

Lecture 11: Worksheet

Critical points and extrema

In this worksheet we want to find out which rectangle of fixed area $xy = 1$ has minimal circumference $2x + 2y$.

To solve this problem we have to extremize the function

$$f(x) = 2x + \frac{2}{x}.$$

1 Differentiate the function f . For which x is it continuous?

2 Find the critical points of f , the places where $f'(x) = 0$.

3 Sketch the graph of f on the interval $(0, 4]$.
