

INTRODUCTION TO CALCULUS

MATH 1A

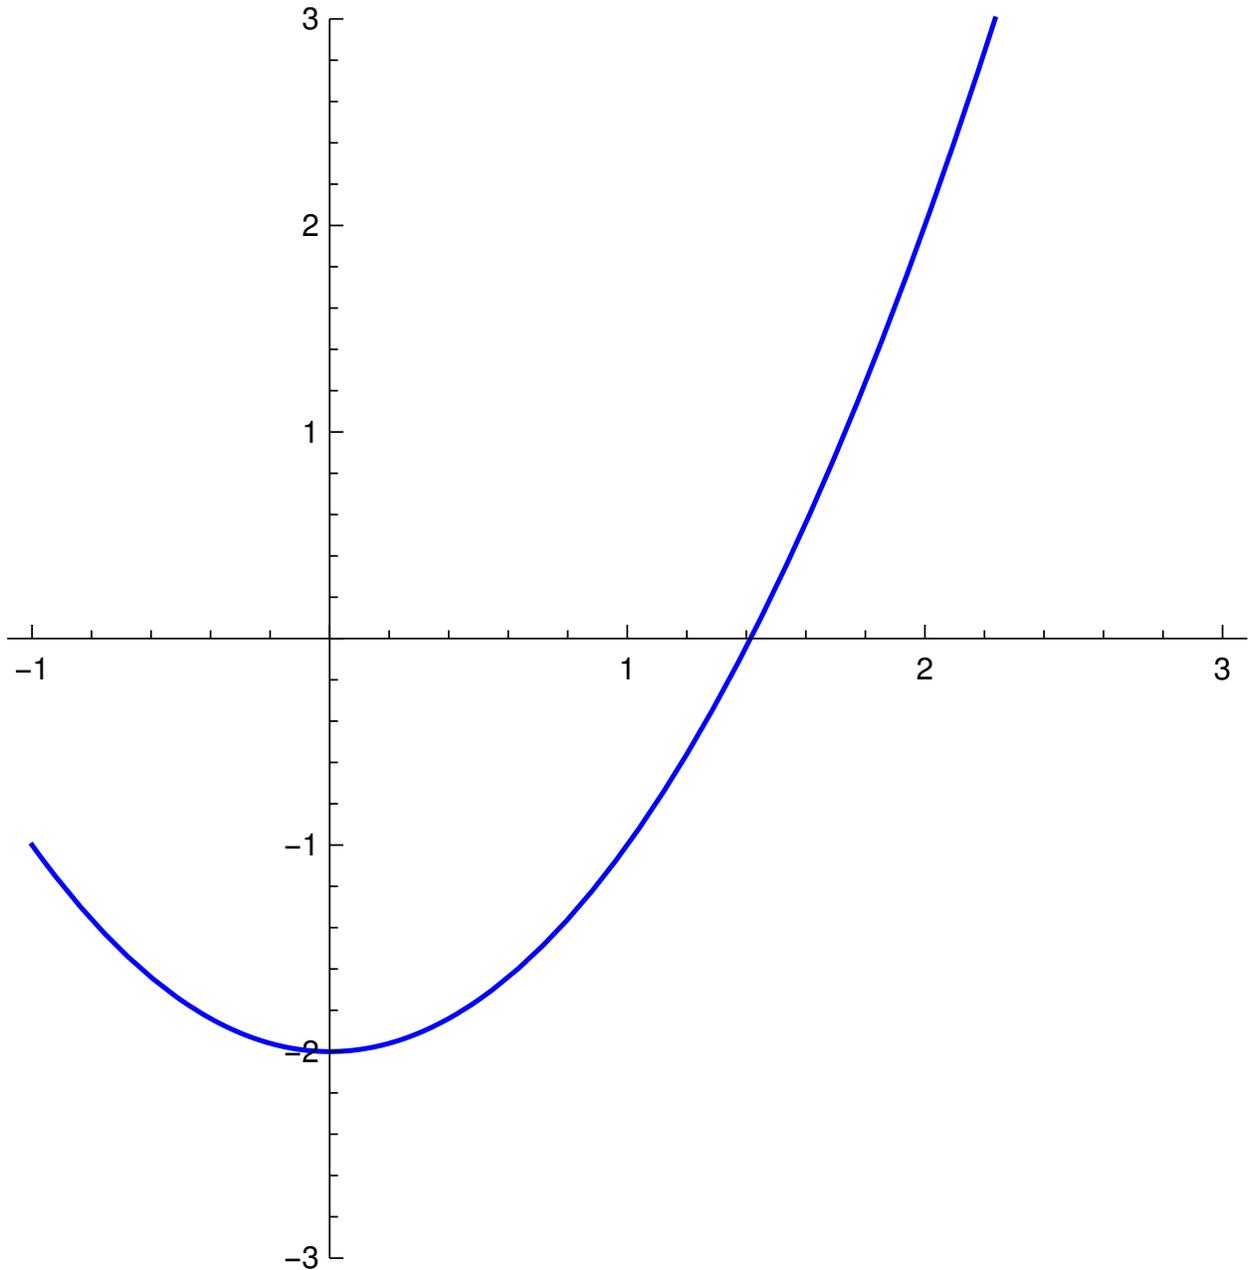

UNIT 14: WORKSHEET

Theorems and Newton

- 1: Formulate the mean value theorem.
- 2: Formulate the intermediate value theorem.
- 3: Formulate the Rolle's theorem.
- 4: Formulate the extreme value theorem.
- 5: Formulate Fermat's principle.
- 6: What is the fundamental theorem of trigonometry?
- 7: Recite the second derivative test. Remember Maxi and Mini.

8: In the following graph $y = x^2 - 2$ trace a Newton step starting at $x = 1.0$.

9: Now do a second step!
