

MULTIVARIABLE CALCULUS

MATH S-21A

Seminar Week 5

500.1. In this seminar part, we review a few parts of the week.

ASSESSMENT AND REVIEW

This Assessment is also due on , 7/28/2020, together with the other 4 assignments.

Problem 500.1: a) What was the most interesting thing you have seen this week?
b) What was the most difficult thing you have seen this week?

Problem 500.2: How was the second midterm? Too easy or too hard, too frustrating or too much fun?

Problem 500.3: Make a list of all definitions and notations you have seen this week.

Problem 500.4: Make a list of all theorems and formulas seen this week.

Problem 500.5: This is to get to know your rare element peers better. Contact the members of your rare element groups and ask which is their favorite movie containing some kind of math. Then list all these movies from your group.
