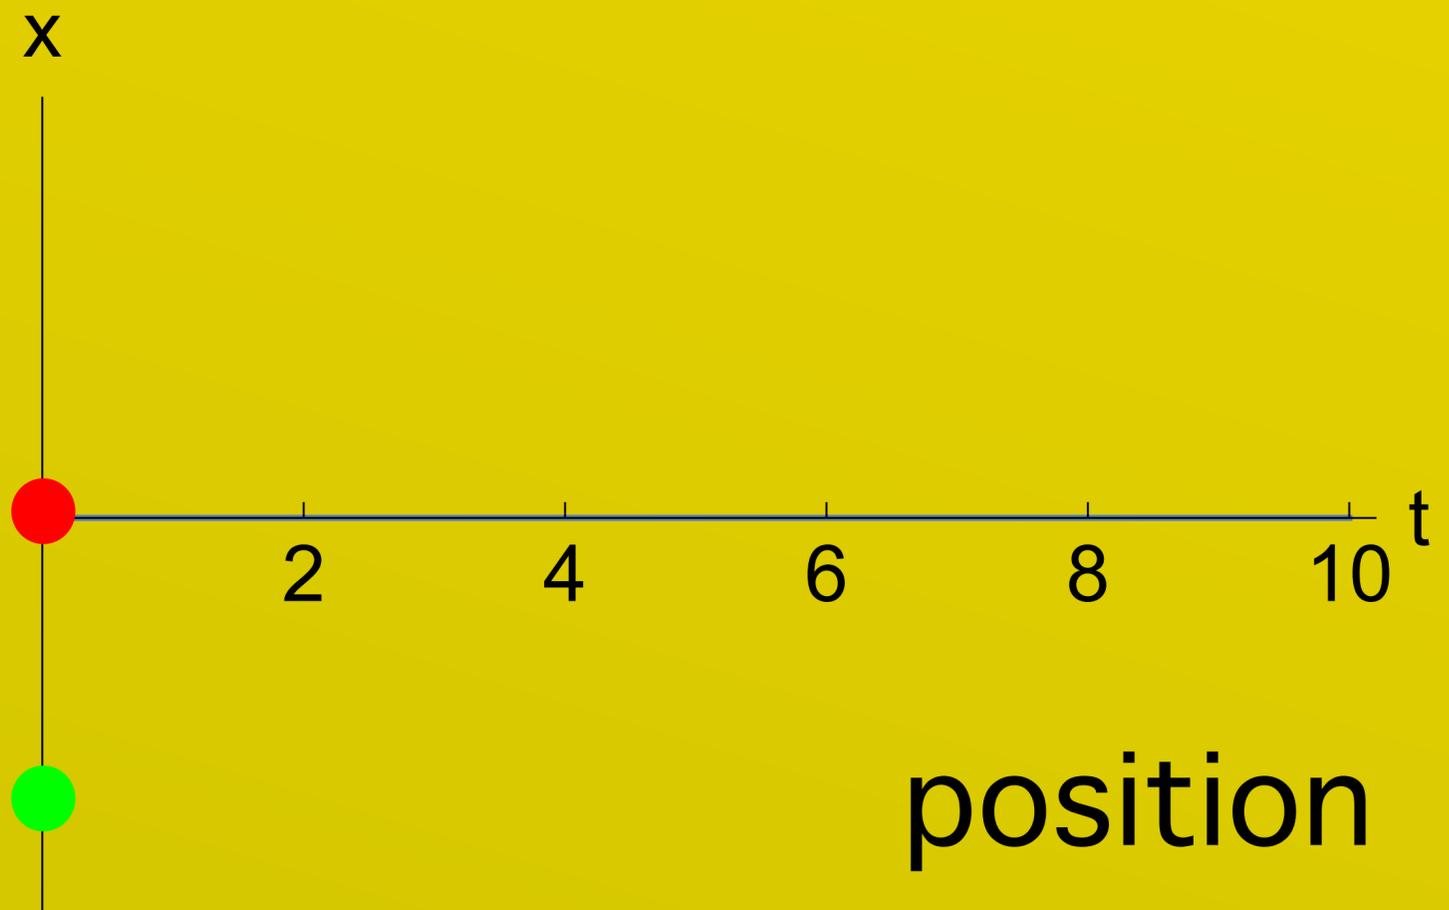

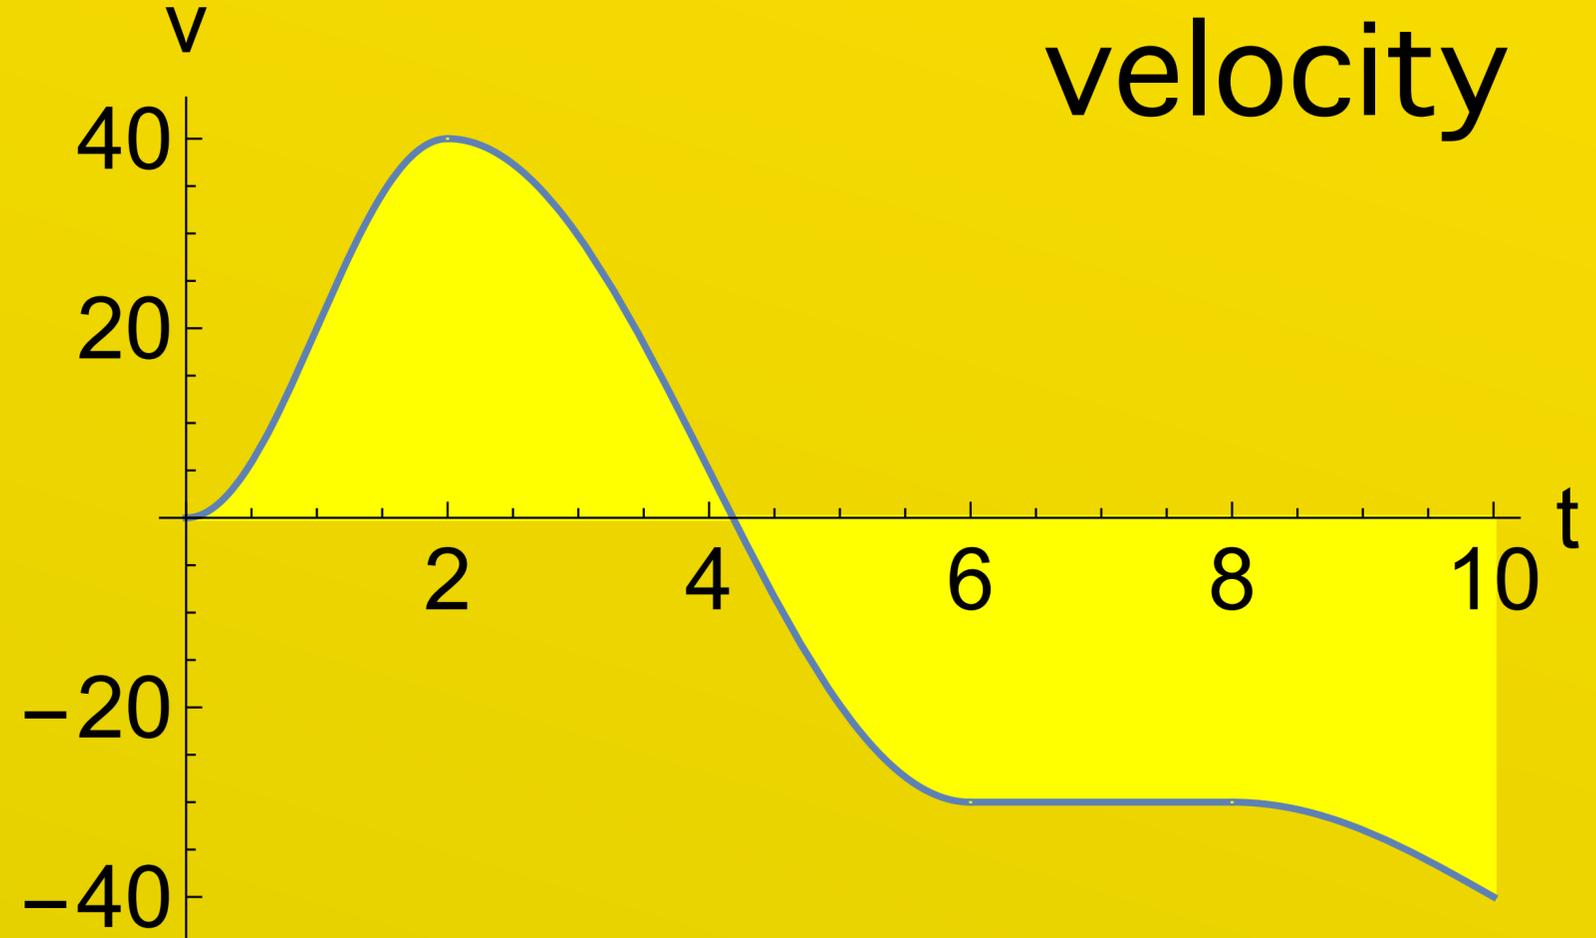

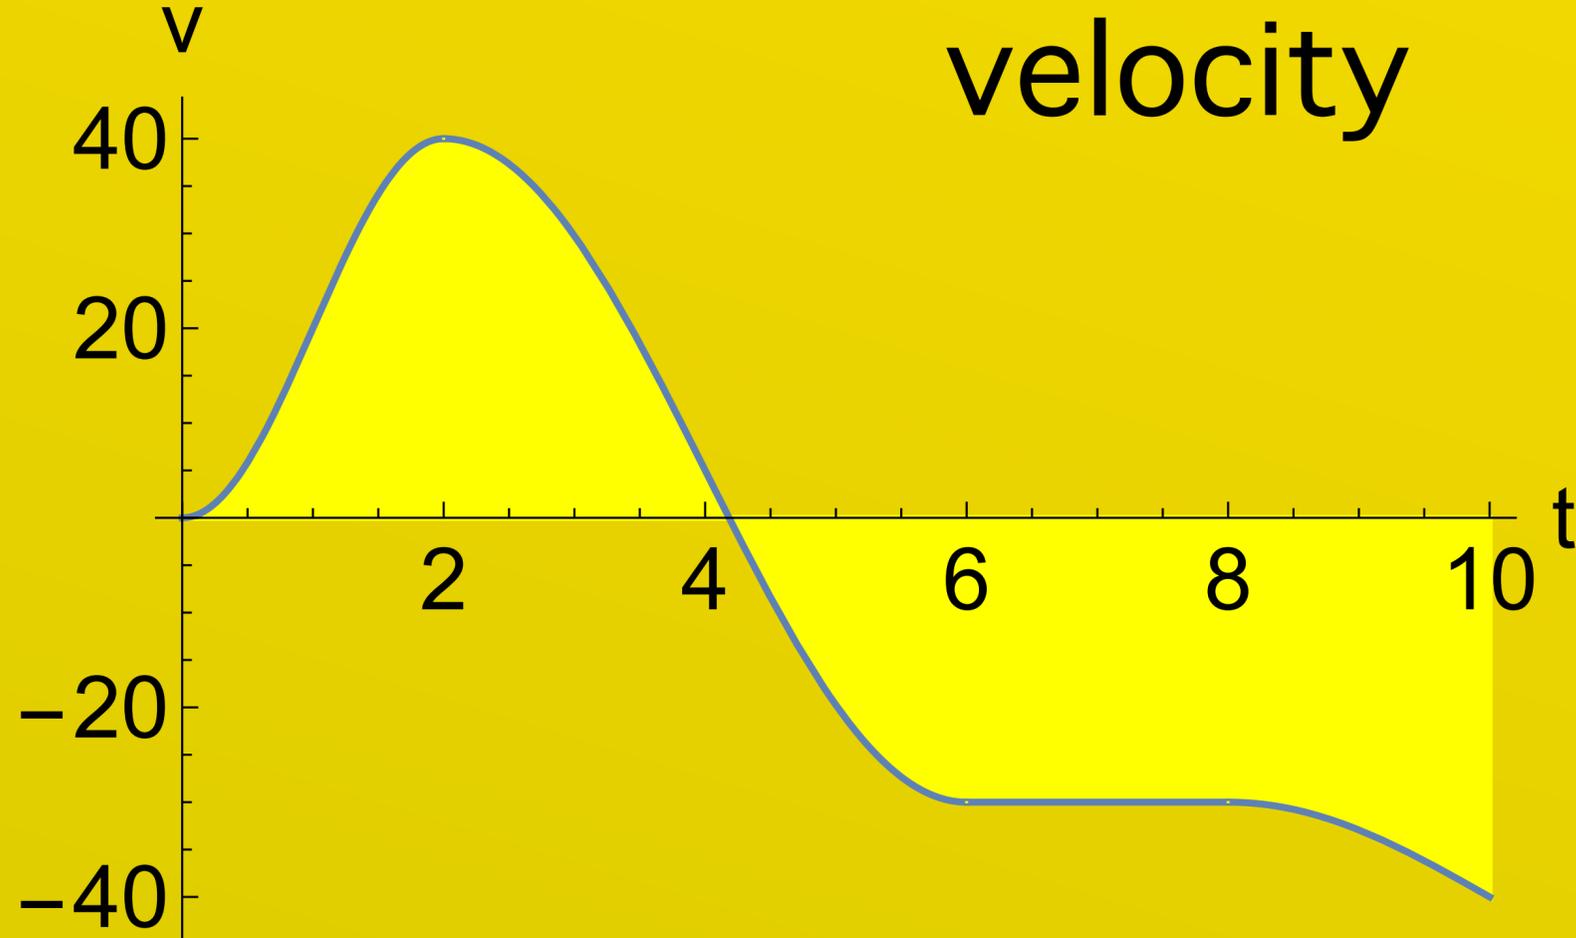

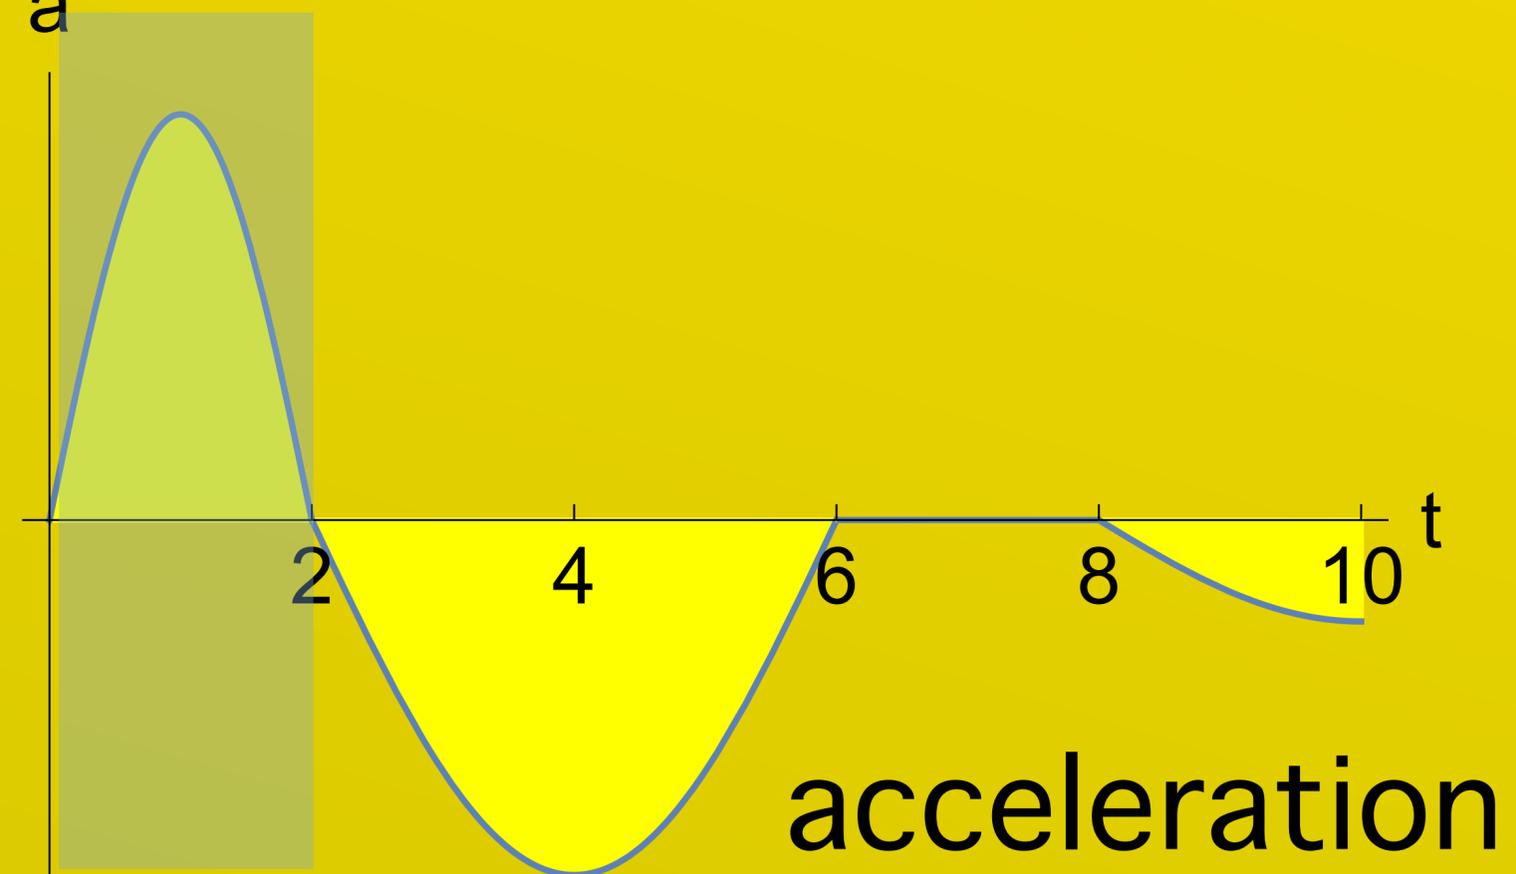

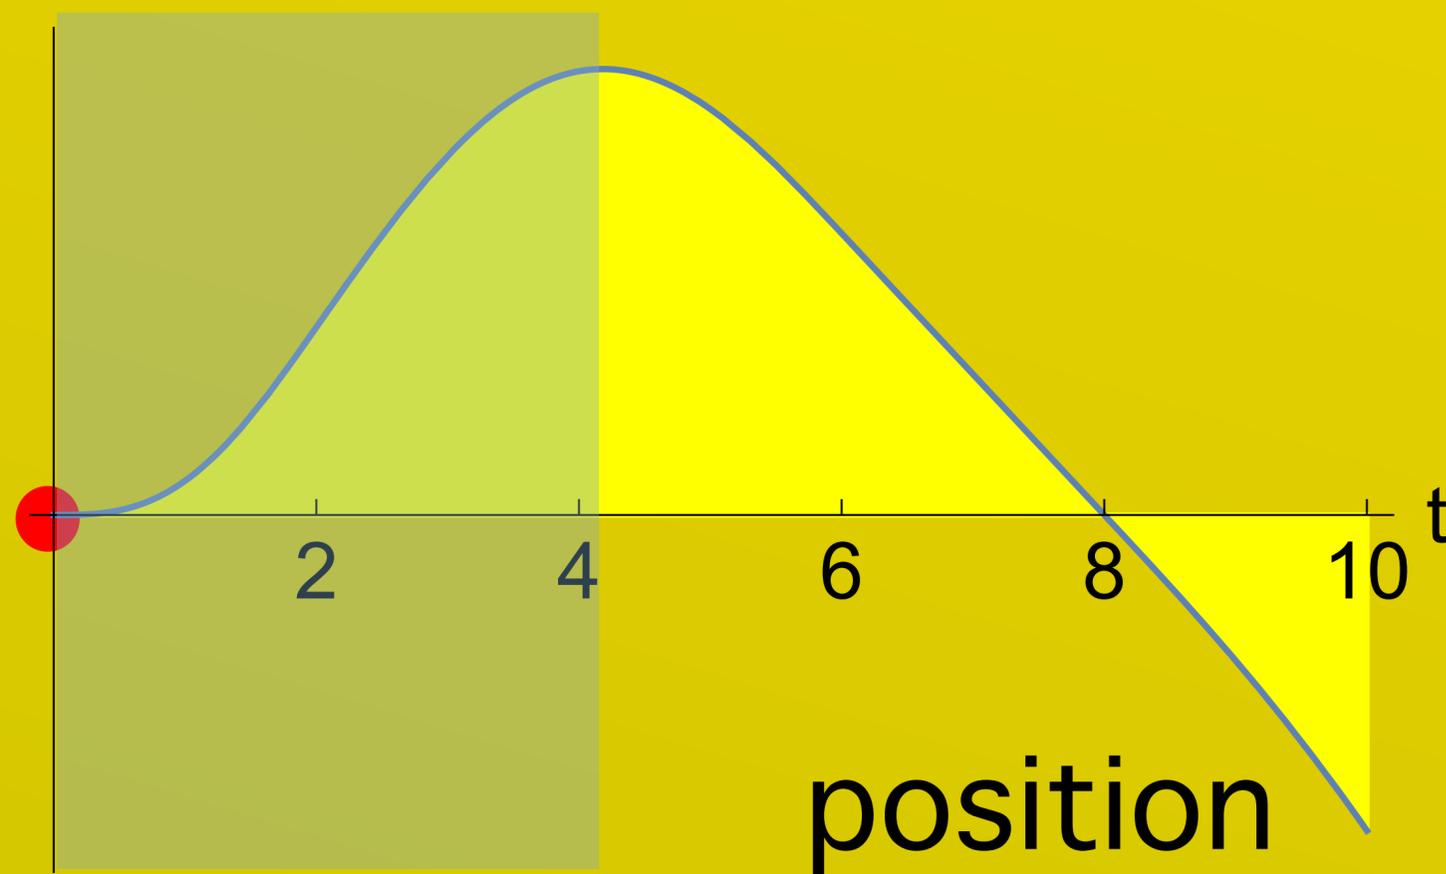

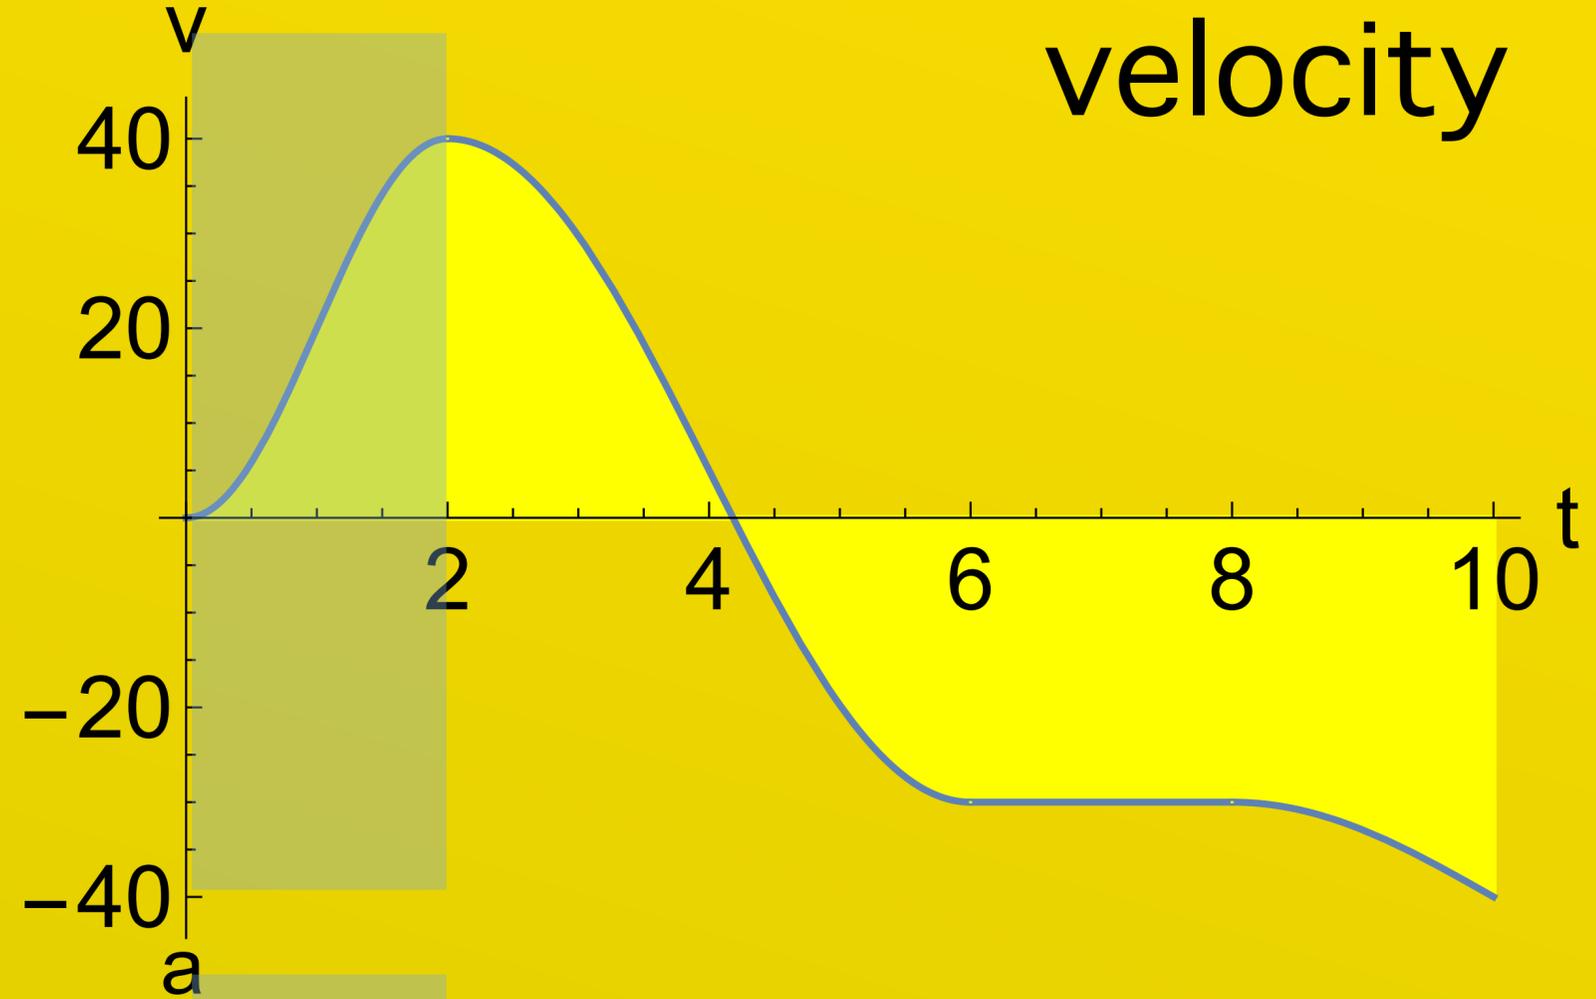

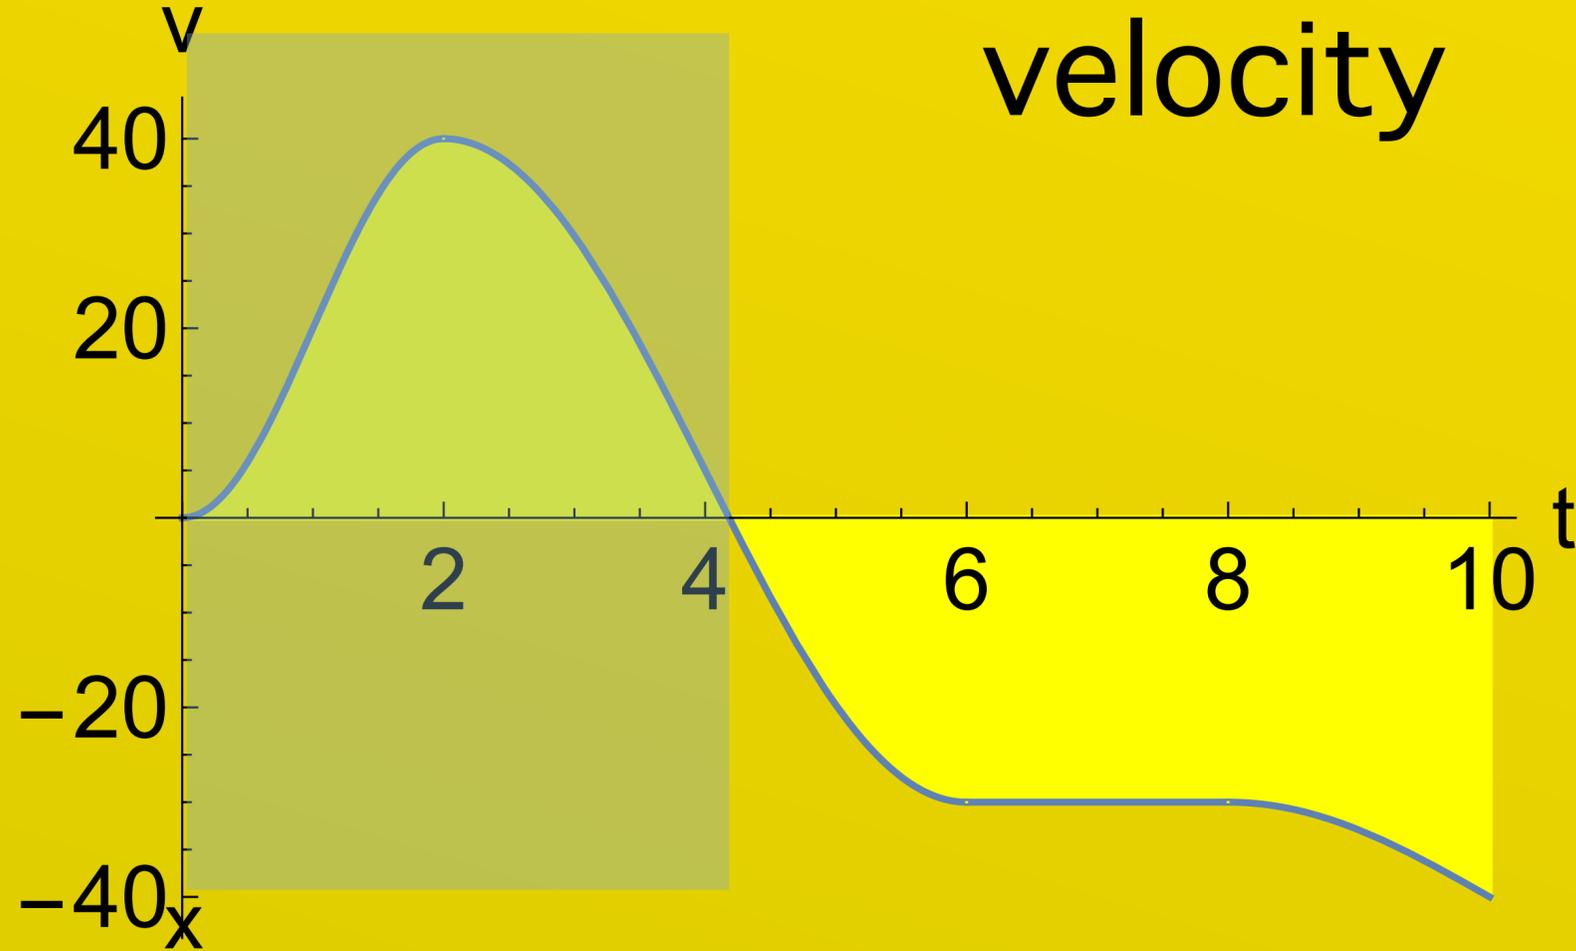

CAR TRIP JAM

RELATIONS

f

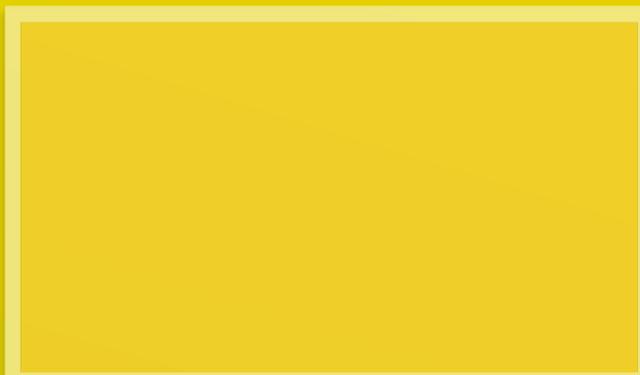

f'

f''

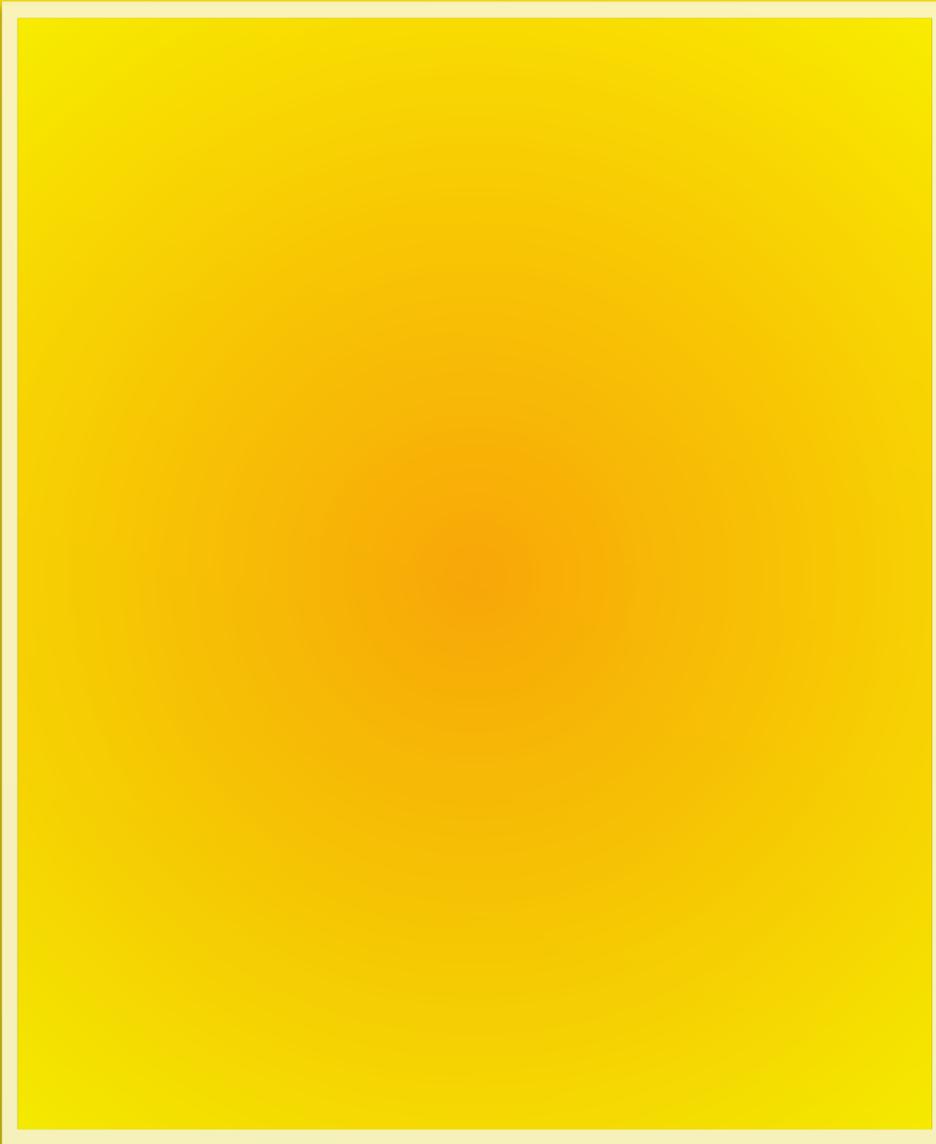

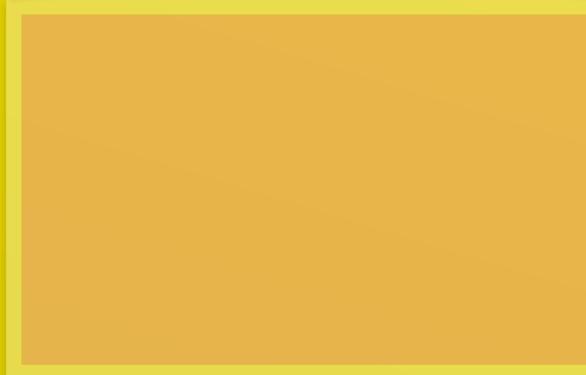

positive

negative

zero

RELATIONS

f

f'

f''

positive

above x
axes

positive
slope

concave
up

negative

below x
axes

negative
slope

concave
down

zero

root

flat point

inflection
point or
very flat point

THE END
